I. Letter to Shareholders

Thank you to all shareholders for the unwavering support for Hon Hai throughout our growth, as we approach the 30-year milestone since Hon Hai's initial public listing in 1991. Before public listing two decades ago, Hon Hai was just a small enterprise focused on the connector manufacturing business with an annual turnover of NT$1.775 billion, and a capital of NT$460 million. Fast forward to the present, Hon Hai is now reached NT$5.358 trillion in turnover, with performance growing more than three-thousand-fold in the past 30 years; it has become a global group spanning Asia, America, and Europe. Currently, the Group ranks first globally in the field of Electronic Manufacturing Services ("EMS"), with a market share exceeding 40%.

With the continual growth of Hon Hai, Hon Hai will need to consider existing operations and sources for new growth momentum in tandem. In an effort to adhere to the principles set before public listing, "Continual development of new products and technologies to respond to changes in the market". In the recent years, we have rigorously challenged the status quo for the Information and Communication Technologies ("ICT") industry, with novel products and meeting new customers' needs. In the past year, the development and implementation of the "3+3" new industry, technology fields have also yielded significant results.

Currently in the ICT industry, the Group selects electronic products with growth potential and stable profitability with the criteria of "Right Customers, Right Products, and Right Timing". Consequently, even when the macro environment has been adversely affected by the coronavirus, Hon Hai still performed. The company's operational results for the year are as follows: the consolidated revenue for the year was NT$5.358 trillion, a record high; the net profit for the period attributable to the owners of the parent company is a new record NT$101.795 billion, and an earnings per share of NT$7.34.

Promising Prospects for the ICT Industry

In the past, the main areas for the application of the Group's products included consumer electronics; cloud network products; computer terminal products, components, and other products, etc. Amongst these, smartphones accounted for the largest portion of revenue; even though hardware has been developed for many years, differentiation and innovation is still ubiquitous for high-end products. With lighter and thinner form factors in tandem with increased functionality, the complexity and precision of components and mechanisms, and the expansion of the ecosystem into product categories such as wearables. This gives Hon Hai a distinct advantage to leverage our extensive vertical integration and mass production capabilities; to assist customers in brand value creation, increasing competitiveness, and create more development opportunities into the future.

Additionally, due to the global promotion of 5G infrastructure, many customers have also begun to launch new consumer products, driving Hon Hai's next wave of growth momentum. Moreover, with the impact of the coronavirus, home office, home entertainment, and other stay-at-home economies have maintained a uptrend; driving growth and significant demand for cloud servers and network communications, through to the end consumers in forms of tablets, laptops, gaming consoles. Expectations for the future growth momentum of the ICT industry will be supported by the stay-at-home economy in the post-pandemic era.

In response to the industry development trend of "Regional Manufacturing", Hon Hai continues its commitment in Taiwan, China, Vietnam, India, Mexico, the United States, among others to collaborate with customers regional manufacturing implementation, while adopting a localized strategy to strengthen the Group's reach and depth in international manufacturing. Equipped with the Group's flexibility, depth, breadth, and speed, we maintain a distinct competitive advantage that is difficult for competitors to rival in the short-term.

New Hon Hai's Successful Transformation

Due to the ravaging pandemic, we have faced the "worst environment" in the past year. The resistance on the flow of personnel have increased, and the decades-long habitual face-to-face with customers has undergone a forced transformation. At the same time, we are also ushering in the period of "best opportunity". The Group's short, medium, and long-term corporate transformation plan of "F1.0 optimization of the status-quo; F2.0 digital transformation; F3.0 transformation and upgrade", has laid a foundation for a clear direction.

For F1.0, a meeting of senior managers was held internally to instill the strengthening of corporate governance thinking and implementation, and implementation of key topics of "Division of Labor, Sharing, Profit-making, and Elimination of Fraud". With the coronavirus pandemic yet to abate, an increased adoption of digital tools to service customers worldwide is necessary, moreover, to keep factories connected globally. In the past year, the Group has held more than 160 global pandemic prevention and safety related events; established new standards of production safety communication mechanisms. Despite the pandemic, this has positively increased the optimization speed for the Groups internal and external communications and elevated the Groups efficiencies above and beyond pre-pandemic levels.

In terms of F2.0, the Group successfully established a set of innovative factory digital management system. This system enabled the Hon Hai Chengdu campus to be selected as of the Lighthouse factories for the World Economic Forum, and the Group joined the rare few companies with two WEF-certified Lighthouse factories. This award also represents the affirmation of the group's promotion of F2.0 digital transformation, and further validated the strength of our global technology manufacturing services. In the past year, we have also formed alliances with top companies such as SAP and Microsoft to further enhance the Group's competitiveness.

For F3.0, the focal point of New Hon Hai's strategy, the Group's planned "3+3" (emerging industries + technologies) enables the expansion of the Group's technical and industrial breadth, in-turn increases profitability goals. Among them is the field of electric vehicles ("EV"). The Group has successively established cooperative relationships with partners such as Fisker Automotive in the United States, Geely and Byton in Mainland China, etc., continually expanding the potential of the EV industry offerings going forwards.

On Hon Hai Tech Day ("HHTD20") last October, we announced the establishment of the MIH Alliance, with the goal of standardization, modularization, and platformization. It was not only the first in the industry, but also significantly lowered the entry barrier for EV development and heralded an open participation era. Within just six months, more than 1,500 members from five continents at home and abroad have signed on. The alliance has received enthusiastic responses from partners in the fields of software, hardware, and services; many of whom leaders in their fields. The accumulation and collaboration between the participants will be key in promoting the development of the EV industry.

Moreover, in this era of rapid development of technologies such as automation, chip integration, digitization, and intelligence; it is imperative to identify trends and deploy R&D in advance, to provide transformation impetus for the Group from "brawns" to "brains". Therefore, we formally established the Hon Hai Research Institute on June 17, 2020. As one of the core development strategies of the Group's transformation and upgrading towards F3.0, the research institute focuses on the future 3 to 7 years of forward-looking technology research and development; strengthening the Group's technological prowess and elevating product value. The institute has 5 research faculties: Artificial Intelligence, Next-Generation Communications, Quantum Computing, Cyber-Security, and Semiconductors. The fruits of research will provide prospective support for the Group's manufacturing sites, empowering various business groups and establishing technical advantage in the 3+3 fields, widening the gap with competitors.

Continuous Efforts for Social Responsibility

At last year's shareholders' meeting, we reported the Group's goals relating to Environmental, Social and Governance issues ("ESG"). During the past year, in our efforts of social communication, we have continued transparent disclosures and promote the establishment of the "Sustainable Management = EPS + ESG" corporate culture.

In view of the increasingly severe global climate crisis, the Group has formally announced its response to Climate Action 100+ ("CA100+") in November 2020, requiring all affiliated plants to comply with the local government's carbon emission policy, continue the strengthening of climate risks governance and actively manage greenhouse gas emissions. For climate-related disclosure, support and adherence with Task Force on Climate-related Financial Disclosures ("TCFD") suggestions have been implemented. At the same time, we have also announced our contribution and determination to the 1.5ºC goal, to achieve net-zero greenhouse gas emissions by 2050, and limit global warming to 1.5ºC.

To ensure a more scientifically fair calculation methodology for our carbon reduction targets, Hon Hai submitted an ambitiously stringent 1.5ºC commitment to the Science Based Targets initiative (SBTi) in January 2021. At present, we have brought onboard third-party consultant Carbon Trust to assist in the setting of scientific carbon targets, accurate calculation of carbon footprints, formulation of targets and corresponding strategies in line with our 1.5ºC goal, and achieve Hon Hai's target of net zero emissions.

Recently, we have also signed a memorandum of cooperation with international certifier UL, jointly promote the use of Shenzhen Longhua Park as a demonstration site for the "Zero Waste Park" and to strengthen cooperation with supply chain customers for environmental management.

As an emergency response during the early stages of the coronavirus outbreak, we have successively launched self-made face mask production lines in Taiwan, China, India, Hungary, the United States, and Mexico, among others. Within a year's time, the cumulative production of masks for the Group has exceeded 240 million units. Although face masks are technically the simplest product produced in the Group's history, it is one of most symbolic importance. The Group has also contributed surplus mask production capacity to assist communities to strengthen pandemic prevention.

External Honors and Affirmation

Recently, the Group was awarded the Clarivate Analytics "Top 100 Global Innovators" and is also the only non-state-owned enterprise in Taiwan to have won this award for four consecutive years. It represents the ongoing affirmation of the Group's excellent performance in terms of innovation and influence, active strengthening of international market presence, forward-looking innovations, and thereby establishing long-term competitiveness.

Moreover, Hon Hai has also won the "2019 2020 Taiwan Corporate Sustainability Awards" from the Taiwan Business Sustainability Institute ("TCSA") for two consecutive years, and the British Standards Institute ("BSI") "Sustainability Excellence Award 2020"; In Mainland China, the Group received the "2020 Chinese Enterprises ESG Best Practice" and were selected as the "Excellent ESG Cases of Chinese Enterprises White Paper", both of these awards support the Group's excellent commitments and contributions to ESG issues.

Looking to the future, Hon Hai will continue to uphold the concept of "Sustainable Management = EPS + ESG", promote a culture of friendly environment, and fulfill its role as a corporate citizen. Among them, "3+3" is an important long-term strategy of the group. The first step will entail commitment in the new energy automobile industry, in-turn accelerating the transformation and upgrade of Hon Hai on the path of sustainable management. Most importantly, we aim to continue to Group's expansion, continue to deliver steady value and higher equity for all shareholders.

V. Operational Highlights

A. Business Activities

(1) Business Scope

(a) Major Content of Business Activities

IT, communications, automation devices, photo-electricity, precise machinery, auto, production, sales and service related with connectors, casings, radiators, assembled parts of consuming electronics as well as assembly of network cables. The products manufactured by the Company include:

1. **Consumer Electronic Products (mainly smartphones, TVs, game consoles, etc.):** Personal consumer electronic products, including smart phones, feature phones, wearable devices, etc.; as well as smart home entertainment systems and equipments, including TVs, game consoles, set-top boxes, speakers, etc. Covers a larger portion of traditional categories of 3C, which encompasses Consumer Electronics and parts of Communications.

2. **Cloud Network Products (mainly servers, network communications and related products):** Enterprise and consumer network communication equipment, equipment required by cloud storage, including routers, servers, edge computing, data centers, satellite communications and other related equipment.

3. **Computing End-products (mainly computers, tablets, etc.):** Lifestyle and work computing equipment, office and workplace computing products, including desktops, notebooks, tablets, office machines, printers, etc. Covers the Computing aspect of the traditional definition of 3C product category.

4. **Components and other product areas (mainly connectors, mechanical parts, services, etc.):** Upstream manufacturing and development of key components, technical components; including connectors, precision optical components, lenses, electronic components, semiconductor products, automotive electronic parts, tool/mold fixtures and mechanical equipment. Additionally, logistics, warehousing, software development, healthcare services, and industrial internet integration solutions also fall into this category.

(b) Revenue Mix

100% of the products are 3C electronics (Computer, Communication, Consumer Electronics). The output and sales volume of the recent two years can be found in the table of Production and Sales.

(c) Current Product Items

The Company's products cover key components, modules and system assemblies for 3C electronics. Key components may include 3C connectors, line assembled products and others; the modules may include the machinery modules (e.g. the casing of 3C products) and electronic modules (e.g. surface adhesive product for 3C products); the system assembly is mainly for finished 3C products.

(d) New Products, New Industries, and Technologies Developments

The Company actively transforms, upgrades, and promotes the transition from brawn-intensive industries to brain-intensive strategies of "F1.0, F2.0, and F3.0". In addition to the development lights-out factories and automation, the Company also focuses on our defined "3+3 categories" including the three industries of robots, digital health, and electric vehicles; across three applications of AI, semiconductor and next gen communications. Among these, electric vehicles are one of the Company's main growth drivers in the future. However, the industry is currently opaque in terms of information on existing electric vehicle manufacturer platforms, which introduces development difficulties in optimizing and finding a suitable match with these manufacturers. In order to solve this problem, the Company created the MIH Alliance, an open platform so that partners all over the world who want to enter the space will have a platform that can provide enough information for them to develop related software and hardware, thus guaranteeing the development of the highest quality products. At the same time, in addition to opening the platform, standardization and modularization will also greatly reduce development costs, and development timelines shortened, to maximize inclusion of external resources.

Facing the global market, the Company will launch chassis platforms for electric passenger cars and electric buses to be shared with MIH partners; the Company's software and hardware supply chain will complement MIH partners to provide brand customers with complete vehicles design, development, and production service solutions to jointly create an innovative business model for car manufacturing.

(2) Industry Overview

(a) The Current State of the Industry and Future Developments

Looking back at 2020, under the global impact of the COVID-19 pandemic, the epidemic prevention and protective border measures of various countries forced the suspension of

economic activities. The global comprehensive Purchasing Managers Index (PMI) fell sharply for three consecutive months since February 2020 and fell to a historical low of 26.2 in April. Later, as countries successively lifted restrictions and resumed economic activities, the index rose to 51.1 in July, above the line of prosperity. As of February 2021, the global composite PMI has remained above 50, which represents economic expansion for eight consecutive months, reflecting the continued recovery of the global economy after the pandemic; and the loose monetary policies of various countries have provided sufficient liquidity to support the global economic recovery.

Regarding the electronics industry in the recent years, the product with the largest market scale is still the consumer electronic smart. According to Canalys market research, global smartphone shipments totaled 1.26 billion units in 2020, a 7% decline from 1.37 billion units in 2019. This mainly reflects the disruptive effects of the pandemic on stagnating economic activities, and the adverse effects on the global supply chain, leading to a decrease in consumption. In the field of cloud network products and computer terminal products, demand for remote work, home entertainment, and remote learning has surfaced due to the pandemic, which has driven related demand. In the field of cloud network products, according to Market Intelligence & Consulting Institute (MIC), long-distance work has greatly increased data transmission, and at the same time, server demand. In the field of computer end-products, long-distance related needs led to a significant increase in the demand for tablets and PCs in 2020. For tablets, according to International Data Corporation (IDC), shipments in 2020 rebounded by about 10% to 159 million units. In the PC segment, according to Gartner's analysis, PC shipments reached 275 million units in 2020, an increase of 4.8%, which is the largest increase that can be seen since 2010. In terms of components and other product areas, their demand fluctuates depending on the sale of corresponding end products.

Looking forward to 2021, as the global economy gradually recovers from the pandemic, consumer demand will gradually emerge. In the field of consumer electronics, driven by the wave of 5G mobile phone replacements, IDC analyzes that global smartphone shipments will increase to 1.34 billion in 2021, up from 1.26 billion in 2020, an annual increase of about 6.3%.

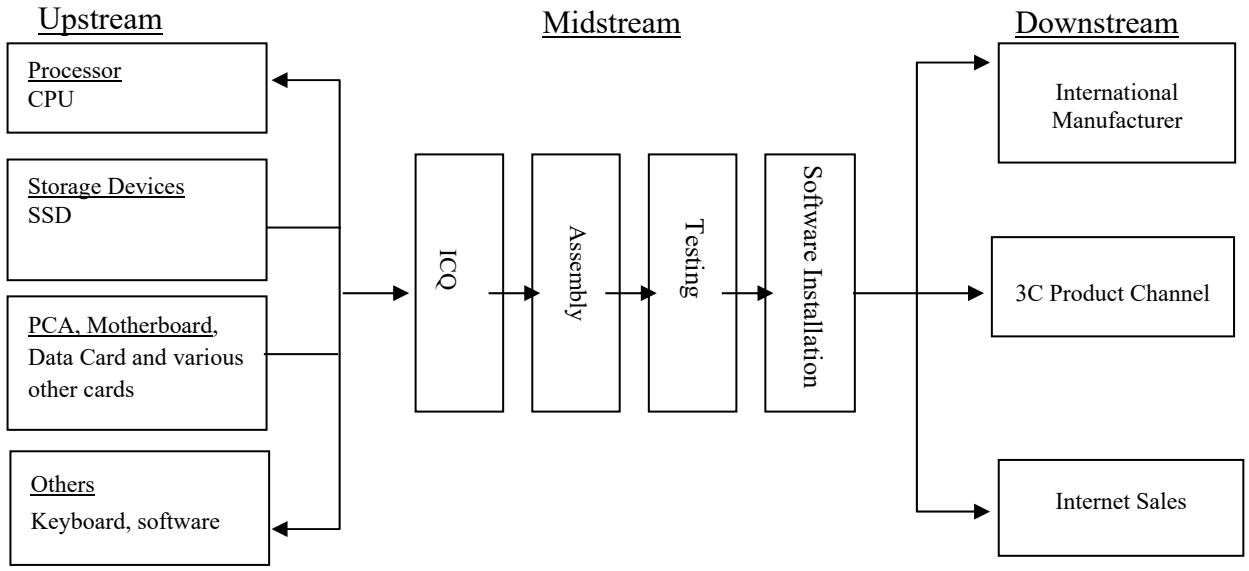

In the field of cloud network products, MIC predicts that the global server market in recent years will continue the trend of remote work, continuing the demand for servers. In 2021, the global server shipments are expected to exceed 13 million units, an annual increase of approximately 4.6 %.

In the field of computer terminal products, as the new normal of remote work and remote learning increasingly mainstream, IDC predicts that the demand for PCs from enterprises, schools, and consumers will continue to grow. In 2021, global PC shipments is expected to increase to 357 million units, higher than 302 million in 2020, an annual increase of around 18.2%.

As for the components and other product areas, as the demand for products in the aforementioned three major areas increases, the demand for related components is bound to

increase. The shortage of various components that emerged in the early 2021s evidence to the fact. In the emerging electronics industry, such as electric vehicles, robots, and IoT; every player has strategized from varying angles. At present, all have established their own advantages and are expected to gradually commercialize.

(b) The Industry Value Chain and Relationships

(c) Various Product Trends and Competition

There are four main product categories:

1. Consumer and smart devices (smartphone, TV and game console)

   With the commercial launch of 5G and the gradual adoption of artificial intelligence (AI) into various technological applications, the consumer electronics industry will enter the era of intelligent networking driven by 5G and AI in the coming decade. In the development of 5G, AI and other related products, the Group has advanced deployment plans, analyzed market demand in advance, and continues to work closely with relevant customers; this combined with the Group's advantages, will enable 5G-related smart consumer products to be deployed timely in the market.

2. Cloud Network Product Category (mainly servers and networking products)

   As a result of the gradual formation of HPC, 5G network and edge computing, enterprise users' purchasing needs of servers to ride on the tailwind of private cloud or even hybrid cloud have been driving worldwide server market growth. |

   The Company has been in the server market for a long time and our quality, technology and service have been one of the most recognized. The swiftly increasing need of a regionalized supply chain under a broad globalized framework from major server customers has raised the bar of manufacturers higher and hence we believe that the

Company is well positioned to be a leading system provider on that front.

3. Computing end products (computers and tablets)

   This is a mature sector and with cross device streaming and cloud services sharing a large part of the performances of personal desktops and notebooks, we expect stable demand for this category. Meanwhile, tablets and smart TVs are now seeing performance pressure and hence a potential upgrade cycle.
   Producing tablets has long been one of the Company's strengths. We expect to see rising demands of tablets thanks to virtual meetings, work-from-home, and home-schooling trends. We aspire to capture this growth tide by integrating core competencies across manufacturing and services and our access to global channels.

4. Components and other products (connectors, mechanic parts and services)

   The Group's long-term strategy is to form strategic partnerships to formulate a comprehensive, vertically integrated supply chain, leveraging our core expertise and advantages.

(3) Technology and R&D

(a) Technical and R&D Businesses

The Company has utilized proprietary management methods for IIDM-SM; Integration; Innovation; Design; Manufacturing to Sales; Marketing, and coupled with Precision Molding; Material Technologies; Sustainable Manufacturing Technology; SMT Manufacturing Technology; Heat Transfer Technology; Plastic Processing; Metal Processing; Testing Capabilities; Automation Capabilities; Photoelectric Consolidation Technologies; Motherboard Design; E-Commerce Capabilities; Server Design; Wireless Communications and Light Display Modules, to achieve core competitive advantage. The Company also strives to provide the best 6C (Computers, Communication, Consumer electronics, digital Contents, Car parts and modules, Channels) foundry services with our strategic partners globally, and create maximum value for shareholders.

Looking to the future, the Company will remain committed to innovation and R&D; develop cutting-edge prospective applications; commercialize and realize product designs; bring to market the fruits of our research, and continue systemization of management processes, to solidify and maintain the Company's lead in core competencies.

(4) Long and Short-term Business Development Plans

(a) Short-term Business Development Plans

The Company pursues continued excellence in operational management and cost control, and provide a “One-Stop Shop” solution for global leading brands. Our commitment is to maintain the high quality of service and related added-value services enable computing, communication, consumer electronics (3C) to enrich lives of the world population. The Company will continue this pursuit and provide a diverse range of services, capture business opportunities and deepen our relationships with international brands.

In order to provide our customers with more timely services, the Company has actively established related manufacturing bases; design centers; service centers in the Europe, the Americas, and Asia to satisfy our clients’ global design, manufacturing and assembly needs.

(b) Long-term Business Development Plans

The Company has formulated transformation and upgrade plans, beginning the long-term transformation from brawn-intensive to brain-intensive. The Company will take this opportunity to upgrade its level of industry, improve profits, and commit to the development of three main areas of electric vehicles, digital health, and robotics; and also emphasize the three main core technologies of AI, semiconductors, and $5^{th}/6^{th}$ generation mobile communication technologies. The Company’s development and implementation of the “3+3” new industry, technology fields have also are also an advanced deployment of technologies and products for 3-5 years in advance; among them, the Company has initiated the MIH Alliance in the field of electric vehicles, and will cooperate and strive with more than 1,500 member Companies at home and abroad to become the Android platform of the electric vehicle industry.

Throughout the years, the Company has actively addressed Social and Environmental Responsibility (SER) issues, both on a company-level and also an industry-level with Electronic Industry Citizenship Coalition (EICC). The Company continues to dedicate resources to address issues such as energy saving, carbon emissions, recycling, and environmentally friendly initiatives. Looking to 2021, the Company will leverage innovations in software and technological services to expand the environmental protection/energy industry, and promote global energy savings and emission reduction.

B. Production and Sales Status

(1) Market Analysis

(a) Core Products (Services) and Sales (Supply) Areas

The Company's products are divided into four categories: Consumer Electronic Products (mainly smartphones, TVs, game consoles, etc.); Cloud Network Products (mainly servers, network communications and related products); Computing End-products (mainly computers, tablets, etc.); and Components and other product areas (mainly connectors, mechanical parts, services, etc.). Core sales areas cover three continents: Europe, America and Asia.

(b) Market Share

According to Bloomberg, the Company ranks first in Electronics Manufacturing Services (EMS), with a market share of 40.9%.

(c) Future Industry Supply & Demand and Growth

The Company's products are primarily used in industries such as communication devices (smartphones, internet-enabled devices), consumer electronics, computers, and related products, the industry developments for the respective product categories are as follows:

1. Consumer Electronic Products (mainly smartphones, TVs, game consoles, etc.);

   Among them, mainly from the perspective of smart phones, the United States and Europe are already mature markets, and the growth of local phone shipments have slowed. The growth momentum of the smart phone market in the future will come from emerging regions, such as China. China has further increased the number of 5G smart phone users following the increase in 5G coverage. Chinese smart phone brands have gradually matured, and their market share has gradually increased.

   In addition, India is also a fast-growing region. As the local smartphone adoption rate is still low; as local telecom companies continue to increase network coverage outside of Tier 1 and Tier 2 cities, the region will attract major smartphone manufacturers to actively invest. It is one of the main driving forces provide growth for global smartphone shipments in the future.

Even with the many years of smartphone hardware developments behind us, the high-end products are still continuing to differentiate and innovate. Leading brands vie to increase added value for smartphones and attract additional income. Smart accessories have become a lynchpin for many brands, accessories such as bracelets, watches and external lenses. With the increasing demand for outsourcing of global smartphone brands; the gradual reduction in the smartphone form factor; increase of functionality, the internal components are more intricate than ever. Therefore, manufacturers with a proper vertical integration and manufacturing capacity can be paramount to helping clients reduce cost, increase competitiveness, with many more opportunities in the future.

2. Cloud Network Products (mainly servers, network communications and related products)

   (1) Servers/storage devices

   With the advent of cloud computing, an abundance of corporate information has shifted away from the confines of physical on-site storage, and embraced cloud computing services. Coupled with the needs of calculation on the cloud, server products have also begun to evolve. The main driver for this growth being the tendency for enterprise units to be replaced.

   (2) Switches and Routers

   With 4G/5G becoming universal, Big Data centers and developments in IoT, brings about a increasing amounts of network traffic. Many countries have been actively expanding their 4G/5G and fiber networks and reinforcing related fundamental infrastructure. To ensure a seamless network traffic, lower response times from databases, cloud service providers have continued to invest in related infrastructure. Overall, this market is maintaining its healthy growth.

3. Computing End-products (mainly computers, tablets, etc.)

   (1) Tablet PCs

   According to IDC, tablets under 8” are susceptible to competition from large form-factor smartphones, will continue to decline; the future of Tablet products will focus on sizes above 8” or even 9”, with the increased screen real-estate and accompanying keyboard to

satisfy the content-creation needs of consumers.

(2) Computer Products

Comparative to the smart devices industry, the Wintel camp of PC products have lacked buzz in the recent years. The upgrade of Windows operating system and Intel chips have struggled to captivate consumers to trade-up as it used to. IDC believes that in a mature market, the PC product is reduced to just needs of replacements. In developing regions, PC have also shown little or no growth, because of the increase in functionalities from smartphones and tablet computers filling up many of the functionalities the PC once used to offer. Despite this, the PC has an irreplaceable hold on the corporate market, especially in document processing, file editing, ease of content creation, are all features that are difficult to replace with smart devices.

The PC market have passed the growth stage, and the industry is slowly consolidating, with many smaller brands being merged or forced out. The ongoing competition between remaining brands are less fierce. Under this macro environment, big brands with more resources and vertical integration capabilities are likely to benefit.

4. Components and other product areas (mainly connectors, mechanical parts, services, etc.)

Components include mechanical parts, heat dissipation modules, optics, electronics, PCBs, and semiconductors. With the increasing demand for the products in the abovementioned three categories, the demand for components will rise. In the related components, the optical (touch module, camera module, dot-matrix projector module, etc.) and semiconductor (package and test, semiconductor equipment, chip design, etc.) will be important growth drivers for the Company going forwards.

(d) Competitive Niche

1. Precision molding technology
2. Vertical integration and manufacturing capabilities of plastic molding, stamping, mold-flow, to mechanical components.
3. Creation of internal high speed network systems
4. Mechanical and barebones computer design capabilities

5. Heat transfer and noise treatment capabilities
6. SMT soft/hardware testing capabilities
7. PCBA rapid mass production capabilities
8. Photoelectric consolidation capabilities
9. Management Global supply chain management know-how

(e) Business Development Advantages, Disadvantages and Countermeasures

Advantages

1. The structure of the global industry is still undergoing adjustment, the foundry requirements of 3C and electronic industries grow year over year, and is advantageous for the Company.
2. The turnaround for 3C product life cycle continue to be squeezed, and the importance of timeliness continue to play a key factor, eCMMS is in a prime position to provide speed, quality, engineering services, flexibility and cost considerations, and can assist the Company's opportunities.
3. A complete ecosystem of overseas manufacturing, which is well managed and can cater to clients' needs.
4. Globally deployed manufacturing and points of sale, increasing the consolidation of global resources while providing flexibility.
5. Standardization, computerization, and automation.
6. Establishment of series of synergistic managerial systems of industry, quality, and operations.
7. A firm grasp key capabilities of mold development, and new product development.

Disadvantages and Countermeasures

1. Domestic demand in Taiwan is limited

   Countermeasure: With a global market and a respective global strategy, the Company is positioned to leverage cost-reductions through globalized locations and provide international clients with timely services.

2. Some raw materials are reliant on imports, with low domestic production

   Countermeasure: With the long-term experience in managing

connector related products, the Company is experienced in managing the supply-side relationships. On one hand the Company supports domestic suppliers to lower cost and reduce lead-times, on the other the Company maintains amicable relationships with large international suppliers to reduce risk and manage more sources.

3. Acquisition of land proving to be costly

   Countermeasure: To offset the domestic costs of land acquisition and allocate resources more efficiently, parts of production line have been shifted to more cost-favorable locations, this also manages location-specific risk.

(2) Core Products, Main Applications, and Manufacturing Process

The product segments of the Company Consumer Electronic Products, Cloud Network Products, Computing End-products, and Components and other product. Connectors within the Component segment can be further categorized into I/O (Input/Output) and Interconnection types. I/O are used in computer systems and peripherals such as mice, keyboards, display, printers, drawing machines, and network system related uses. Products examples in this category are: D-SUB connector, circular connector, flat connector, coaxial connector.

Cable matching is mainly catered to the customers' design, and is subdivided into functionality such as: display, mice, keyboard, network system, telecommunication device, and various circuit-enabled switches.

Assembly is also based on the customers' design requirements, and internal structural composition of consumer electronic products, cloud network products, and computing end-products.

(3) Status of Core Material Suppliers

The Company's manufactured products such as connectors, foundations, and assembled products utilize materials such as copper, plastic pellets and auric salt, steel, and the status of suppliers are as below:

1. Copper

   Have strategic alliances with several suppliers, to ensure the stability of copper supply.

2. Plastic Pellets

   Develop connector-specific materials with domestic and international manufacturers to increase quality. Prices are negotiated annually, and

leverages the Company's economy of scale for bulk purchases to ensure price competitiveness.

3. Auric Salt

   Prices for auric salt are based on the international gold price, and calculated based on a formula. The supplier ships directly to the manufacturing plant to shorten turnaround for deliver, and lower transportation/storage related risks.

4. Steel

   Required materials for computer foundation development with domestic and international manufacturers. The Company utilizes market price or annual price negotiations for steel, and leverages the Company's buying power to maintain favorable prices.

5. Other material requirements for assembly or memory modules, or materials required for IC board printing, capacitors, IC. Specific material needs can be acquired directly through the customer.

D. Information on Environmental Protection Costs

(a) The loss caused by environmental pollution during the latest year and up to the printing date of this Annual Report:

None

(b) Information on Environmental Protection Matters

1. The main workshops and production facilities of the Company are located in Tucheng Industrial Park or Hsinchu Science Park. The Company takes environmental protection as its priority, and carries out immediate correction once discovering any problem. It also makes inspection on the existing preventive facilities. Apart from creating a good working and living environment for its employees and the neighborhood, it strictly complies with the discharge standard. For the pollution and wastes generated in the production process, the Company takes the following steps to protect the environment:

   i. Prevention of water pollution: set up wastewater treatment plants and water quality analysis laboratory in Tucheng factory. Chemical method is applied in wastewater treatment, in which pollutants are removed from wastewater and discharged through discharge outlets. The lab has various instruments to measure temperature, PH value, chemical oxygen demand and suspended solid and analyze heavy metal, so that daily inspection on discharging water can be made and water discharge can be well controlled. The Company's factories in Huyue, Minsheng and Hsinchu all received a letter on permit to connect wastewater (or sewage) to the sewer system, under the reference of TFZ No. 1065061681, 0955060439 and YLZ No. 1000004253, and TFZ No. 1035060107 respectively; and have acquired water pollution permit: New Tapei City SHZ No. 04774-01, 05854-00, 05855-00 for Taipei Tiger Leap (Huyao) Factory, Dingpu No.1 Factory, and Dingpu No.2 Factory respectively.

   ii. Prevention of stationary pollution source: waste gas is collected by extraction pipes, and released to the air after the pollutants are removed through the wet scrubber. Every year, the external testing organization is commissioned to detect the viscosity of pollutants in exhaust gas and reports the result to the competent authorities of environmental protection. The Company obtained the Operating Permit of Stationary Pollution Source in 1998 and extended it in June 2008. The permit No. is: BXCZD No. F0447-02. Currently, the total consumption of acid and alkali does not meet the control standards, and the Permit was returned to the authority per Letter No. 1012095840 from the Environmental Protection Bureau.

   iii. Cleaning of wastes: Works are done in accordance with the Waste Cleaning Plan, and the disposal of waste is reported online in a legal way, and wastes are legally cleaned and recycled.

   iv. Management on toxic chemicals: Toxic chemicals are stored separately and strictly

controlled. Moreover, documents on use and inspection are obtained legally, and periodically reported to the component department of environmental protection.

2. The Company has been adhering to the environmental policy of "pollution control and prevention, continuous waste reduction, providing environment-friendly products, protecting the earth, creating a green enterprise," and strictly abiding by laws and regulations on environmental protection and clients' requirements by means of effectively controlling raw materials, manufacturing process and delivery. Besides, it is dedicated to continuous improvement in order to better product quality, make sure the products free from restricted materials and promote the transformation of upstream suppliers to green supplying chain so as to comply with RoHS requirements.

3. Current pollution status, the influence of improvement on the Company's earnings, competitive position and capital expenditure, estimated major expenditure on environmental protection in the following two years:

   i. Estimated expenditure on environmental protection in the next two years: None

   ii. Influence after improvement: None

E. Labor Relations

Current important labor agreement and implementation:

The Company has been treating its employees with sincerity and established mutual trust with them through its welfare system and good training system that guarantee a fulfilling and stable life for them. Though there is no union in the Company, but the Company has established "Workers and Employers Meeting" and have established comprehensive employee communication channels, its employees can give full play to their team spirit, coordinate the Company's decision, cooperate with each other to create a harmonious environment for working. The Company pursuant to the relevant labor laws and regulations, to protect the legitimate interests of employees, provides employees with safe and healthy working environment, and set up an employee feedback and complaints mechanism. The Company adopts the followings measures to build a harmonious labor relation:

(1) Welfare Measures for Employees:

Founded in July 1985, apart from members appointed by each Business Unit, the remaining members are proposed and elected by employees. The committee members are re-elected every three years, and there are dedicated members appointed to deal with the routine administrative works of the Committee.

Meanwhile, the company has set up the Health Department, which has developed a series of welfare measures to employees and their families in terms of health improvement and health care.

At present, the welfare offerings by the Welfare Committee are as follows:

(a) Safe and healthy food service: establishment of staff canteen and food safety inspection center.

(b) Comprehensive employee health management

i. Health promotion: Topical lectures, weight loss activities and setting up blind masseuse service stations.

ii. Health care: annual health check and dental care, etc.

iii. Health consultation: physicians, nutritionists, and other medical consultations to cater for employees' health.

iv. Cultural recreational activities: Construction of employee gyms.

v. Employee life service plan (EAPC): provide employees with psychological, financial, and legal consultation services.

(c) Multi-faceted employee welfare

i. Employee group insurance.

ii. Subsidies for employee club activities.

iii. Subsidies for employee education and training.

iv. Employee birthday gifts, seasonal gifts (cash gifts).

v. Year-end activities and lucky draws.

vi. Employee wedding cash gifts, and funeral condolence payments.

vii. Birth encouragement (including spouses), in additional to birth and parenting allowances, also provide transportation subsidies for pregnant employees, pregnant courtesies and other health care measures.

(2) Employee Communication Channels

The Company actively builds communication channels with employees and conducts two-way communication through multiple channels to ensure immediate response and maintain labor-management harmony. The relevant communication channels are as follows:

(a) The Company's internal website/APP: announce the Company's major events and recent promotional content.

(b) Labor-management meetings: labor-management meeting is held every quarter to coordinate labor-management relations, promote labor-management cooperation, and prevent various labor problems before they arise.

(c) Employee feedback and whistleblowing: According to different matters, the company's internal website and APP provide corresponding channels to allow employees to respond to work, environment and other related issues and suggestions.

(d) Seminars and satisfaction surveys: From time to time, employee seminars and various types of satisfaction surveys are conducted. Plans and improvements are implemented based on the opinions of employees.

(3) Career Development and Training for Employees

Education and training are basic employee welfares provided by the Company. The Company encourages employees to “take on-the-job-training, and apply what they’ve learned to work”. The Company takes training as a means to improve employee quality and their work skills, promote the group performance, facilitate the realization of its operation target of “long term, stability, development, science and technology, internationality”. Based on this, the Company provided 420,984 hours of trainings with the training fees reaching up to NT$6,286,311 in 2020. The main content of training includes:

(a) Orientation for new employees

New employees are guided to familiarize the corporate culture, organization development, reformation history and working environment.

(b) Management trainee program

The 6-month long Management trainee program includes three portions: Firstly, a team-based training to familiarize trainees with the Company and business groups and innovation and creative problem solving courses, to increase the trainees 'soft-power' and adaptability; secondly a practical production line training, for trainees to understand overseas manufacturing facilities and learn related know-how; lastly, departmental training, a mentorship program that allows trainees to learn on the job.

(c) Development of management skills

A tailored training program to meet different needs of different employees at different management levels according to their management needs. The training prepares trainees "organizational, people, and systemic" management skills.

(d) Hon Hai Foxconn University

Training program prepared by Hon Hai Foxconn University, to create a systemic management training and online learning platform. Taking a process-oriented, simplified, logical, standardized, systemic, and information-based approach to training programs.

(e) International lectures/seminars

The Company invites elites and successful entrepreneurs from different industries to lecture and engage in discussion. Lecturers come from fields such as but are not limited to industry trends, electric vehicles, digital health, robotics, artificial intelligence, semiconductors, new generation communication technology and related fields.

(f) Health and well-being lectures

The health management center regularly invites physical and mental health experts to hold appropriate courses during each season in order to help the colleagues to relax after work and to receive in-depth health promotion related knowledge. Courses include exercise, mental well-being, CPR, AED.

(4) Code of Conduct or Ethics

In order to enable all employees to have a better understanding of ethics, rights, obligations and the code of conduct, the Company hereby works out the relevant measures and regulations to provide a basis for all employees. The relevant measures are briefed as follows:

(a) Organizational Responsibility and Judgement of Authority

i. Rules on decision-making authority and authority decentralization: to improve work efficiency, strengthen the management on authority decentralization.

ii. Organizational structure of departments and responsibility of each position: clearly regulate the organizational function of each unit and the scope of responsibility and authority of employees.

(b) Assist All Employees to Understand Relevant Measures and Regulations.

i. Tutoring programs for new employees: to eliminate the new employees' insecurity towards the new environment and soon familiarize the corporate structure, work environment, culture, and colleagues after reporting for duty, and help them to get their mind and body ready for work and reduce new employee turnover rate.

ii. Code of business ethics: to improve all employees' behavioral quality, business ethics and expertise and try to maximize the Company's benefit within the legal scope. Every employee has the responsibility to prevent the Company's interests from being lost or impaired and is obliged to maintain the Company's reputation so as to guarantee its sustainable growth and development.

iii. Employment rules and regulations: defines clearly working conditions, human resources management principals, and lays out clear ground rules for being part of the Company.

iv. Leave-related measures for employees: to provide basis for employees to take and ask for a leave.

v. Reward and punishment system: Rewards or punishment are given to employees whose behavior or conduct has brought benefit or loss for the Company in operation.

vi. Employee/profession promotion: Motivate talents to grow with the company and enhance personal accomplishment.

vii. Performance assessment method for employees: employees' working achievements and performance are assessed as the basis for salary adjustment, promotion, issuance of bonus and arrangement for training courses.

(5) Working Environment and Protective Measures for Employee's Personal Safety

(a) Since 2019, the Company promoted the upgrade of occupational safety and health management system, and passed the certification of SGS Company and obtained the ISO45001 (received 2019/11/24, and valid through 2022/11/23), and CNS45001 certificates.

(b) During the period of the COVID-19 pandemic, regular pandemic prevention meetings were held to consider relevant measures to create a safe and healthy working environment for colleagues.

(c) The Company hosts regular safety committee meetings engages in evaluation with employee Representatives to discuss the Company's safety and health policy, with aims to achieve the goal of zero injury, zero occupational disease and zero accident so as to create a best working environment for all employees.

(d) Plan and promote factory health and safety related agendas. In 2020, the Company was also awarded "Outstanding Work Safety Award" & "Professionalism and Health and Safety Personnel Outstanding Award" by New Taipei City for 2019.

(e) The Company has, according to the Implementation Rules for Public Institutions on Records of Labor-hour without Occupational Injury, taken part in the competition of non-occupational injury record. As of end-2020, the Company's Taipei Tiger Leap (Huyao) Factory has maintained 10,310,561 labor-hours without occupational injury; and Dingpu factory has 2,008,986 labor-hours without occupational injury.

(f) Industrial safety: A Safety and Disaster Prevention Center is set up at the Tucheng headquarters. Each plant can exchange safety messages instantly, provide immediate safety and disaster prevention information, and can establish dedicated response teams based on disasters such as typhoons or pandemics. Emphasis is placed on emergency response personnel training, thus strengthening the Hon Hai Group's safety and disaster prevention system.

(g) Security and Fire Protection System Management: Managed the factory safety and security equipment, and constructed the industrial safety cloud and other modules to ensure that the software, hardware, and management mechanisms for the factories are in normal operation. Implemented infrared thermal imaging detections for the electric plates and other electrical equipment in the factory and established the infrared thermal imaging promotional team trainings. A total of 21 seed employees have completed test reports, identified and corrected the problems, and effectively reduced the fire risks in the factories.

(h) Occupational health: Inventoried the physical and chemical hazards of the various units according to the annual safety and health management plan, completed the sampling strategy of the operating environment monitoring plan, and the monitoring results are in compliance with the legal requirements. Complete four main plans (workplace infringement, human-caused dangers, female health and protection, overworking) according to relevant regulation guidelines, to protect employees from being victim to occupational diseases and unlawful infringement.

(i) In 2020, the Company performed a plant safety and health month in Taiwan, which include: positive energy, practical experience, emergency response, health and topical lectures. A accumulated number of 5,240 employees took part in the 15 sessions. Additionally, a total of 15 health and safety suggestions were acted upon, as a collaborative effort to improve workplace health and safety for employees.

(6) Retirement System

The Company has formulated the retirement and pension plans for employees according to the Labor Standards Act and the Labor Pension Act, including:

(a) Qualification for Labor Standards Act (old system): defined benefit pension plan is adopted.

i. Retirement application: a worker may apply for voluntary retirement under any of the following conditions: where the worker attains the age of fifty-five and has worked for fifteen years; where the worker has worked for more than twenty-five years; where the worker attains the age of sixty and has worked for ten years.

ii. Pension payment: the retirement pension base shall be one month's average wage of the worker at the time when his or her retirement is approved. Two bases are given for each full year of service. Those having served over 15 years are given one base for each full year of service and the total number of bases shall be no more than 45. Length of services is calculated as half year when it is less than six months and as one year when it is more than six months. As set forth in Article 54 of the Labor Standards Act, an additional 20% on top of the amount calculated according to the preceding shall be given to workers forced to retire due to conditions incurred from the execution of their duties.

iii. Employee retirement reserve allocation: The Company shall set aside 2% of the total employee monthly salary amount and deposit them into the employee retirement reserve account pursuant to the applicable retirement system provided by the Labor Standards Act; and ensure that this amount cannot be used as a subject of transfer, seizure, offset, or collateral. Before the end of each year, the employee retirement reserve account balance shall be calculated. If the balance is insufficient to pay employees with conditions specified in Article 53 or Subparagraph 1, Paragraph 1 of Article 54 of the Labor Standard Act for the next year, the Company shall make up the differences before the end of March next year.

iv. The supervision of pension funds: Since January 1987, the Company legally established the Supervisory Committee of Workers' Retirement Fund, which is re-elected every three years and in charge of checking the amount, deposit and withdrawal as well as payment of retirement fund so as to ensure employees' rights.

(b) Qualification for the Labor Pension Act (new system): defined contribution pension plan is adopted.

i. The Company grants 6% per month: according to the Monthly Appropriation Scale of the Labor Pension issued by the Bureau of Labor, the Company

appropriate 6% of the worker's monthly wage to his/her personal pension fund account.

ii. Voluntary employee pension contribution: workers may also voluntarily contribute within 6% of their wage to the labor pension.

	Financial leverage	1.18	1.52	1.68	2.36	1.57	1.32

The reasons for all financial ratio changes within the most recent two years are as follows:

1. Interest protection: The increase in the interest protection in the current period is mainly due to the decrease in the overall loan interest rate, which reduces the amount of interest paid in the current period.
2. Cash flow ratio: Due to the impact of the pandemic, the increase in shipments at the end of the year led to an increase in the balance of accounts payable to suppliers, resulting in net cash inflows from operating activities, resulting in a relatively high cash flow ratio. As a result, the cash flow adequacy ratio continues to increase.
3. Cash reinvestment ratio: Net cash inflow from operating activities was mainly due to the significant increase in the closing balance of accounts payable last year (compared with the previous year. While the closing balance of inventory for the current period was slightly higher than that of last year, resulting in net cash outflow from operating activities. Therefore, net cash from operating activities during the current period was significantly higher than last year, and cash reinvestment ratio was higher.
4. Financial leverage: The decrease in financial leverage compared to last year was mainly due to the decrease in interest expenses during the current period.

Note: Please refer to the Formulas section below, for the formulas of items analyzed.

	Financial leverage	1.04	1.04	1.11	1.43	1.07	

The reasons for all financial ratio changes within the most recent two years are as follows (exempt from analysis if less than 20%):

1. Cash flow ratio: the increase in cash flow ratio was mainly due to the increase in cash inflow from operating activities during current period (accounts payable).
2. Cash flow adequacy ratio: Decrease in cash flow adequacy was mainly due to the increase in cash inflow from operating activities (increased accounts payable) and the decrease in inventories of the current period last year.
3. Cash reinvestment ratio: increase mainly due to the cash inflow from operating activities during the current period.
4. Operating leverage: decreased mainly due to the increase in operating income during the current period is greater than variable costs, and also the increase in operating net profit.
5. Financial leverage: financial leverage decreased mainly due to the increase in operating net profit and the decrease in interest expenses during the current period.

Note: Please refer to the details (1-6) below for the formulas of items analyzed

Formula:

(1) Financial Ratio
1. Total liabilities to Total assets = Total liabilities / Total assets
2. Long-term debts to fixed assets = (Net equity + Long-term debts) / Net fixed assets

(2) Ability to Pay off Debt
1. Current ratio = Current Assets / Current liability
2. Quick ratio = (Current assets - Inventory - Prepaid expenses) / Current liability
3. Interest protection = Net income before income tax and interest expense / Interest expense

(3) Ability to Operate
1. Account receivable (including account receivable and notes receivable from operation) turnover = Net sales / the Average of account receivable (including account receivable and notes receivable from operation) balance
2. A/R turnover day = 365 / account receivable turnover
3. Inventory turnover = Cost of Goods Sold / the average of inventory
4. Account payable (including account payable and notes payable from operation) turnover = Cost of goods sold / the average of account payable (including account payable and notes payable from operation) balance
5. Inventory turnover day = 365 / Inventory turnover
6. Fixed assets turnover = Net sales / Net Fixed Assets
7. Total assets turnover = Net sales / Total assets

(4) Earning Ability
1. Return on assets = [PAT + Interest expense × (1 - interest rate)] / the average of total assets
2. Return on equity = PAT / the average of net equity
3. Net income ratio = PAT / Net sates
4. EPS = (PAT - Dividend from prefer stock) / weighted average outstanding shares

(5) Cash Flow

CONSOLIDATED FINANCIAL STATEMENTS AND

REPORT OF INDEPENDENT ACCOUNTANTS

DECEMBER 31, 2020 AND 2019

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

INDEPENDENT AUDITORS' REPORT TRANSLATED FROM CHINESE

To the Board of Directors and Stockholders of Hon Hai Precision Industry Co., Ltd.

Opinion

We have audited the accompanying consolidated balance sheets of Hon Hai Precision Industry Co., Ltd. and its subsidiaries (the "Group") as at December 31, 2020 and 2019, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, based on our audits and the reports of other independent auditors, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2020 and 2019, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission.

Basis for opinion

We conducted our audit of the consolidated financial statements as at and for the year ended December 31, 2020 in accordance with Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and generally accepted auditing standards in the Republic of China; and in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants, Rule No. Financial-Supervisory-Securities-Auditing-1090360805 issued by the Financial Supervisory Commission on February 25, 2020 and generally accepted auditing standards in the Republic of China for our audit of the consolidated financial statements as at and for the year ended December 31, 2019. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Norm of Professional Ethics for Certified Public Accountants in the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. Based on our audits and the reports of other independent auditors, we believe that the audit evidence we have obtained is sufficient and

appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Group's 2020 consolidated financial statements. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters for the Group's 2020 consolidated financial statements are stated as follows:

Cut-off of hub sales revenue

Description

Refer to Note 4(34) for accounting policies on revenue recognition.

The Group recognizes revenue upon acceptance of the goods by the customers (when control of the products is transferred) if picked up from hub. For pick-ups from hub, the Group recognizes sales revenue based on movements of inventories contained in the statements or other information provided by the hub custodians. As the hubs are located around the world with numerous custodians, the frequency and contents of statements provided by custodians vary, and the process of revenue recognition involves numerous manual procedures, these factors may potentially result in inaccurate timing of sales revenue recognition and discrepancy between the physical inventory quantities in the hubs and quantities as reflected in the accounting records.

As there are numerous daily sales revenue transactions from hubs and the transaction amounts prior to and after the balance sheet date are significant to the financial statements, we identified the cut-off of hub sales revenue as a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

A. Assessed and tested the appropriateness of internal controls over cut-off of hub sales revenue for a specific period prior to and after the balance sheet date, including agreeing to respective supporting documents provided by hub custodians, and validated the proper timing of recognizing movements of inventories and respective transfer of cost of goods sold.
B. Confirmed or conducted physical count of inventory quantities held at hubs and agreed to accounting records.

Allowance for inventory valuation losses

Description

Refer to Note 4(14) for accounting policies on inventory valuation, Note 5(2)3 for uncertainty of accounting estimates and assumptions in relation to inventory valuation losses, and Note 6(7) for details of inventories. As at December 31, 2020, the Group's inventories and allowance for inventory valuation losses amounted to NT$608,332,105 thousand and NT$26,218,370 thousand, respectively.

The Group is primarily engaged in manufacturing and sales of 3C electronic products. Due to rapid technological innovations, short lifespan of electronic products and fluctuations in market prices, there is a higher risk of inventory losses arising from market value decline or obsolescence. The Group recognizes inventories at the lower of cost and net realisable value, and the net realisable value is estimated based on historical experience. An allowance for inventory valuation losses is provided for those inventories aged over a certain time period and those individually identified as obsolete or damaged.

As the amounts of inventories are material, the types of inventories vary, and the estimation of net realisable value for individually obsolete or damaged inventories is subject to management's judgment, we considered the allowance for inventory valuation losses a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in relation to the provision for inventory valuation losses for individually obsolete or damaged inventories:

A. Ensured consistent application of accounting policies in relation to allowance for inventory valuation losses and assessed the reasonableness of these policies.
B. Validated the appropriateness of system logic of inventory aging report utilised by management to ensure proper classification of inventories aged over a certain period of time.
C. Evaluated the reasonableness of inventories individually identified as obsolete or damaged by checking the related supporting documents and comparing with the information obtained from physical inventory.
D. Discussed with management the net realisable value of inventories aged over a certain period of time and individually identified as obsolete or damaged, validated respective supporting documents and reperformed the calculation.

Financial assets and financial liabilities offsetting agreement with financial institutions

Description

Refer to Note 4(27) for accounting policies on offsetting of financial instruments, Note 5(1)2 for significant judgement on applying accounting policies on offsetting of financial instruments, and Note 6(16) for details of offsetting of financial instruments. As of December 31, 2020, the financial instruments that were offset amounted to NT$1,259,254,404 thousand.

The Group has entered into financial assets and financial liabilities offsetting agreements, which are in compliance with IAS 32, 'Financial instruments: Presentation', whereby financial assets and liabilities are offset and reported in the net amount since the Group has a legally enforceable right to offset the recognized amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

As the determination of whether the Group meets the criteria for offsetting prescribed in IAS 32, 'Financial instruments: Presentation' is subject to management's judgment, and the Group has entered into various individually significant financial assets and financial liabilities offsetting agreements, which would have material effect on the financial statements should the financial assets and financial liabilities be presented separately, we considered offsetting of financial assets and liabilities a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

A. Assessed and tested internal controls over financial assets and financial liabilities offsetting agreements with financial institutions, including control processes in determining whether such agreements meet the criteria under IAS 32, 'Financial instruments: Presentation', and ascertained whether the offsetting made in the financial statements was properly approved and accounted for in compliance with the guidance in IAS 32.
B. Obtained and reviewed the terms of the above agreements and confirmed whether the criteria under IAS 32, 'Financial instruments: Presentation' were met and the accounting treatment was prescribed in the guidance.
C. Confirmed the existence and the rights and obligations of financial assets and financial liabilities offsetting agreements with respective financial institutions.

Impairment assessment on goodwill arising from acquisition of Belkin International Inc. ("Belkin").

Description

Refer to the Note 4(20) for accounting policy on impairment assessment of goodwill, Note 5(2)2 for the accounting policy on impairment of non-financial assets, critical accounting estimates and assumptions of impairment assessment and Note 6(13) for the details of impairment loss.

As of December 31, 2020, the Group had goodwill arising from acquisition of 100% equity interest in Belkin for NT$13,563,157 thousand.

Impairment assessment was performed based on the value in use calculation using the discounted cash flow model to determine the recoverable amounts of the cash-generating unit ("CGU"). Significant judgment and estimates about the key assumptions including revenue growth rate, long-term growth rate and discount rate applied to future cash flow forecast are required and will influence the collectible amount and the impairment of goodwill significantly due to the significant judgments and inherent uncertainty. Therefore, we considered the impairment assessment on goodwill arising from acquisition of Belkin International Inc. and its subsidiaries a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

A. Tested the underlying calculations used in the valuation mode.

B. Involved valuation specialists to assess the reasonableness of the key assumptions, including expected growth rate and discount rate used as follows:

   (a) Evaluated the assumptions used, mainly revenue growth rate and long-term growth rate within the impairment assessment by comparing them to historical results, economic and industry forecast;

   (b) Benchmarked the discount rate range which is used in determining the recoverable amount against certain market data and industry research; and

   (c) Performed sensitivity analysis over key assumptions in the model in order to assess the potential impact of a range of possible outcomes.

Impairment assessment of operating assets of Asia Pacific Telecom Co., Ltd. and its subsidiaries

Description

Refer to Notes 4(16) and (19) for accounting policies applied to property, plant and equipment and intangible assets. Note 4(20) for accounting policies on impairment assessment of non-financial assets.

Note 5(2)1 for critical accounting estimate and key sources of assumption uncertainty applied to property, plant and equipment, intangible assets and other operating assets, Notes 6(9), (13) and (14) for details of account items.

The subsidiaries' operating assets represent a significant percentage of the Group's total assets, and the valuation of these assets is affected by the overall industry development and the Group's operations. The Group used the value in use to estimate the recoverable amount which involves management's judgements, such as the estimation of future cash flow and determination of discount rate, etc. Management's judgment mentioned above involve future years' forecast which are highly uncertain and have a material impact to the estimation of value in use. Therefore, we identified the impairment assessment of operating assets as a key audit matter.

How our audit addressed the matter

We performed the following key audit procedures in respect of the above key audit matter:

A. We assessed the expected future cash flows prepared by management and its decision process, compared and assessed the consistency of the expected future cash flows with operation plans.

B. We also obtained and assessed the information provided by the Group and the valuation report prepared by external professional valuers engaged by the Group.

   (a) Compared the parameters used in predicting future cash flows with historical experience, economic and industrial forecasts.

   (b) Compared the parameters used in determining discount rate with the assumptions on capital cost of cash generating units, and with returns rate on similar assets.

   (c) Verified the valuation model calculation.

   (d) Assessed the future cash flow sensitivity analysis prepared by management based on the alternative hypothesis using different discount rates, and confirmed whether management has appropriately considered the possible impact on the estimation uncertainty of impairment assessment.

Other matter – Reference to audits of other independent auditors

We did not audit the financial statements of certain consolidated subsidiaries. Those financial statements were audited by other independent accountants, whose reports thereon have been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts included in the consolidated financial statements relative to these consolidated subsidiaries was based solely on the reports of other independent auditors. Total assets of these consolidated subsidiaries amounted to NT$151,573,867 thousand and NT$208,374,823 thousand, constituting 4.13% and 6.27% of the consolidated total assets

as of December 31, 2020 and 2019, respectively, and total operating revenues amounted to NT$232,746,063 thousand and NT$458,130,373 thousand, constituting 4.34% and 8.57% of the consolidated total operating revenues for the years then ended, respectively.

Other matter – Parent company only financial reports

We have audited and expressed an unqualified opinion on the parent company only financial statements of Hon Hai Precision Industry Co., Ltd. as at and for the years ended December 31, 2020 and 2019.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing the Group's financial reporting process.

Auditors' responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the generally accepted auditing standards in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected

to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the generally accepted auditing standards in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

A. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.

B. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal controls.

C. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

D. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause the Group to cease to continue as a going concern.

E. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

F. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in

internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Annual improvements to IFRS Standards 2018–2020	January 1, 2022

The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Unless otherwise stated, the principal accounting policies applied in the preparation of these consolidated financial statements set out below have been consistently applied to all the periods presented.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers", International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the "IFRSs").

(2) Basis of preparation

A. Except for the following items, these consolidated financial statements have been prepared under the historical cost convention:

(a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

(b) Financial assets at fair value through other comprehensive income.

(c) Defined benefit liabilities recognized based on the net amount of pension fund assets less present value of defined benefit obligation.

B. The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

(a) All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.

(b) Inter-company transactions, balances and unrealized gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.

(c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

(d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity.

(e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognized in profit or loss. All amounts previously recognized in other comprehensive income in relation to the subsidiary

should be reclassified from equity to profit or loss.

(a) The Group acquired 100% equity interest in Mingyang Realty Development (Kunshan) Co., Ltd. and Tuozhan Property Development Co., Ltd. on April 12, 2019 and May 9, 2019, respectively and were included in the consolidated financial statements since the acquisition date.

(b) The Group acquired 100% equity interest in Shandong Chengshang Energy Co., Ltd. in the second quarter 2020 and was included in the consolidated financial statements since the acquisition date.

(c) The Company's subsidiary, HongFuJin Precision Electronics (ZhengZhou) Co., Ltd., merged with a 100% subsidiary, Zhengzhou Fulianwang Electronic Technology Co., Ltd., due to reorganization in the second quarter of 2020. HongFuJin Precision Electronics (ZhengZhou) Co., Ltd. was the surviving company.

(d) The Group established Foxtron Vehicle Technologies Co., Ltd. with Hua-Chuang Automobile Information Technical Center Co., Ltd. (the "Hua-Chuang") on November 6, 2020. Hua-Chuang contributed assets with value of $7,542,000 as capital, while the Group contributed cash of $7,850,321 as capital and owned 51% equity interest. It was included in the consolidated financial statements since the setup date.

(e) The Group acquired the new shares issued by Asia Pacific Telecom Co., Ltd. (the "Asia Pacific") in the amount of $10,000,000 on November 21, 2019. After the acquisition, the Group owned 40.74% equity interest in Asia Pacific which represented the majority of the voting right of its shareholders and has control over the main activities of Asia Pacific. Accordingly, it was included in the consolidated financial statements since the control date.

(4) Foreign currency translation

A. The consolidated financial statements are presented in New Taiwan Dollars, which is the Company's functional and the Group's presentation currency.

B. Foreign currency transactions and balances

(a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.

(b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognized in profit or loss.

(c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

(d) All foreign exchange gains and losses are presented in the statement of comprehensive income within "other gains and losses".

C. Translation of foreign operations

(a) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;

ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and

iii. All resulting exchange differences are recognized in other comprehensive income.

(b) When the foreign operation of an associate is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Group still retains partial interest in the former foreign associate after losing significant influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in these foreign operations.

(c) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(d) Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing exchange rates at the balance sheet date.

(5) Classification of current and non-current items

A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:

(a) Assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle;

(b) Assets held mainly for trading purposes;

(c) Assets that are expected to be realized within twelve months from the balance sheet date;

(d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than twelve months after the balance sheet date.

B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:

(a) Liabilities that are expected to be settled within the normal operating cycle;

(b) Liabilities arising mainly from trading activities;

(c) Liabilities that are to be settled within twelve months from the balance sheet date;

(d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its

classification.

(6) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income.

B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognized and derecognized using trade date accounting.

C. At initial recognition, the Group measures the financial assets at fair value and recognizes the transaction costs in profit or loss. The Group subsequently measures the financial assets at fair value, and recognizes the gain or loss in profit or loss.

D. The Group recognizes the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(8) Financial assets at fair value through other comprehensive income

A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognize changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:

(a) The objective of the Group's business model is achieved both by collecting contractual cash flows and selling financial assets; and

(b) The assets' contractual cash flows represent solely payments of principal and interest.

B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognized and derecognized using trade date accounting.

C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value:

(a) The changes in fair value of equity investments that were recognized in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognized as dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(b) Except for the recognition of impairment loss, interest income and gain or loss on foreign exchange which are recognized in profit or loss, the changes in fair value of debt instruments are taken through other comprehensive income. When the financial asset is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified

from equity to profit or loss.

(9) Financial assets at amortised cost

A. Financial assets at amortised cost are those that meet all of the following criteria:
   (a) The objective of the Group's business model is achieved by collecting contractual cash flows.
   (b) The assets' contractual cash flows represent solely payments of principal and interest.

B. On a regular way purchase or sale basis, financial assets at amortised cost are recognized and derecognized using trade date accounting.

C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognized in profit or loss when the asset is derecognized or impaired.

D. The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(10) Accounts and notes receivable

A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.

B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

C. The Group's operating pattern of accounts receivable that are expected to be factored is for the purpose of selling, and the accounts receivable are subsequently measured at fair value, with any changes in fair value recognized in other comprehensive income.

(11) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income and financial assets at amortised cost including accounts receivable, at each reporting date, the Group recognizes the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognizes the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognizes the impairment provision for lifetime ECLs.

(12) Derecognition of financial assets

The Group derecognizes a financial asset when one of the following conditions is met:

A. The contractual rights to receive the cash flows from the financial asset expire.

B. The contractual rights to receive cash flows of the financial asset have been transferred and the Group has transferred substantially all risks and rewards of ownership of the financial asset.

C. The contractual rights to receive cash flows of the financial asset have been transferred; and the Group has not retained control of the financial asset.

(13) Leasing arrangement (lessor) – Lease receivable / Operating lease

A. Based on the terms of a lease contract, a lease is classified as a finance lease if the lessee assumes substantially all the risks and rewards incidental to ownership of the leased asset.

(a) At commencement of the lease term, the lessor should record a finance lease in the balance sheet as 'lease receivables' at an amount equal to the net investment in the lease (including initial direct costs). The difference between gross lease receivable and the present value of the receivable is recognized as 'unearned finance income of finance lease'.

(b) The lessor should allocate finance income over the lease term based on a systematic and rational basis reflecting a constant periodic rate of return on the lessor's net investment in the finance lease.

(c) Lease payments (excluding costs for services) during the lease term are applied against the gross investment in the lease to reduce both the principal and the unearned finance income.

B. Lease income from an operating lease (net of any incentives given to the lessee) is recognized in profit or loss on a straight-line basis over the lease term.

(14) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average cost method. The cost of finished goods and work in process comprises raw materials, direct labour, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expense.

(15) Investments accounted for under the equity method / associates

A. Associates are all entities over which the Group has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognized at cost.

B. The Group's share of its associates' post-acquisition profits or losses is recognized in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognized in other comprehensive income. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognize further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

C. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Group's ownership percentage of the associate, the Group recognizes change in ownership interests in the associate in 'capital surplus' in proportion to its ownership.

D. Unrealised gains on transactions between the Group and its associates are eliminated to the

extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Group.

E. In the case that an associate issues new shares and the Group does not subscribe or acquire new shares proportionately, which results in a change in the Group's ownership percentage of the associate but maintains significant influence on the associate, then 'capital surplus' and 'investments accounted for under the equity method' shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Group's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.

F. Upon loss of significant influence over an associate, the Group remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognized in profit or loss.

G. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. If it retains significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.

H. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognized as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, the amounts previously recognized as capital surplus in relation to the associate are transferred to profit or loss proportionately.

(16) Property, plant and equipment

A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.

B. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

C. While land is not depreciated, other property, plant and equipment that apply cost model are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each component of property, plant and equipment that is significant in relation to the total cost

of the item is depreciated separately.

D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change.

The estimated useful lives of property, plant and equipment are as follows:

Buildings	5 ~ 51 years
(Auxiliary buildings	6 ~ 11 years)
Machinery and equipment	3 ～ 9 years
Computer and communication equipment	3 ～ 25 years
Other equipment	1 ～ 25 years

(17) Leasing arrangements (lessee)－right-of-use assets/ lease liabilities

A. Leases are recognized as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Group. For short-term leases or leases of low-value assets, lease payments are recognized as an expense on a straight-line basis over the lease term.

B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are comprised of the following:

(a) Fixed payments, less any lease incentives receivable;

(b) Variable lease payments that depend on an index or a rate;

(c) Amounts expected to be payable by the lessee under residual value guarantees;

(d) The exercise price of a purchase option, if the lessee is reasonably certain to exercise that option; and

(e) Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The Group subsequently measures the lease liability at amortised cost using the interest method and recognizes interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognized as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

C. At the commencement date, the right-of-use asset is stated at cost comprising the following:

(a) The amount of the initial measurement of lease liability;

(b) Any lease payments made at or before the commencement date;

(c) Any initial direct costs incurred by the lessee; and

(d) An estimate of costs to be incurred by the lessee in dismantling and removing the underlying

asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term. When the lease liability is remeasured, the amount of remeasurement is recognized as an adjustment to the right-of-use asset.

D. For lease modifications that decrease the scope of the lease, the lessee shall decrease the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize the difference between remeasured lease liability in profit or loss.

(18) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Investment property is depreciated on a straight-line basis over its estimated useful life of 6 to 51 years.

(19) Intangible assets

A. Trademark right is stated at cost and regarded as having an indefinite useful life as it was assessed to generate continuous net cash inflow in the foreseeable future. Trademark right is not amortised, but is tested annually for impairment.

B. Goodwill is generated by adopting the acquisition method when merger and acquisition occurs.

C. Patent is amortised on a straight-line basis over its estimated useful life of 2 to 20 years.

D. Customer relationship and developed technologies are amortised on a straight-line basis over its estimated life of 12 years and 2 to 7 years, respectively.

E. Concession obtained individually is stated initially at its costs and is amortised on a straight-line basis over its useful life as follows:

(a) The concession of the mobile broadband spectrum (4G) 700MHz frequency group started form December 2014 and is amortised until 2030. The useful life of the concession is 16 years.

(b) The concession of the mobile broadband spectrum (4G) 2600MHz frequency group started form October 2017 and is amortised until 2033. The useful life of the concession is 16 years.

(c) The Group obtained the concession of the mobile broadband spectrum (4G) 700MHz frequency group in December 2015 and is amortised until 2030. The useful life of the concession is 15 years.

(d) The Group obtained the concession of the mobile broadband spectrum (4G) 900MHz frequency group in December 2015 and is amortised until 2030. The useful life of the concession is 15 years.

F. Internally generated intangible assets—research and development expenditures

(a) Research expenditures are recognized as an expense as incurred.

(b) Development expenditures that do not meet the following criteria are recognized as expenses as incurred, but are recognized as intangible assets when the following criteria are met:

i. It is technically feasible to complete the intangible asset so that it will be available for use or sale;
ii. An entity intends to complete the intangible asset and use or sell it;
iii. An entity has the ability to use or sell the intangible asset;
iv. It can be demonstrated how the intangible asset will generate probable future economic benefits;
v. Adequate technical, financial and other resources to complete the development and to use or sell the intangible asset are available; and
vi. The expenditure attributable to the intangible asset during its development can be reliably measured.

(20) Impairment of non-financial assets

A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior periods no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognized.

B. The recoverable amount of goodwill shall be evaluated periodically. An impairment is recognized when recoverable amount is lower than carrying amount. Impairment loss should not be reversed in the future.

C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(21) Borrowings

Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognized initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in profit or loss over the period of the borrowings using the effective interest method.

(22) Notes and accounts payable

A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.

B. The short-term notes and accounts payable without bearing interest are subsequently measured

at initial invoice amount as the effect of discounting is immaterial.

(23) Financial liabilities at fair value through profit or loss

A. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorised as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss at initial recognition:
   (a) Hybrid (combined) contracts; or
   (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or
   (c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.

B. At initial recognition, the Group measures the financial liabilities at fair value. All related transaction costs are recognized in profit or loss. The Group subsequently measures these financial liabilities at fair value with any gain or loss recognized in profit or loss.

C. If the credit risk results in fair value changes in financial liabilities designated as at fair value through profit or loss, they are recognized in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognizing in profit or loss for loan commitments or financial guarantee contracts.

(24) Bonds payable

Ordinary corporate bonds issued by the Group are initially recognized at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from bonds payable, which is amortised to profit or loss over the period of bond circulation using the effective interest method as an adjustment to 'finance costs'.

(25) Convertible bonds payable

Convertible bonds issued by the Group contain conversion options (that is, the bondholders have the right to convert the bonds into the Group's common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Group classifies the bonds payable upon issuance as a financial asset, a financial liability or an equity instrument in accordance with the contract terms. They are accounted for as follows:

(a) The embedded call options and put options are recognized initially at net fair value as 'financial assets or financial liabilities at fair value through profit or loss'. They are subsequently remeasured and stated at fair value on each balance sheet date; the gain or loss is recognized as 'gain or loss on valuation of financial assets or financial liabilities at fair value through profit or loss'.

(b) The host contracts of bonds or are initially recognized at fair value. Any difference between the initial recognition and the redemption value is accounted for as the premium or discount on bonds payable and subsequently is amortised in profit or loss as an adjustment to 'finance costs' over the period of circulation using the effective interest method.

(c) The embedded conversion options which meet the definition of an equity instrument are initially recognized in 'capital surplus—share options' at the residual amount of total issue price less the amount of financial assets or financial liabilities at fair value through profit or loss and bonds payable as stated above. Conversion options are not subsequently remeasured.

(d) Any transaction costs directly attributable to the issuance are allocated to each liability or equity component in proportion to the initial carrying amount of each abovementioned item.

(e) When bondholders exercise conversion options, the liability component of the bonds shall be remeasured on the conversion date. The issuance cost of converted common shares is the total book value of the abovementioned liability component and 'capital surplus—share options'.

(26) Derecognition of financial liabilities

A financial liability is derecognized when the obligation specified in the contract is either discharged or cancelled or expires.

(27) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(28) Non-hedging and embedded derivatives

A. Non-hedging derivatives are initially recognized at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognized in profit or loss.

B. Under the financial assets, the hybrid contracts embedded with derivatives are initially recognized as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and financial assets at amortised cost based on the contract terms.

C. Under the non-financial assets, whether the hybrid contracts embedded with derivatives are accounted for separately at initial recognition is based on whether the economic characteristics and risks of an embedded derivative are closely related in the host contract. When they are closely related, the entire hybrid instrument is accounted for by its nature in accordance with the applicable standard. When they are not closely related, the derivative is accounted for differently from the host contract as derivative while the host contract is accounted for by its nature in accordance with the applicable standard. Alternatively, the entire hybrid instrument is designated as financial liabilities at fair value through profit or loss upon initial recognition.

(29) Provisions

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market

assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognized as interest expense. Provisions are not recognized for future operating losses.

(30) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognized as pension expense when they are due on an accrual basis. Prepaid contributions are recognized as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Group uses interest rates of government bonds (at the balance sheet date) instead.

ii. Remeasurements arising on defined benefit plans are recognized in other comprehensive income in the period in which they arise and are recorded as retained earnings.

iii. Past service costs are recognized immediately in profit or loss.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognized as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is paid by shares, the Group calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(31) Employee share-based payment

A. For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognized

as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognized is based on the number of equity instruments that eventually vest.

B. Restricted stocks:

(a) Restricted stocks issued to employees are measured at the fair value of the equity instruments granted at the grant date, and are recognized as compensation cost over the vesting period.

(b) For restricted stocks where those stocks do not restrict distribution of dividends to employees and employees are not required to return the dividends received if they resign during the vesting period, the Group recognizes the fair value of the dividends received by the employees who are expected to resign during the vesting period as compensation cost at the date of dividends declared.

(c) For restricted stocks where employees have to pay to acquire those stocks, if employees resign during the vesting period, they must return the stocks to the Group and the Group must refund their payments on the stocks, the Group recognizes the payments from the employees who are expected to resign during the vesting period as liabilities at the grant date, and recognizes the payments from the employees who are expected to be eventually vested with the stocks in 'capital surplus – others'.

(32) Income tax

A. The tax expense for the period comprises current and deferred tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.

B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.

C. Deferred income tax is recognized, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or

loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

D. Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred income tax assets are reassessed.

E. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.

F. A deferred tax asset shall be recognized for the carryforward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

(33) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(34) Revenue recognition

A. The Group manufactures and sells consumer electronics products. Sales are recognized when control of the products has transferred, being when the products are delivered to the customers, the customers has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customers, and either the customers has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.

B. The Group renders telecommunication service. Service revenue is measured by the fair value of the consideration received or receivable taking into account business tax and rebates for the sale of goods to external customers in the ordinary course of the Group's activities. The main methods of revenue recognition are as follows:

(a) The communication charges of fixed network and mobile services, as well as the connection charges among telecom operators, are recognized on the basis of the contract terms, which are calculated by predetermined rates and the actual usage volume.

(b) Fixed monthly service fees are recognized monthly.

(c) Prepaid card revenue is recognized on the basis of the actual usage volume by the customers.

C. The Group recognizes an asset (shown as 'other non-current assets') the incremental costs (mainly comprised of sales commissions) of obtaining a telecommunication contract if the Group expects to recover those costs. The recognized asset is amortised and consistent with the transfers to the customer of the goods or services to which the asset relates. The Group recognizes an impairment loss to the extent that the carrying amount of the asset exceeds the remaining amount of consideration that the Group expects to receive less the costs that have not been recognized as expenses.

D. Sales revenue is recognized based on the price specified in the contract, net of the estimated sales discounts and allowances. Revenue is only recognized to the extent that it is highly probable that a significant reversal will not occur. The estimation is subject to an assessment at each reporting date. The contract cost does not include a significant financing component as the sales are made with credit term consistent with market practice.

E. A receivable is recognized when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

F. The Group's obligation to provide a refund for faulty products under the standard warranty terms is recognized as a provision.

G. The customer pays at the time specified in the payment schedule. If the products sold exceed the payment, a contract asset is recognized. If the payments exceed the products sold, a contract liability is recognized.

(35) Government grants

Government grants are recognized in profit or loss on a systematic basis over the periods in which the Group recognizes expenses for the related costs for which the grants are intended to compensate. Government grants related to property, plant and equipment are recognized as non-current liabilities and are amortised to profit or loss over the estimated useful lives of the related assets using the straight-line method.

(36) Business combinations

A. The Group uses the acquisition method to account for business combinations. The consideration transferred for an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the acquisition date, plus the fair value of any assets and liabilities resulting from a contingent consideration arrangement. All acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the

acquisition date. For each business combination, the Group measures at the acquisition date components of non-controlling interests in the acquiree that are present ownership interests and entitle their holders to the proportionate share of the entity's net assets in the event of liquidation at either fair value or the present ownership instruments' proportionate share in the recognized amounts of the acquiree's identifiable net assets. All other non-controlling interests should be measured at the acquisition-date fair value.

B. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of any previous equity interest in the acquiree over the fair value of the identifiable assets acquired and the liabilities assumed is recorded as goodwill at the acquisition date. If the total of consideration transferred, non-controlling interest in the acquiree recognized and the fair value of previously held equity interest in the acquiree is less than the fair value of the identifiable assets acquired and the liabilities assumed, the difference is recognized directly in profit or loss on the acquisition date.

(37) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments.

5. CRITICAL ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS ON UNCERTAINTY

The preparation of these consolidated financial statements requires management to make critical judgments in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. The above information is addressed below:

(1) Critical judgments in applying the Group's accounting policies

A. Revenue recognition

The Group determines whether the nature of its performance obligation is to provide the specified goods or services itself (i.e. the Group is a principal) or to arrange for the other party to provide those goods or services (i.e. the Group is an agent) based on the transaction model and its economic substance. The Group is a principal if it controls a promised good or service before it transfers the good or service to a customer. The Group recognizes revenue at gross amount of consideration to which it expects to be entitled in exchange for those goods or services transferred. The Group is an agent if its performance obligation is to arrange for the provision of goods or services by another party. The Group recognizes revenue at the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the other party to provide its goods or services.

Indicators that the Group controls the good or service before it is provided to a customer include the following:

(a) The Group is primarily responsible for the provision of goods or services;

(b) The Group assumes the inventory risk before transferring the specified goods or services to the customer or after transferring control of the goods or services to the customer.

(c) The Group has discretion in establishing prices for the goods or services.

B. Offsetting financial instruments

The Company's financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(2) Critical accounting estimates and assumptions

The Group makes estimates and assumptions based on the expectation of future events that are believed to be reasonable under the circumstances at the end of the reporting period. The resulting accounting estimates might be different from the actual results. The estimates and assumptions that may significantly adjust the carrying amounts of assets and liabilities within the next financial year are addressed below:

A. Impairment assessment of tangible and intangible assets (excluding goodwill)

The Group assesses impairment based on its subjective judgement and determines the separate cash flows of a specific group of assets, useful lives of assets and the future possible income and expenses arising from the assets depending on how assets are utilized and industrial characteristics. Any changes of economic circumstances or estimates due to the change of Group strategy might cause adjustments on impairment of assets.

B. Impairment assessment of goodwill

The Group assesses impairment of goodwill based on subjective judgment which includes identifying and allocating assets, liabilities and goodwill to related cash-generating unit to determine recoverable amount of this unit. Details of impairment assessment of goodwill is provided in Note 6(13).

As of December 31, 2020, the Group recognized goodwill after impairment assessment of $14,916,895.

C. Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Group must determine the net realisable value of inventories on balance sheet date based on judgments and estimates. Due to the rapid technology innovation, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be significant changes to the evaluation.

As of December 31, 2020, the carrying amount of inventories was $582,113,735.

6. DETAILS OF SIGNIFICANT ACCOUNTS

(1) Cash and cash equivalents

	December 31, 2020	December 31, 2019
Cash on hand and revolving funds	$ 146,814	$ 216,905
Checking accounts and demand deposits	1,008,741,819	649,335,476
Cash equivalents - Time deposits	215,392,563	208,182,131
Cash equivalents - Repo bonds	8,512,819	129,850
	$ 1,232,794,015	$ 857,864,362

A. The Group transacts with a variety of financial institutions with high credit quality for the purpose of dispersing credit risk, so it expects that the probability of counterparty default is low.

B. The Group's time deposits pledged to others as collateral and with maturity of over three months had been transferred to "Financial assets at amortised cost". Please refer to Note 6(4) for details.

(a) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk.

(b) Forward foreign exchange contracts

The Group enters into foreign exchange forward transactions to hedge the following risk of exchange rate:

A. Operating activities: Import of raw materials and export sales

B. Investing activities: Import of machinery and equipment

C. Financing activities: Long-term and short-term foreign currency assets and liabilities

(c) Financial products

All of the structured products the Group entered into an agreement with financial institutions pertain to hybrid financial products which are principal guaranteed products in combination with embedded derivative financial products.

(d) Convertible bonds payable

The Company's indirect subsidiary, PCE Paragon Solutions Kft., acquired convertible bonds issued by Nanthealth, Inc. in the amount of US$30 million. The convertible bonds are embedded derivatives. Based on the contract, PCE Paragon Solutions Kft. has the right to require conversion after issue date and until maturity date if the written consent is submitted in advance. If there are remaining convertible bonds at maturity, such convertible bonds will be redeemed in the form of cash.

D. Details of the Group's investment in equity instruments and beneficiary certificates are provided in Table 3.

A. Impairment assessment for goodwill of Belkin International Inc.

The Group acquired Belkin International Inc. (referred herein as "Belkin") which generated goodwill of $13,563,157. Impairment assessment of goodwill is allocated to the Belkin's CGU. The recoverable amount of the CGU relating to the goodwill arising from acquisition of Belkin was determined based on value-in-use calculation. The calculation uses projected cash flows based on financial budgets for the next five-year period.

Management determined budgeted gross margin based on past performance and their expectations of market development. The weighted average growth rates used are consistent with the projection included in industry reports. Cash flows beyond the five-year period are extrapolated using the estimated growth rates. As of December 31, 2020, pre tax discount rate is 16.5%.

Based on previous assessment, there is no impairment loss on goodwill as of December 31, 2020.

B. The details of amortization are as follows:

	Years ended December 31,	
	2020	2019
Operating costs	$ 2,302,573	$ 1,672,408

Others	6,073,563	6,502,388
	$ 15,734,671	$ 15,835,299

A. Refundable deposits mainly pertain to deposits for the lease of office buildings and data centers as well as bid bond for 1800MHz, 3.5GHz and 28GHz spectrum. The Company participated in the National Communications Commission's mobile broadband auction of 2019 for the bidding of 1800MHz, 3.5GHz and 28GHz spectrum, and paid the bid bond amounting to $1,000,000 in September 2019 which was refunded later in March 2020.

B. Utility duct access

A subsidiary of the Company, Asia Pacific Telecom Co., Ltd. ("Asia Pacific"), entered into a use of assets contract with Taiwan Railways Administration ("TRA") in January 2001. According to the contract, TRA provides the right to use 50% of the capacity of optical fiber duct (30 cm width), which was along the same path on both of the rails for 25 years since the Ministry of Transportation and Communication issued the 3G license. Under the contract, Asia Pacific should pay $8,425,569 as compensation for the 25-year use right to TRA, and both parties agreed that TRA can use the compensation of $8,000,000 as capital to invest in Asia Pacific. Under the

contract, Asia Pacific should pay $100,000 per year to TRA for 25 years as compensation of the use right, and TRA will no longer allow other telecom companies to use the optical fiber ducts; if any, Asia Pacific can deduct the payment based on the percentage that the other telecom companies used.

C. Incremental costs of obtaining a contract

A subsidiary of the Company, Asia Pacific Telecom Co., Ltd., recognizes the incremental costs (mainly comprised of sales commissions) of obtaining a contract with a customer as an asset if the Group expects to recover those costs. The recognized asset is amortised on a systematic basis that is consistent with the transfers to the customer of the goods or services to which the asset relates. The Group recognized amortised costs of $1,858,896 and $192,403 in profit or loss for the years ended December 31, 2020 and 2019.

A. First overseas convertible bond issue of 2017

(a) The Company issued the first overseas unsecured convertible bonds totaling USD 500 million with the approval of the competent authority on August 22, 2017. The bonds carry zero coupon rate over five years. The circulation period is from November 6, 2017 to November 6, 2022.

(b) The conversion price is adjusted in line with the model specified in the conversion rules. As of December 31, 2020, there has not been any converted common stock at the conversion price of NT$157.135 (using the exchange rate of 1 USD: 30.192 TWD) which was adjusted by the Company on July 31, 2020 based on the conversion rules of the first overseas convertible bond issue of 2017.

(c) In accordance with the conversion rules, if the convertible bond is purchased (including purchased from the secondary market), early redeemed, or repaid at maturity by the Company, or if the convertible bond is converted into common stocks or redeemed by the bondholder, the bond is to be retired and will not be reissued.

(d) In accordance with the conversion rules, the rights and obligations of common stocks converted are the same as the outstanding ones previously subscribed.

(e) The conversion options for the first overseas convertible bond issue of 2017 are separated from the liabilities and recorded as 'capital surplus – share options' amounting to $1,099,253.

(f) In accordance with the conversion rules, bondholders have the right to request the Company to redeem any bonds at the price of the bonds' par value upon three years from the issue date. On November 6, 2020, bondholders requested to redeem bonds totaling $1,817,558 (USD 60,200 thousand).

B. First unsecured convertible bond issue of 2018

(a) ShunSin Technology Holdings Limited, a subsidiary of the Company, issued the first unsecured convertible bonds totaling $1,500 million with the approval of the competent authority on January 10, 2018. The bonds carry zero coupon rate over five years. The

circulation period is from February 12, 2018 to February 12, 2023.

(b) The conversion price is NT$171.3 after adjusting in line with the model specified in the conversion rules.

(c) As the bondholders have the right to request the Company to redeem the bond at the price of the bond's par value after three years from the bonds' issue date (February 12, 2021 is the selling base day of the bondholders), the subsidiary, ShunSin Technology Holdings Limited, needs to redeem the bonds at par value, therefore the corporate bonds payable and the financial assets and liabilities at fair value through profit or loss-non-current were reclassified into other current liabilities. Nevertheless, the bonds payable is not required to be fully paid off within one year.

(d) In accordance with the conversion rules, bondholders have the right to request the Company to redeem the bonds at the price of the bonds' par value after three years from the bonds' issue date. On February 12, 2021, no bondholder has requested to redeem the bonds.

(e) The conversion options of the bonds were separated from liabilities and recognized respectively as equity and liabilities at its issuance as follows:

Convertible bonds' present value at compound interest	$	1,357,350
Embedded derivatives (i.e. put options and redemption rights)		13,650
Components of equity at issuance		129,000
	$	1,500,000

(f) The details of financial asset (liabilities) at fair value through profit or loss are as follows.

	December 31, 2020	December 31, 2019
Embedded derivatives (i.e. put options and redemption rights)	$ 2,250	($ 22,800)
Valuation gain	300	25,050
	$ 2,550	$ 2,250

C. For details of principal, interest rate, maturity and other information of corporate bonds payable and foreign unsecured corporate bonds, please refer to Table 10.

(21) Pensions

A. Defined benefit plans

(a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by next March.

(b) The amounts recognized in the balance sheet are as follows (shown as "other non-current liabilities"):

	December 31, 2020	December 31, 2019
Present value of defined benefit obligations	$ 1,944,761	$ 1,954,134

(d) The Bank of Taiwan was commissioned to manage the Fund of the Company's defined benefit pension plan in accordance with the Fund's annual investment and utilisation plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilisation of the Labor Retirement Fund" (Article 6: The scope of utilisation for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilisation of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the Regulator. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2020 and 2019 is given in the Annual Labor Retirement Fund Utilisation Report announced by the government.

(e) The principal actuarial assumptions used were as follows:

	2020	2019
Discount rate	0.4%	0.80%
Future salary increases	3.5%	3.50%

Assumptions regarding future mortality experience are set based on actuarial advice in accordance with published statistics and experience in each territory.

Because the main actuarial assumption changed, the present value of defined benefit obligation is affected. The analysis was as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2020				
Effect on present value of defined benefit obligation	($ 59,721)	$ 62,244	$ 55,505	($ 53,680)
December 31, 2019				
Effect on present value of defined benefit obligation	($ 61,696)	$ 64,388	$ 57,843	($ 55,861)

The sensitivity analysis above is based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The method of analysing sensitivity and the method of calculating net pension liability in the balance sheet are the same.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period

(g) Expected contributions to the defined benefit pension plans of the Group for the year ending December 31, 2021 amount to $15,845.

(h) As of December 31, 2020, the weighted average duration of the retirement plan is 13 years

B. Defined contribution plans

(a) Effective July 1, 2005, the Company and its domestic subsidiaries have established a defined contribution pension plan (the "New Plan") under the Labor Pension Act (the "Act"), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company and its domestic subsidiaries contribute monthly an amount based on 6% of the employees' monthly salaries and wages to the employees' individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.

(b) The subsidiaries in mainland China have defined contribution pension plans and contribute an amount monthly based on 8%~9% of employees' monthly salaries and wages to an independent fund administered by a government agency. The plan is administered by the government of mainland China. Other than the monthly contributions, the Group does not have further pension liabilities.

(c) The pension costs under the defined contribution pension plans of the Group for the years ended December 31, 2020 and 2019 were $10,737,739 and $15,145,169, respectively. As a result of the coronavirus pandemic in China in early 2020, the local government reduced by

half the pension insurance for a period of six months from February 2020.

(27) Retained earnings

A. The annual net income of the Company shall be appropriated in accordance with the priorities listed as follows:

(a) Recovering of losses;

(b) Appropriation of 10% for legal reserve.

(c) Appropriation or reversal of special reserve pursuant to applicable law or regulation.

As to the earnings available for appropriation to shareholders including accumulated unappropriated earnings and earnings available for appropriation this year, the board of directors is authorised to draft an appropriation plan in accordance with the dividend policy in Section D of the Articles of Incorporation.

The board of directors is authorised to distribute dividends and bonuses in whole or in part, which may be paid in cash after a resolution has been adopted by a majority vote at a meeting of the board of directors attended by two-thirds of the total number of directors.

The Company is currently at a developing stage. The Company's dividend distribution policy is subject to the Company's current and future investment environment, fund requirements, competition from local and abroad, and capital budgets, as well as taking into consideration the interests of shareholders and the long-term financial planning. Shareholder dividends are set

aside on accumulated unappropriated earnings, which shall not be less than 15% of earnings available for appropriation for the year and cash dividends shall not be less 10% of total dividends.

B. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the balance of the reserve exceeds 25% of the Company's paid-in capital.

C. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.

D. The appropriations of 2020 earnings was proposed during the board meeting on March 30, 2021. The appropriation of 2019 earnings had been resolved at the shareholders' meeting on June 23, 2020. Details are summarized as follows:

Except for Note 6(4), contingencies and commitments are as follows:

(1) Contingencies - Significant legal matter

On March 8, 2019, Microsoft Corporation and Microsoft Licensing, GP sued the Group over the dispute regarding the royalty payment under the patent licensing agreement. The two parties in the case has reached a settlement in August 2020. Accordingly, the Group has properly accrued the settlement value in the financial statements..

(2) Commitments

A. Capital expenditure contracted for at the balance sheet date but not yet incurred is as follows:

	December 31, 2020	December 31, 2019
Property, plant and equipment	$ 6,191,810	$ 3,850,503

B. As of December 31, 2020 and 2019, a subsidiary of the Company, Asia Pacific Telecom Co., Ltd., had outstanding contracts for equipment procurements and base transceiver stations construction totaling $4,248,875 and $1,503,888, respectively, which will be paid in the future or paid by issuing promissory notes and commercial papers.

C. On September 4, 2020, the Company passed the resolution of the Board of Directors to exchange 527,524,409 ordinary shares of Asia Pacific Telecom Co., Ltd. held by the Company in exchange for approximately 81,842,616 ordinary shares issued by Far EasTone Telecommunications Co., Ltd. After the approval by the authority, the share exchange is expected to be completed on June 30, 2022.

D. The Group entered into a business cooperation agreement with FET. The period of the agreement is from September 4, 2020 to December 31, 2040. It is expected that after obtaining approval from the regulatory authority, the Group will cooperate with FET to provide service on 3.5GHz frequency band through Multi-Operator Core Networks (MOCN). The Group will share two-ninths of the network deployment cost of FET's 3.5GHz frequency band of which the cost of spectrum sharing amounted to $9,473,000 in order to obtain two-ninths of use right capacity of the 3.5GHz frequency band. This cooperation agreement was approved with conditions by the National Communications Commission (NCC) Committee, the regulatory authority, on March 3, 2021. The aforementioned cooperation agreement will also need the approval of the Fair Trade Commission before it can be implemented.

E. In order to enhance spectrum efficiency and increase competitiveness with FET, as resolved by the Board of Directors on November 5, 2020, the Group entered into (a) a service on 700MHz through MOCN agreement effective from November 5, 2020 to December 31, 2030 which the Group and FET agreed to share the costs and expenses arising from or related to the agreement in the proportions of two-ninths and seven-ninths, respectively; and (b) a frequency exchange agreement wherein the Group exchanges its 723MHz~728MHz (uplink) and 778MHz~783MHz (downlink) frequency bands with FET's 2595MHz~2615MHz frequency bands and the exchange value is based on mutual agreement. The two aforementioned agreements must be approved by the regulatory authority before they can be implemented. However, if the service on 700MHz through MOCN agreement is approved earlier than the frequency exchange exercise date, the frequency exchange agreement is automatically terminated.

10. SIGNIFICANT DISASTER LOSS

None.

11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE

A. The appropriation of 2020 earnings was approved by the Board of Directors on March 30, 2021. Please refer to Note 6(27).

B. The Company will issue the first overseas convertible unsecured corporate bonds of 2021, as approved by the Board of Directors on March 31, 2021. The total issue amount will not be more than USD700,000 thousand and the circulation period will not be more than five years.

C. The cooperation agreement between the Group and FET for the 3.5GHz frequency band through MOCN was approved with conditions by the NCC Committee, the regulatory authority, on March 3, 2021. For related details, please refer to Note 9(2) Commitments.

12. OTHERS

(1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to operate with the goal to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet less the total intangible assets.

During 2020, the Group's strategy, which was unchanged from 2019, was to maintain the gearing ratio at 70% or below.

(2) Financial instruments

A. Financial instruments by category

Please refer to the consolidated balance sheets and Note 6 for the amounts and details of the financial assets (financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets at amortised cost, accounts receivable (including related parties) and other receivables) and financial liabilities (financial liabilities at fair value through profit or loss, accounts payable (including related parties), other payables, short-term loans, long-term loans and corporate bonds payable).

B. Financial risk management policies

(a) Risk categories:

The Group employs a comprehensive risk management and control system to clearly identify, measure, and control the various kinds of financial risk it faces, including market risk (including foreign exchange risk, interest rate risk and price risk), credit risk, and liquidity risk.

(b) Management objectives:

i. Except for market risk, which is controlled by outside factors, the remainder of the foregoing types of risks can be controlled internally or removed from business processes. Therefore, the goal in managing each of these risks is to reduce them to zero.

ii. As for market risk, the goal is to optimize its overall position through strict analysis, suggestion, execution and audit processes, and proper consideration of a) long-term trends in the external economic/financial environment, b) internal operating conditions, and c) the actual effects of market fluctuations.

iii. The Group's overall risk management policy focuses on the unpredictable item of

financial markets and seeks to reduce the risk that potentially pose adverse effects on the Group's financial position and financial performance.

iv. For the information on the derivative financial instruments that the Group enters into, please refer to Note 6(2).

(c) Management system:

i. Risk management is executed by the Group's finance department by following policies approved by the Board. Through cooperation with the Group's operating units, finance department is responsible for identifying, evaluating and hedging financial risks.

ii. The Board has a written policy covering overall risk management. It also has written policies covering specific issues, such as exchange rate risk, interest rate risk, credit risk, derivative and non-derivative financial instruments used, and the investment of excess working capital.

C. Significant financial risks and degrees of financial risks

(a) Market risk

i. Foreign exchange risk

(i) Nature:

The Group is a multinational group in the Electronics manufacturing services industry. Most of the exchange rate risk from operating activities come from:

a. Foreign exchange risk arises from different exchange rates to functional currency as the invoice dates of accounts receivable and payable denominated in non-functional foreign currency are different. Due to the characteristics of the subcontracting industry, the Company's revenue and expenditures are mostly denominated in foreign currency. Thus, the remaining net foreign exchange risk is not material after offsetting assets and liabilities. Furthermore, although the variations in currencies of the Company's certain foreign investments in emerging countries (i.e. Brazil, Mexico, etc.) are considered huge, the percentage of the investments is not significant and thus the Company's foreign exchange risk can be maintained in the controllable range. (Note: The Group has several sites in various countries and thus is exposed to various foreign exchange risks. The main risk arises from USD and RMB.)

b. Except for the above transactions (operating activities) recognized in the income statement, assets and liabilities recognized in the balance sheet and the net investment in foreign operations also result in the exchange rate risk.

(ii) Management:

a. For such risks, the Group has set up policies requiring companies in the Group to manage its exchange rate risks.

b. As to the exchange rate risk arising from the difference between various functional currencies and the reporting currency in the consolidated financial statements, it is

managed by the Group's finance department.

(iii) The source:

a. U.S. dollar and NT dollar:

Foreign exchange risk arises primarily from U.S. dollar-denominated cash, cash equivalents, accounts receivable and other receivables, other assets, loans, accounts payable and other payables and other liabilities, which results in exchange loss or gain when they are converted into New Taiwan dollars.

b. U.S. dollar and RMB:

Foreign exchange risk arises primarily from U.S. dollar-denominated cash, cash equivalents, accounts receivable and other receivables, other assets, loans, accounts payable and other payables and other liabilities, which results in exchange loss or gain when they are converted into RMB.

c. JPY and U.S. dollar:

Foreign exchange risk arises primarily from yen-denominated loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into U.S. dollar.

d. JPY and NT dollar:

Foreign exchange risk arises primarily from yen-denominated loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into New Taiwan dollars

(iv) Extent

The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

(v) Total exchange gain (loss), including realised and unrealised arising from significant foreign exchange variation on the monetary items held by the Group for the years ended December 31, 2020 and 2019 amounted to ($1,671,581) and ($4,509,384), respectively.

ii. Equity securities

(i) Nature

The Group primarily invests in domestic and foreign publicly traded equity instruments, which are accounted for as financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. The price of those equity instruments will be affected by the uncertainty of the future value of the investment.

(ii) Extent

If such equity instruments' price rise or fall by 1%, with all other factors held constant, the impact on equity due to investments in equity instruments measured at fair value through other comprehensive income, and investments in equity at fair value through profit or loss are $902,620 and $815,515 for the years ended December 31, 2020 and 2019, respectively.

iii. Futures

(i) Nature

The Group is exposed to commodity price risk because of future commodity price fluctuations.

(ii) Extent

The Group sets stop-loss amount to reduce its futures market risk whenever futures contracts are entered into. As a result, there is no significant futures market risk.

iv. Cash flow and fair value interest rate risk

The Group's interest rate risk arises from long-term loans or corporate bonds with floating rates. The Company's long-term corporate bonds with fixed interest rates do not have interest rate risk or fair value interest rate risk.

Long-term loans or corporate bonds with floating rates expose the Group to cash flow interest rate risk, but most of the risks are offset by cash and cash equivalents with variable interest rates.

(b) Credit risk

i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments.

According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The Group assesses the credit quality of the customers by taking into account their financial position, past experience and other factors to conduct its internal risk management.

Individual risk limits are set based on internal or external ratings in accordance with limits set by the board of directors. The utilisation of credit limits is regularly monitored. Major credit risk arises from cash and cash equivalents, derivative financial instruments and other financial instruments. The counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk.

ii. The Group assumes that if the contract payments were past due over 90 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition; if past due over 360 days, a default has occurred.

iii. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:

(i) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;

(ii) Default or delinquency in interest or principal repayments;

(iii) Adverse changes in national or regional economic conditions that are expected to cause a default.

iv. The aging analysis of notes receivable and accounts receivable (including related parties) is as follows:

	December 31, 2020	December 31, 2019
Not past due	$ 932,168,658	$ 1,001,387,391

v. The Group applies the following approaches to assess the expected credit losses (ECLs) of accounts receivable:

(i) Assess the ECLs on an individual basis if a significant default has occurred to certain customers.

(ii) Classify the other customers' accounts receivable based on the Group's credit rating standards and estimates the ECLs using loss rate methodology or provision matrix.

(iii) Adjust the loss rates constructed from historical and recent information by taking into account the business cycle indicators of the National Development Council and forecasts of the Basel Committee on Banking Supervision.

(iv) As of December 31, 2020 and 2019, the individual provision for impairment of accounts receivable using loss rate methodology or provision matrix is as follows:

	Individual	Group 1	Group 2	Group 3	Group 4	Total
December 31, 2020						
Expected loss rate	100%	0.0375%	0.0875%	0.09%~37.55%	0.06%~41.63%

At December 31	$ 8,237,945	$ 6,570,167

(c) Liquidity risk

i. Cash flow forecasting is performed by each operating entity of the Group and aggregated by Group treasury. The Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration the Group's debt financing plans, covenant compliance, compliance with internal balance sheet ratio targets and, if applicable, external regulatory or legal requirements, for example, currency restrictions.

ii. The table below analyses the Group's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groups based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

Non-derivative financial liabilities:

December 31, 2020	Less than 1 year	Between 1 to 2 years	Between 2 to 5 years	Over 5 years	Total
Bonds payable	$ 42,288,000	$ 36,785,978	$ 92,510,640	$ 72,774,000	$ 244,358,618

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in derivative instruments is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's equity investment without active market is included in Level 3.

B. Fair value information of investment property at cost is provided in Note 6(12).

C. Financial instruments not measured at fair value:

(a) Except for those listed in the table below, the carrying amounts of the Group's financial instruments not measured at fair value (including cash and cash equivalents, notes and accounts receivable, other receivables, financial assets at amortised cost (excluding bank debentures), short-term loans, notes and accounts payable, other payables and long-term loans approximate to their fair values.

	December 31, 2020			
		Fair Value		
	Book Value	Level 1	Level 2	Level 3
Financial liabilities:				
Bonds payable	$ 244,358,618	$ -	$ 241,667,699	$ -

	Book Value	Level 1	Level 2	Level 3
Financial liabilities:				
Bonds payable	$ 214,796,800	$ -	$ 210,235,461	$ -

(b) The methods and assumptions of fair value measurement are as follows:

Bonds payable: Regarding the bonds issued by the Group, the coupon rate approximates to the current market rate. Therefore, the fair value is estimated using the present value of the expected cash flows and market interest rate.

D. The related information on financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at December 31, 2020 and 2019 is as follows:

(b)The methods and assumptions the Group used to measure fair value are as follows:

i. The instruments the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	Listed shares	Open-end fund
Market quoted price	Closing price	Net asset value

ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques method can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.

iii. When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.

iv. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate.

v. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.

vi. The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.

E. For the years ended December 31, 2020 and 2019, there was no transfer between Level 1 and Level 2.

F. For the years ended December 31, 2020 and 2019, there was no transfer into or out from Level 3.

G. Investment segment is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value. Investment segment sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments and ensures compliance with the related requirements in IFRS.

H. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

13. SUPPLEMENTARY DISCLOSURES

(1) Significant transactions information

A. Loans to others: Please refer to table 1.

B. Provision of endorsements and guarantees to others: Please refer to table 2.

C. Holding of marketable securities at the end of the period (not including subsidiaries, associates and joint ventures): Please refer to table 3.

D. Acquisition or sale of the same security with the accumulated cost reaching NT$300 million or 20% of paid-in capital or more: Please refer to table 4.

E. Acquisition of real estate reaching NT$300 million or 20% of paid-in capital or more: None.

F. Disposal of real estate reaching NT$300 million or 20% of paid-in capital or more: None.

G. Purchases or sales of goods from or to related parties reaching NT$100 million or 20% of paid-in capital or more: Please refer to table 5.

H. Receivables from related parties reaching NT$100 million or 20% of paid-in capital or more: Please refer to table 6.

I. Trading in derivative instruments undertaken during the reporting periods: Please refer to Note 6(2).

J. Significant inter-company transactions during the reporting periods: Please refer to table 7.

(2) Information on investees

Names, locations and other information of investee companies (not including investees in Mainland China): Please refer to table 8.

(3) Information on investments in Mainland China

A. Basic information: Please refer to table 9.

B. Significant transactions, either directly or indirectly through a third area, with investee companies in the Mainland Area: The Company appointed Foxconn (Far East) Limited's Mainland investee to render processing services and to trade. The transactions were eliminated in the consolidated financial statements. For significant transactions of processing services, trading, receivables and payables, endorsements and guarantees or collaterals provided, and financing, please refer to Note 13(1) A, B, G and H.

(4) Major shareholders

For the names, number and ratio of shares held by shareholders holding over 5% of the Company's shares: Please refer to Table 11.

14. SEGMENT INFORMATION

(1) General information

The Group has adopted eCMMS (E-enabled Components, Modules, Moves & Services) strategy, and provided a one-stop shop to its customers, which are primarily in the 3C industries, with a total solution for design, development, engineering, procurement, manufacturing, logistics and after-sales service. The Group segregates operating segments from both a customer service and product perspective.

In accordance with IFRS No. 8, "Operating Segments", the Group has determined the operating segments and reportable operating segments. Operating segments which have met certain quantitative threshold are disclosed individually or aggregately as reportable operating segments; other segments which have not met the quantitative threshold are included in the 'all other segments'.

The Group has identified the electronic manufacturing integrated services department, which provides global 3C production-related one-stop services, as a reportable operating segment.

(2) Measurement of segment information

The chief operating decision maker assesses performance and allocates resources of the operating segments based on each operating segment's revenue and operating income after adjusting the internal costs and allocated expenses. Except for the recognition of internal costs which shall be in accordance with the Group's related internal calculation basis, the operating segments' accounting policies are the same as disclosed in Note 4.

(3) Segment information

The financial information of reportable segments provided to chief operating decision maker is as follows:

	Years ended December 31,	
	2020	2019
	Electronic Manufacturing Integration Service	Electronic Manufacturing Integration Service
Net external revenue	$ 5,519,321,881	$ 5,114,320,217
Revenue from internal customers	321,786,196	307,961,623
Segment revenue	$ 5,841,108,077	$ 5,422,281,840
Segment profit	$ 139,694,514	$ 151,924,612

(4) Reconciliation for segment income (loss)

Sales between segments are carried out at arm's length. The revenue from external parties reported to the chief operating decision-maker is measured in a manner consistent with that in the income statement.

A reconciliation of reportable segment profit or loss to the profit before tax and discontinued operations for the years ended December 31, 2020 and 2019 is provided as follows:

	Years ended December 31,	
Operating revenue	2020	2019

Note 1: Code of general ledger account is "investments accounted for under equity method".

Note 2: Code of general ledger account is "financial assets at fair value through Other Comprehensive Income". The disposal gain or loss would be reclassified from "Other Comprehensive Income" to "Retained Earnings".

Note 3: Code of general ledger account is "financial assets at amortized cost". The disposal gain and loss is from interest income.

Note 4: Code of general ledger account is "financial assets at fair value through profit or loss". Due to adoption of IFRS, it would be valued at fair value rather than recognised disposal gain or loss.

Note 5: The total amount of the Group's acquisition or sale of the same security is reaching NT$300 million or more.

Note 6: Fill in the columns the counterparty and relationship if securities are accounted for under the equity method; otherwise leaves the columns blank.

Note 7: The counterparty is a subsidiary of the Company.

Hon Hai Precision Industry Co., Ltd. and Subsidiaries

Purchases or sales of goods from or to related parties reaching NT$100 million or 20% of paid-in capital or more

Note 1: The information of transactions between the Company and the consolidated subsidiaries should be noted in “Number” column.

(1) Number 0 represents the Company.

(2) The consolidated subsidiaries are numbered in order from number 1.

Note 2: The transaction relationships with the counterparties are as follows:

(1) The Company to the consolidated subsidiary.

(2) The consolidated subsidiary to the Company.

(3) The consolidated subsidiary to another consolidated subsidiary.

Note 3: The prices and terms to related parties were not significantly different from transactions with third parties, except for particular transactions with no similar transactions to compare with. For these transactions, the prices and terms were determined in accordance with mutual agreements.

Note 4: In calculating the ratio, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenues for income statement accounts.

Note 5: For balance sheet accounts, transactions exceeding 1% of the consolidated total assets should be disclosed; for income statement accounts, transactions exceeding 1% of the consolidated total revenue should be disclosed. All the transactions had been eliminated when preparing consolidated financial statements.

Note 6: Part of above transactions with related parties were based on the financial statements of the company for the same period which were not audited by independent accountants.

Audit Reports of Independent Accountants

Financial Review No. 20004152 (2021)

To Hon Hai Precision Industry Co., Ltd.

Opinion

We have audited the accompanying parent company only balance sheets of Hon Hai Precision Industry Co., Ltd. (hereinafter referred to as 'Hon Hai') as of December 31, 2020 and 2019, and the related parent company only statements of comprehensive income, parent company only statements of changes in equity, parent company only statements of cash flows as of January 1 to December 31, 2020 and 2019, and notes to the parent company only financial statements (including a summary of significant accounting policies).

In our opinion, based on our audit results and the audit reports of other public accountants, the above-mentioned parent company only financial statements present fairly, in all material aspects, the parent company only financial position of Hon Hai as of December 31, 2020 and 2019, and its parent company only financial performance and parent company only cash flows as of January 1 to December 31, 2020 and 2019 in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers."

Basis for Opinion

In 2020, we conducted our audits in accordance with the "Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants," and the generally accepted auditing standards in the Republic of China ("ROC GAAS"). In 2019, we conducted our audits in accordance with the "Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants," "Jin-Guan-Zheng-Shen-Zi Order No. 1090360805 issued by the Financial Supervisory Commission on February 25, 2020" and the generally accepted auditing standards in the Republic of China ("ROC GAAS"). Our responsibility under such standards will be further explained in the section titled "Independent accountant's responsibilities for the audit of the parent company only financial statements." Our staffs subject to the independence requirements are complied with the Codes of Professional Ethics for Certified Public Accountants in the Republic of China (the "Codes"), independent of Hon Hai, and have fulfilled other ethical responsibilities in accordance with the Codes. Based on our audits and the audit reports of other independent accountants, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters refer to those matters that, in our professional judgment, were of most significance in the audit of Hon Hai's 2020 parent company only financial statements. These matters were addressed in the context of our audit of the parent company only financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters of Hon Hai's 2020 parent company only financial statements are as follows:

Cut-off of hub sales revenue

Description

For accounting policies on revenue recognition, please refer to Note 4 (31) in the Parent Company Only Financial Statements.

Hon Hai's revenue from hub sales, among other sales patterns, is recognized when customers pick up goods from the hub (i.e. when control over goods is transferred). For pick-ups from the hub, Hon Hai recognizes sales revenue based on movements of inventories contained in the statements or other information provided by the hub custodians. As the hubs are located around the world with numerous custodians, the frequency and contents of statements provided by custodians vary, and the process of revenue recognition involves numerous manual procedures, these factors may potentially result in inaccurate timing of sales revenue recognition and a discrepancy between physical inventory quantities in the hubs and quantities as reflected in accounting records.

As there are numerous daily sales revenue transactions from hubs and the transaction amounts prior to and after the balance sheet date are significant to the financial statements, the cut-off of hub sales revenue was identified as one of the key audit matter.

How our audit addressed the matter

We performed the following audit procedures:

1. Assessed and tested the appropriateness of internal controls over cut-off of hub sales revenue for a specific time prior to and after the balance sheet date, including agreeing to respective supporting documents provided by hub custodians, and validated the proper timing of recognizing movements of inventories and respective transfer of the cost of goods sold.

2. Confirmed by letter or conducted on-site count of inventory quantities held at hubs and agreed to accounting records.

Allowance for inventory valuation losses

Description

Refer to Note 4(13) for accounting policies on inventory valuation, Note 5(2) for uncertainty of accounting estimates and assumptions in relation to inventory valuation, and Note 6(6) for details of inventories. As of December 31, 2020, Hon Hai's inventories and allowance for inventory valuation losses amounted to NT$84,040,761 thousand and NT$1,715,176 thousand, respectively.

Hon Hai and its subsidiaries are primarily engaged in the manufacture and sales of electronic products. Due to rapid technological innovations, short lifespan of electronic products and fluctuations in market prices, there is a higher risk of inventory losses arising from market value decline or obsolescence. Hon Hai and its subsidiaries measure inventories sold in the ordinary course of business at the lower of cost and net realizable value; the net realizable value for goods aged over a certain period of time or identified individually as obsolete is derived based on the historical experience of dealing with obsolete inventories. The aforementioned allowance for inventory valuation loss mainly comes from goods aged over a certain period of time or identified individually as obsolete or damaged.

As the amounts of inventories are material, the types of inventories vary, and the estimation of net realizable value for individually obsolete or damaged inventories is subject to management's judgment, we consider allowance for inventory valuation losses a key audit matter.

How our audit addressed the matter

We performed the following procedures in relation to the provision for inventory valuation losses for individually obsolete or damaged inventories:

1. Ensured consistent application of accounting policies in relation to allowance for inventory valuation losses and assessed the reasonableness of these policies.

2. Validated the appropriateness of system logic of inventory aging report utilized by management to ensure proper classification of inventories aged over a certain period of time.

3. Evaluated the reasonableness of inventories individually identified as obsolete or damaged with supporting documents and agreed to information obtained from physical inventory.

4. Discussed with management the net realizable value of inventories aged over a certain period of time and individually identified as obsolete or damaged, validated respective supporting documents and re-performed the calculation.

Other matters – Reference to audits of other independent accountants

Investment accounted for under the equity method included in the Parent Company Only Financial Statements of Hon Hai Precision Industry Co., Ltd. was not audited by us, but by other independent accountants. Therefore, among our opinion on the aforementioned Parent Company Only Financial Statements, the stated amounts and other related information disclosed in Note 13 were based on the audit reports of other independent accountants. As of December 31, 2020 and 2019, the investment accounted for under the equity method amounted to NT$36,873,056 thousand and NT$38,854,657 thousand, respectively. Based on the financial statements for 2020 and 2019 audited by other independent accountants, the recognized comprehensive income (comprising share of profit or loss in subsidiaries, associates and joint ventures accounted for under the equity method, and share of other comprehensive income in subsidiaries, associates and joint ventures accounted for under the equity method) amounted to a loss of NT$224,548 thousand and a loss of NT$911,941 thousand, respectively.

Responsibilities of management and those charged with governance for the parent company only financial statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers", and for such internal control as management determines is necessary to enable the preparation of the parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing Hon Hai's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Hon Hai or to cease operation, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing Hon Hai's financial reporting process.

Independent accountant's responsibilities for the audit of the parent company only financial statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ROC GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error. Such misstatements

are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with ROC GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.

2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Hon Hai's internal controls.

3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Hon Hai's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause Hon Hai to cease to continue as a going concern.

5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the notes, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within Hon Hai to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and performance of the audit, and for forming an audit opinion on the parent company only financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine the key audit matters for Hon Hai's 2020 parent company only financial statements. We describe these matters in our report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Significant accounting policies adopted during the preparation of the parent company only financial statements are described as follows: Unless otherwise stated, such policies are consistently applicable to all the periods presented.

(1) Compliance statement

The parent company only financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

(2) Basis of preparation

A. Except for the following items, these parent company only financial statements have been prepared under the historical cost convention:

(a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

(b) Financial assets at fair value through other comprehensive income.

(c) Defined benefit liabilities recognized based on the net amount of pension fund assets less present value of defined benefit obligation.

B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the "IFRSs") requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the parent company only financial statements are disclosed in Note 5.

(3) Foreign currency translation

A. The parent company only financial statements are presented in NTD, which is the Company's functional and presentation currency.

B. Foreign currency transactions and balances

(a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.

(b) Monetary assets and liabilities denominated in foreign currencies at the period end are retranslated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognized in profit or loss in the period in which they arise.

(c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in profit or loss in the period in which they arise. Non-monetary

assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

(d) All foreign exchange gains and losses are presented in the statements of comprehensive income within "other gains and losses".

C. Translation of foreign operations

(a) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;

ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of the period; and

iii. All resulting exchange differences are recognized in other comprehensive income.

(b) When the foreign operation of an associate is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Company still retains partial interest in the former foreign associate after losing significant influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in these foreign operations.

(c) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Company retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(d) Goodwill and fair value adjustments arising from the acquisition of a foreign unit are deemed as assets and liabilities of the foreign unit, which are translated at the exchange rate at the end of the period.

(4) Classification of current and non-current items

A. Assets that meet one of the following criteria are classified as current assets;

(a) Assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle;

(b) Assets held mainly for trading purposes;

(c) Assets that are expected to be realized within 12 months after the balance sheet date; or

(d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than 12 months after the balance sheet date.

Assets that meet none of the above criteria are classified by the Company as non-current assets.

B. Liabilities that meet one of the following criteria are classified as current liabilities.

(a) Liabilities that are expected to be settled within the normal operating cycle;

(b) Liabilities held mainly for trading purposes;

(c) Liabilities that are to be settled within 12 months after the balance sheet date;

(d) Liabilities for which the repayment date cannot be extended unconditionally to more than 12 months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Liabilities that meet none of the above criteria are classified by the Company as non-current liabilities.

(5) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(6) Financial assets at fair value through profit or loss

A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortized cost or fair value through other comprehensive income.

B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognized and derecognized using trade date accounting.

C. At initial recognition, the Company measures the financial assets at fair value and recognizes the transaction costs in profit or loss. The Company subsequently measures the financial assets at fair value, and recognizes the gain or loss in profit or loss.

D. The Company recognizes the dividend income in profit or loss when the right to receive payment is established, future economic benefits associated with the dividend flows to the Company, and the amount of the dividend can be measured reliably.

(7) Financial assets at fair value through other comprehensive income

A. Financial assets at fair value through other comprehensive income comprise equity instruments which are not held for trading, and for which the Company has

made an irrevocable election at initial recognition to recognize changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:

(a) The objective of the Company's business model is achieved both by collecting contractual cash flows and selling financial assets; and

(b) The assets' contractual cash flows represent solely payments of principal and interest on the principal outstanding.

B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognized and derecognized using trade date accounting.

C. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. The Company subsequently measures the financial assets at fair value:

(a) The changes in fair value of equity instruments that were recognized in other comprehensive income. Cumulative gain or loss previously recognized in comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the instrument. The Company recognizes the dividend income in profit or loss when the right to receive payment is established, future economic benefits associated with the dividend flows to the Company, and the amount of the dividend can be measured reliably.

(b) The changes in fair value of debt instruments are recognized in other comprehensive income. Before derecognization, impairment loss, interest income and gain or loss on foreign exchange which are recognized in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss.

(8) Financial assets at amortized cost

A. Financial assets at amortized cost are those that meet all of the following criteria:

(a) The objective of the Company's business model is achieved by collecting contractual cash flows; and

(b) The assets' contractual cash flows represent solely payments of principal and interest on the principal amount outstanding.

B. On a regular way purchase or sale basis, financial assets at amortized cost are recognized and derecognized using trade date accounting.

C. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. Subsequently, impairment loss on and interest income from these financial assets is recognized using the effective interest method in accordance with the amortization procedure. A gain or loss is recognized in profit or loss when the asset is derecognized

D. The Company's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(9) Accounts and notes receivable

A. Accounts and notes receivable entitle an unconditional legal right to receive consideration in exchange for transferred goods or rendered services.

B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

C. The Company's operating pattern of accounts receivable that are expected to be factored is for the purpose of selling, and the accounts receivable are subsequently measured at fair value, with any changes in fair value recognized in profit or loss.

(10) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income, financial assets at amortized cost, and accounts receivable containing a significant financing component, the Company measures, at each balance sheet date, the impairment provision at 12 months expected credit losses if there has no significant increase in credit risk since initial recognition or measures the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Company recognizes the impairment provision for lifetime ECLs.

(11) Derecognition of financial assets

The Company derecognizes a financial asset when one of the following conditions is met:

A. The contractual rights to receive the cash flows from the financial asset expire.

B. The contractual rights to receive cash flows of the financial asset have been transferred and the Company has transferred substantially all risks and rewards of ownership of the financial asset.

C. The contractual rights to receive cash flows of the financial asset have been transferred; and the Company has not retained control of the financial asset.

(12) Lessor Leasing Transaction - Lease Receivable/Operating lease (lessor)

Lease income from an operating lease (net of any incentives given to the lessee) is recognized in profit or loss on a straight-line basis over the lease term.

(13) Inventories

Inventories are measured at the lower of cost and net realizable value. Cost is determined using the weighted-average cost method. The cost of finished goods and goods in process comprises raw materials, direct labor, other direct costs and related

production overheads (allocated based on normal operating capacity). However, loan costs are excluded. The item-by-item approach is used in applying the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

(14) Investments accounted for under the equity method / subsidiaries and associates

A. Subsidiaries are entities controlled by the Company (including structured entities). The Company controls the entity when the Company is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

B. All unrealized profit or loss resulting from transactions between the Company and its subsidiaries have been eliminated in full. Accounting policies of subsidiaries have been adjusted when necessary in order to be consistent with those of the Company.

C. The Company's share of profit or loss in subsidiaries after acquisition is recognized in profit or loss, whereas its share of other comprehensive income in subsidiaries after acquisition is recognized in other comprehensive income. If the Company's share of loss in a subsidiary exceeds its share of equity in such a subsidiary, the Company continues to recognize losses in its shareholding percentage.

D. If a change in shareholding in a subsidiary does not result in a loss of control (i.e. transactions with non-controlling interests), such a change is accounted for as an equity transaction, that is, a transaction with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity.

E. Associates are all entities over which the Company has significant influence but no control. In general, it is presumed that an investor has significant influence if the investor holds directly or indirectly 20% or more of the voting power of the investee. Investments in associates are accounted for under the equity method and are recognized at cost after acquisition.

F. The Company's share of profits or losses after the acquisition of associates is recognized in profit or loss, and its share of other comprehensive income after acquisition is recognized in other comprehensive income. When the Company's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Company does not recognize further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

G. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the

Company’s shareholding percentage of the associate, the Company recognizes change in ownership interests in the associate in "capital surplus" in proportion to its shareholding.

H. Unrealized gains or losses on transactions between the Company and its associates are eliminated to the extent of the Company’s interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Company.

I. In case an associate issues new shares and the Company does not subscribe or acquire new shares proportionately, which results in a change in the Company’s ownership percentage of the associate but maintains significant influence on the associate, then "capital surplus" and "investments accounted for under the equity method" shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Company’s ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.

J. Upon loss of significant influence over an associate, the Company remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognized in profit or loss.

K. When the Company disposes of its investment in an associate and loses significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. That is, if any gains or losses previously recognized in other comprehensive income are to be reclassified to profit or loss upon disposal of related assets or liabilities, such gains or losses, when the Company losses significant influence over the associates, are reclassified from equity to profit or loss. If it still retains significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.

L. According to Regulations Governing the Preparation of Financial Reports by Securities Issuers, the profit or loss of the period and other comprehensive income presented in parent company only financial statements shall be the same as the allocations of profit or loss of the period and of other comprehensive income attributable to owners of the parent presented in the financial statements prepared on a consolidated basis, and the owners' equity presented in the parent company

only financial statements shall be the same as the equity attributable to owners of the parent presented in the financial statements prepared on a consolidated basis.

(15) Property, plant and equipment

A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.

B. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are recognized as profit or loss during the financial period in which they are incurred.

C. While land is not depreciated, other property, plant and equipment that apply cost model are depreciated using the straight-line method to allocate their cost over their estimated useful lives. If each component of property, plant and equipment is significant in relation to the total cost of the item, it must be depreciated separately.

D. The assets residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets residual values and useful lives differ from previous estimates or the patterns of consumption of the assets future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, "Accounting Policies, Changes in Accounting Estimates and Errors." from the date of the change. Useful lives of property, plant and equipment are as follows:

Buildings and structures	15 ~ 51 years
(Buildings and auxiliary facilities	6 ~ 11 years)
Machinery and equipment	3 ~ 9 years
Other assets	1 ~ 6 years

(16) Lessee Leasing Transaction – Right-of-use Assets/Leasing liabilities

A. Leased assets are recognized as right-of-use assets and leasing liabilities as of the date they become available to the Company. When a lease contract is a short-term lease or a lease of a low-value asset, the lease payment is recognized as an expense over the leasing period using the straight-line method.

B. Leasing liabilities are recognized at the commencement date of the lease at the present value of unpaid lease payments discounted by the interest rate on the Company's incremental borrowings, which include:

(a) fixed payments, less any lease incentives that may be received;

(b) variable lease payments that depend on a certain index or rate;

(c) expected amount paid by the Company under the residual value guarantee;

(d) the exercise price of purchasing the option if the lessee can be reasonably certain that such option will be exercised; and

(e) penalties to be paid for lease termination if lessor intends to exercise the lease termination option during the leasing period.

The leasing liabilities are measured subsequently using the cost amortized by the interest bill, which provides for interest expense over the term of the lease. When a change in non-contractual results in a change in the leasing period or lease payment, the leasing liability is reassessed and the right-of-use asset is remeasured.

C. Right-of-use assets are recognized at cost at the commencement date of the lease, which includes:

(a) the initial measurement amount of the leasing liability;

(b) any lease payments made on or before the commencement date;

(c) any initial direct costs incurred; and

(d) estimated costs for demolition, removal of the subject asset and location of the recovery period, or restoration of the subject asset to the condition required in the terms and conditions of the lease.

The leasing liabilities are measured subsequently using the cost model, depreciation expenses are provided at the earlier of the end of the useful life of the right-of-use period or the end of the leasing period. When the lease liabilities are remeasured, the right-of-use asset will adjust any amount of remeasurement of the leasing liabilities.

D. For lease modifications that reduce the scope of the lease, the lessee shall reduce the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease and recognizes the difference between this amount and the re-measurement amount of the lease liability in profit or loss.

(17) Impairment of non-financial assets

The Company assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less disposal costs or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior periods no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortized historical cost would have been if the impairment had not been recognized.

(18) Loans

A. Loans comprise long-term and short-term bank loans. Loans are recognized initially at fair value, net of transaction costs incurred. Loans are subsequently stated at amortized cost; any difference between the proceeds (net of transaction

costs) and the redemption value is recognized in profit or loss over the period of the loans using the effective interest method.

B. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

(19) Notes and accounts payable

A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.

B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(20) Financial liabilities at fair value through profit or loss

A. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorized as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as measured at fair value through profit or loss at initial recognition:

(a) Hybrid (combined) contracts; or

(b) They eliminate or significantly reduce a measurement or recognition inconsistency; or

(c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.

B. At initial recognition, the Company measures the financial liabilities at fair value and recognizes the transaction costs in profit or loss. The Company subsequently measures the financial liabilities at fair value, and recognizes the gain or loss in profit or loss.

C. If the credit risk results in fair value changes in financial liabilities designated as measured at fair value through profit or loss, they are recognized in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognizing in profit or loss for loan commitments or financial guarantee contracts.

(21) Ordinary corporate bonds payable

Ordinary corporate bonds issued by the Company are initially recognized at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from corporate bonds payable, which is amortized to profit or loss over the period of bond circulation using the effective interest method as an adjustment to "finance costs"

(22) Convertible corporate bonds payable

Convertible corporate bonds issued by the Company contain conversion options (that is, the bondholders have the right to convert the bonds into the Company's common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Company classifies the bonds payable upon issuance as a financial asset, a financial liability or an equity instrument in accordance with the contract terms. They are accounted for as follows:

A. The host contracts of corporate bonds are initially recognized at fair value. Any difference between the initial recognition and the redemption value is accounted for as the premium or discount on bonds payable and subsequently is amortized in profit or loss as an adjustment to "finance costs" over the period of circulation using the effective interest method.

B. The embedded conversion options which meet the definition of an equity instrument are initially recognized in "capital surplus—share options" at the residual amount of total issue price less the amount of financial assets or financial liabilities at fair value through profit or loss and bonds payable as stated above. Conversion options are not subsequently remeasured.

C. Any transaction costs directly attributable to the issuance are allocated to each liability and equity component in proportion to the initial carrying amount of each abovementioned item.

D. When bondholders exercise conversion options, the liability component of the bonds shall be remeasured on the conversion date. The issuance cost of converted common shares is the total book value of the abovementioned liability component and "capital surplus—share options".

(23) Derecognition of financial liabilities

A financial liability is derecognized when the obligation specified in the contract is either discharged or cancelled or expires.

(24) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

(25) Non-hedging and embedded derivatives

A. Non-hedging derivatives are initially recognized at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognized in profit or loss.

B. Under the financial assets, the hybrid contracts embedded with derivatives are initially recognized as financial assets at fair value through profit or loss, financial

assets at fair value through other comprehensive income and financial assets at amortized cost based on the contract terms.

C. Under the non-financial assets, whether the hybrid contracts embedded with derivatives are accounted for separately at initial recognition is based on whether the economic characteristics and risks of an embedded derivative are closely related in the host contract. When they are closely related, the entire hybrid instrument is accounted for by its nature in accordance with the applicable standard. When they are not closely related, the derivative is accounted for differently from the host contract as derivative while the host contract is accounted for by its nature in accordance with the applicable standard. Alternatively, the entire hybrid instrument is designated as financial liabilities at fair value through profit or loss upon initial recognition.

(26) Provisions

Provisions include warranty, decommissioning liabilities and litigation compensation are recognized when the Company has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognized as interest expense. Provisions are not recognized for future operating losses.

(27) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognized as pension expense when they are due on an accrual basis. Prepaid contributions are recognized as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Company in current period or prior periods. The liability recognized in the balance sheet in respect

of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Company uses interest rates of government bonds (at the balance sheet date) instead.

ii. Remeasurements arising from defined benefit plans are recognized in other comprehensive income in the period in which they arise and are recorded as retained earnings.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognized as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in accounting estimates. If employee compensation is paid by shares, the Company calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(28) Employee share-based payment

For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognized as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-market vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognized is based on the number of equity instruments that eventually vest.

(29) Income tax

A. The tax expense for the period comprises current and deferred income tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.

B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the

Company operates and generates taxable income. Management periodically evaluates implementations taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the shareholders resolve to distribute the earnings.

C. Deferred income tax is recognized, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the parent company only balance sheet. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

D. Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred income tax assets are reassessed.

E. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realize the asset and settle the liability simultaneously.

F. A deferred tax asset shall be recognized for the carry-forward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

(30) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as

liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to common shares on the effective date of new shares issuance.

(31) Revenue recognition

A. The Company manufactures and sells consumer electronics products. Sales are recognized when control of the products has transferred, being when the products are delivered to the customers, the customers has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customers, and either the customers has accepted the products in accordance with the sales contract, or the Company has objective evidence that all criteria for acceptance have been satisfied.

B. Sales revenue is recognized in the amount equal to its contractual price less estimated sales discounts and allowance. Sales revenue is recognized to the extent that a significant reversal is highly improbable. Revenue recognition is revisited at each balance sheet date. No element of financing is deemed present as the sales are made with a credit term consistent with market practice.

C. A receivable is recognized when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

D. The Company's obligation to provide a refund for faulty products under the standard warranty terms is recognized as a provision.

E. The customer pays at the time specified in the payment schedule. If the products sold exceed the payment, a contract asset is recognized. If the payments exceed the products sold, a contract liability is recognized.

5. CRITICAL ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS ON UNCERTAINTY

The preparation of these parent company only financial statements requires management to make critical judgments in applying the Company's accounting policies and make critical accounting assumptions and estimates as to have a reasonable expectation of future events based on the circumstances on the balance sheet date. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such estimates and assumptions bear the risk of making material adjustments to the carrying amount of assets and liabilities for the following fiscal year. Below details the uncertainties of critical accounting judgments, estimates and assumptions:

(1) Critical judgments in applying the Company's accounting policies

Revenue recognition

The Company determines whether the nature of its performance obligation is to provide the specified goods or services itself (i.e., the Company is a principal) or to

arrange for the other party to provide those goods or services (i.e., the Company is an agent) based on the transaction model and its economic substance. The Company is a principal if it controls a promised good or service before it transfers the good or service to a customer. The Company recognizes revenue at gross amount of consideration to which it expects to be entitled in exchange for those goods or services transferred. The Company is an agent if its performance obligation is to arrange for the provision of goods or services by another party. The Company recognizes revenue at the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the other party to provide its goods or services.

Indicators that the Company controls the specified goods or services before they are provided to a customer include the following:

A. The Company is primarily responsible for the provision of goods or services;
B. The Company assumes the inventory risk before transferring the specified goods or services to the customer or after transferring control of the goods or services to the customer; and
C. The Company has discretion in establishing prices for the goods or services.

(2) Critical accounting estimates and assumptions

The Company makes estimates and assumptions based on the expectation of future events that are believed to be reasonable under the circumstances at the end of the reporting period. The resulting accounting estimates might be different from the actual results. The estimates and assumptions that may significantly adjust the carrying amounts of assets and liabilities within the next financial year are addressed below:

Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Company must determine the net realizable value of inventories on balance sheet date based on judgments and estimates. Due to the rapid technology innovation, the Company evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realizable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be significant changes to the evaluation.

As of December 31, 2020, the carrying amount of inventories was $82,325,585.

(a) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk

(b) Foreign exchange forward contracts

The Company enters into foreign exchange forward transactions to hedge the following risks of exchange rate:

i. Operating activities: Proceeds derived from import of raw materials and export sales.

ii. Investing activities: Proceeds derived from import of machinery and equipment

iii. Financing activities: Long-term and short-term foreign currency assets and liabilities (financing)

4. Details of the Company's investment in equity instruments and beneficiary certificates are provided in Table 3.
5. The Company has no financial assets at fair value through profit or loss pledged to others.

(14) Pensions

A. Defined benefit plans

(a) The Company has a defined benefit pension plan in accordance with the Labor Standards Act, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years

thereafter of employees who chose to continue to be subject to the pension mechanism under the Labor Standards Act. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last six months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company assesses the balance in the aforementioned labor pension reserve account by December 31 of every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by the end of next March.

(d) Bank of Taiwan was commissioned to manage the fund of the Company's defined benefit pension plan in accordance with the fund's annual investment and utilization plan and the "Regulations for Revenues, Expenditures, Safe guard and Utilization of the Labor Retirement Fund" (Article 6: The scope of utilization for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate secularization products, etc.). Such utilization is supervised by the Labor Funds Supervisory Committee. With regard to the utilization of the fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the competent authority. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2020 and 2019 is given in the Annual Labor Retirement Fund Utilization Report announced by the government.

(e) The principal actuarial assumptions used are summarized as follows:

	2020	2019
Discount rate	0.40%	0.80%
Future salary increases	3.5%	3.5%

Assumptions regarding future mortality experience are set based on actuarial advice in accordance with published statistics and experience in

each territory. Due to the change of the main actuarial assumption, the present value of defined benefit obligation is affected. The analysis is as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2020				
Effects on the present value of defined benefit obligation	($ 59,721)	$ 62,244	$ 55,505	($ 53,680)

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2019				
Effects on the present value of defined benefit obligation	($ 61,696)	$ 64,388	$ 57,843	($ 55,861)

The sensitivity analysis above was based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The methods of analyzing sensitivity and the method of calculating net pension liability in the balance sheet are the same.

The sensitivity analysis has been prepared using approaches and assumptions the same as last period.

(f) Expected contributions to the defined benefit pension plans of the Company for the year 2021 amount to $15,845.

(g) As of December 31, 2020, the weighted average duration of the retirement plan is 13 years.

B. Defined contribution plans

Balance - January 1, 2020	$ 372,980
Unused amounts reversed	(291,065)
Balance - December 31, 2020	$ 81,915

Analysis of provisions is stated as follows:

	December 31, 2020	December 31, 2019
Current	$ 81,915	$ 372,980

The Company provides warranties on electronic products sold. Provision for warranty is estimated based on historical warranty data of electronic products.

(16) Capital

A. As of December 31, 2020, the Company's authorized capital was $180,000,000, consisting of 18 billion shares of ordinary stock, and the paid-in capital was $138,629,906, consisting of 13,862,991 thousand shares with a par value of $10 (in dollars) per share. All proceeds from shares issued have been collected.

B. Pursuant to the resolution adopted at the shareholders' meeting held on June 1, 1999, the Company issued 50,000 thousand ordinary shares so as to issue 25,000 thousand units of Global Depositary Receipts (GDR). Such issuance of ordinary shares had been approved and documented by the former Securities and Futures Commission of the Ministry of Finance. GDRs are issued in Europe, Asia, and the United States, totaling US$ 347,250 thousand. Primary contractual terms are as follows:

(a) Exercise of voting power

Holders of GDRs have no right to directly exercise voting rights or attend the Company's shareholders' meeting, except when a motion is on the election of directors or supervisors. A holder or holders together holding at least 51% of the GDRs outstanding at the relevant record date of the shareholders' meeting can instruct the Depositary to vote in the same direction in respect of one or more resolutions to be proposed at the meeting.

(b) Sale and withdrawal of GDRs

Under the current R.O.C. law, shares represented by the GDRs may be withdrawn by holders of GDRs commencing three month after the initial issue of GDRs. A holder of a GDR may, provided that the Company has delivered to the custodian physical share certificates in respect of the Deposited Shares, request the Depositary to sell or cause to be sold on behalf of such holder the shares represented by such GDRs

(c) Dividends

GDR holders are entitled to receive dividends to the same extent as the holders of ordinary shares.

(d) After years of capitalization of earnings, as of December 31, 2020, 94,433 thousand units of GDRs were outstanding, which represent 188,867 thousand shares of ordinary share.

C. Treasury stocks

The Company's subsidiary, Hon Jin International Investment Co., Ltd., acquired ordinary shares issued by the Company in 1998. As of December 31, 2020 and 2019, the subsidiary owned a total of 1,483,078 shares of the Company's ordinary shares, respectively, at a cost of $18,901, which was reduced to $15,194 after share proceeds were returned due to capital reduction.

(17) Capital surplus

A. Pursuant to the Company Act, capital reserve arising from paid-in capital in excess of par value on issuance of ordinary shares and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the Securities and Exchange Act requires that the amount of capital reserve to be capitalized mentioned above should not exceed 10% of the paid in capital each year. Capital reserve should not be used to cover accumulated deficit unless the surplus reserve is insufficient. Movements in capital reserve are as follows:

(18) Retained earnings

A. The Company's net earnings after final account are apportioned in the following order:

(a) Covering accumulated deficits;

(b) Setting aside as legal reserve equal to 10% of current year's net income. However, this is not applicable when the legal reserve has reached the paid-in capital.

(c) Setting aside or reversing a special reserve in accordance with other regulatory requirements;

The remaining earnings along with the unappropriated earnings at the beginning of the period are considered as accumulated distributable earnings. In accordance with dividend policy, the proposal of earnings appropriation is prepared by the Board of Directors and resolved by the shareholders.

The Company has authorized the Board of Directors to resolve the distribution of all or part of the dividends and bonuses, capital surplus or legal reserve by way of cash payment by the presence of more than two-thirds of the Directors and a majority of the Directors present. The aforesaid requirement that a resolution shall be resolved at the shareholders' meeting is not applicable.

The Company is at the growing stage. The Company's stock dividend policy shall consider the Company's current and future investment environment, capital needs, local and foreign competition situation and capital budget, along with shareholders' profit and the Company's long-term financial plans. The shareholders' dividends are appropriated based on accumulated distributable earnings, which shall not be lower than 15% of the distributable earnings for the period and the cash dividend shall not be less than 10% of the shareholders' dividends.

B. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the balance of the reserve exceeds 25% of the Company's paid-in capital.

C. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.

D. The distribution of 2020 earnings was adopted in the shareholders' meeting on March 30, 2021 and the distribution of 2019 earnings was adopted in the shareholders' meeting on June 23, 2020. Details are summarized below:

12. OTHERS

(1) Capital management

The objective of the Company's capital management is to ensure that the Company can continue as a going concern, that an optimal capital structure is maintained to lower the cost of capital, and that returns are provided to shareholders. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt. The Company monitors capital on the basis of the debt-to-net worth ratio. This ratio is calculated as net debt divided by net worth. Net debt is calculated as total loans (including "current and non-current loans" as shown in the parent company only balance sheet) less cash and cash equivalents. Net worth is calculated as 'equity' as shown in the parent company only

balance sheet less the total intangible assets.

The Company's strategic maintenance in 2020 to pin the debt-to-net worth ratio at or below 70% remains unchanged from that in 2019.

(2) Financial instruments

A. Classification of financial instruments

For information and amounts related to the Company's financial assets, which comprise financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets at amortized cost, accounts receivable (including receivables due from related parties and other receivables), and financial liabilities, which comprise financial liability at fair value through profit or loss, accounts payable (including payables to related parties), other payables, short-term loans, long-term loans and corporate bond payables), refer to Note 6 and the parent company only balance sheet.

B. Risk management policies

(a) Risk categories:

The Company employs a comprehensive risk management and control system to clearly identify, measure, and control the various kinds of financial risk it faces, including market risk (including foreign exchange risk, interest rate risk and price risk), credit risk, and liquidity risk.

(b) Management objectives:

i. Except for market risk, which is controlled by external factors, the remainder of the foregoing types of risks can be controlled internally or removed from business processes. Therefore, the goal in managing each of these risks is to reduce them to zero.

ii. As for market risk, the goal is to optimize its overall position through strict analysis, suggestion, execution and audit processes, and proper consideration of a) long-term trends in the external economic/financial environment, b) internal operating conditions, and c) the actual effects of market fluctuations.

iii. The Company's overall risk management policy focuses on the unpredictable item of financial markets and seeks to reduce the risk that potentially pose adverse effects on the Company financial position and financial performance.

iv. For the information on the derivative financial instruments that the Company enters into, please refer to Note 6(2).

(c) Management system:

i. Risk management is executed by the Company treasury by following policies approved by the Board. Through cooperation with the Company's operating units, finance department is responsible for identifying, evaluating and hedging financial risks.

ii. The Board of Directors has a written policy covering overall risk management. It also has written policies covering specific scopes and issues, such as exchange rate risk, interest rate risk, credit risk, derivative and non-derivative financial instruments used, and the investment of excess working capital.

C. Significant financial risks and degrees of financial risks

(a) Market risk

i. Foreign exchange risk

(A) Nature:

The Company is a multinational company in the electronics manufacturing services industry. Most of the exchange rate risk from operating activities come from:

a. Foreign exchange risk arises from different exchange rates to functional currency, as the invoice dates of accounts receivable and payable denominated in nonfunctional foreign currency are different. Due to the characteristics of the OEM industry, the Company's revenue and expenditures are mostly denominated in foreign currency. Thus, the remaining net foreign exchange risk is not material after offsetting assets and liabilities. Furthermore, although the fluctuations in exchange rates of the Company's certain foreign investments in emerging countries (e.g., Brazil, Mexico, etc.) are considered huge, the percentage of the investments is not significant and thus the Company's foreign exchange risk can be maintained in the controllable range. (Note: The Company has several sites in various countries and thus is exposed to various foreign exchange risks. The main risk arises from USD and RMB.)

b. Besides the above transactions (operating activities) recognized in the income statement, assets and liabilities recognized in the balance sheet also result in the exchange rate risk.

(B) Management:

a. For such risks, the Company has set up policies requiring companies in the Group to manage the exchange rate risks of their functional currencies.

b. As to the exchange rate risk arising from the difference between various functional currencies and the reporting currency in the consolidated financial statements, it is managed by the Group's finance department.

(C) The source:

a. USD and NTD:

Foreign exchange risk arises primarily from USD-denominated assets, such as cash and cash equivalents, accounts receivable, and other receivables, and USD-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into NTD.

b. USD and RMB:

Foreign exchange risk arises primarily from USD-denominated assets, such as cash and cash equivalents, accounts receivable, and other receivables, and USD-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into RMB.

c. JPY and NTD:

Foreign exchange risk arises primarily from JPY-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into NTD.

d. JPY and USD:

Foreign exchange risk arises primarily from JPY-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into USD.

(D) Extent: The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

	December 31, 2020				
				Sensitivity analysis	
(Foreign currency : functional currency)	Foreign currency (in thousands)	Exchange rate	Book value (NTD)	Extent of variation	Effect on profit or loss

(E) Total exchange gain (loss), including realized and unrealized, arising from significant foreign exchange fluctuation on the monetary items held by the Company amounted to a gain of $5,073,534 and $480,270, respectively, for 2020 and 2019.

ii. Equity securities

(A) Nature:

The Company primarily invests in domestic and foreign publicly traded equity instruments, which are accounted for as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and available-for-sale financial assets. The price of those equity instruments will be affected by the uncertainty of the future value of the investment.

(B) Extent

If such equity instruments' price rise or fall by 1%, with all other factors held unchanged, the impact on equity due to investments in equity instruments measured at fair value through other comprehensive income, investments in equity at fair value through profit or loss and available-for-sale equity instruments were $25,088 and $15,051, respectively, for 2020 and 2019.

iii. Futures

(A) Nature:

The Company is exposed to commodity price risk because of future commodity price fluctuations.

(B) Extent

The Company sets stop-loss amount to reduce its futures market risk whenever futures contracts are entered into. As potential losses are controlled within a reasonable range, there is no significant futures market risk.

iv. Cash flow and fair value interest rate risk

The Company's interest rate risk arises from long-term loans or corporate bonds with floating rates. The Company's long-term corporate bonds with fixed interest rates do not have interest rate risk or fair value interest rate risk.

Long-term loans or corporate bonds with floating rates expose the Company to cash flow interest rate risk, but most of the risks are offset by cash and cash equivalents with variable interest rates.

(b) Credit risk

i. Credit risk refers to the risk of financial loss to the Company arising from default by the clients or counterparties of financial instruments.

According to the Company's credit policy, each local entity in the Group is responsible for managing and analyzing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The internal risk control assesses customers' credit quality by taking into account their financial position, historical experience, and other factors.

Individual risk limits are set by the Board of Directors based on internal or external ratings. The utilization of credit limits is regularly monitored.

Major credit risk arises from credit risks of cash and cash equivalents, derivative financial instruments, deposits at banks and financial institutions, investments on short-term wealth management products of banks and financial institutions, and other financial instruments.

The counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk.

ii. The Company assumes that if the contract payments were past due over 90 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition; if past due over 360 days, a default has been occurred.

iii. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:

(A) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;

(B) Default or delinquency in interest or principal repayments;

(C) Adverse changes in national or regional economic conditions that are expected to cause a default.

iv. The aging analysis of accounts receivable (including related parties) is as follows:

	December 31, 2020	December 31, 2019
Not past due	$ 582,743,419	$ 579,621,106
Up to 90 days	9,037,757	5,482,036
91-180 days	59,755	455,785
180-270 days	56,621	232,045
270-360 days	20,771	681,786
Over 361 days	2,807,855	1,825,078
	$ 594,726,178	$ 588,297,836

The table above shows an aging analysis based on the number of days overdue.

v. The Company applies the following approaches to assess the expected credit losses (ECLs) of accounts receivable:

(A) Assess the ECLs on an individual basis if a significant default has occurred.

(B) Classify the other customers' accounts receivable based on the Company's credit rating standards and estimates the ECLs using loss rate methodology or provision matrix based on different groups.

(C) Adjust the loss rates constructed from historical and recent information by taking into account the business cycle indicators of the National Development Council and forecasts of the Basel Committee on Banking Supervision.

(D) As of December 31, 2020 and 2019 the individual allowance for impairment of accounts receivable and ones estimated using loss rate methodology or provision matrix are as follows:

	Individual	Group 1	Group 2	Group 3	Group 4	Total

Group 1: Standard Poor's, Fitch's, or Moody's rating of A-level, or rated as A-level in accordance with the Company's credit policies for those that have no external credit ratings.

Group 2: Standard Poor's or Fitch's rating of BBB, Moody's rating of Baa, or rated as B or C-level in accordance with the Company's credit

policies for those that have no external credit ratings.

Group 3: Standard Poor's or Fitch's rating of BB + and below, or Moody's rating of Ba1 and below.

Group 4: Rated as other than A, B, or C in accordance with the Company's credit policies for those that have no external credit ratings.

vi. Movements of loss allowance for accounts receivable (including related parties) and other receivables (including related parties) provided by the Company are as follows:

	2020	2019
January 1	$ 3,243,686	$ 1,921,025
Provision (reversal) of impairment loss	1,017,112	1,322,661
December 31	$ 4,260,798	$ 3,243,686

(c) Liquidity risk

i. Cash flow forecasting is performed by each operating entity of the Group and aggregated by Group treasury. The Group treasury monitors rolling forecasts of the Group's liquidity requirements and meets various contractual obligations by maintaining sufficient funds and bank facilities.

ii. The table below analyzes the Company's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities categorized into relevant maturity groups, i.e. based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

Except as stated above, the Group's non-derivative financial liabilities are due within the next year.

(3) Fair value information

A. The different levels of inputs used in the valuation techniques for measuring the fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Company's investment in listed stocks and beneficiary certificates is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Company's investment in convertible corporate bonds payable and most of the derivative instruments is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Company's equity investment without active market is included in Level 3.

B. Financial instruments not measured at fair value

(a) Except for those listed in the table below, the carrying amounts of the Company's financial instruments not measured at fair value (including cash and cash equivalents, notes and accounts receivable, other receivables, financial assets at amortized cost (excluding bank debentures), short-term loans, notes and accounts payable, other payables and long-term loans) approximate to their fair values.

	December 31, 2020			
		Fair value		
	Book value	Level 1	Level 2	Level 3
Financial liabilities:				
Corporate bonds payable	$ 143,678,442	$ -	$ 142,340,232	$ -

	December 31, 2019			
		Fair value		
	Book value	Level 1	Level 2	Level 3
Financial liabilities:				
Corporate bonds payable	$ 139,546,000	$ -	$ 136,917,685	$ -

(b) The methods and assumptions of fair value measurement are as follows:

Corporate bonds payable: Regarding the bonds issued by the Company, the coupon rate approximates to the current market rate. Therefore, the fair value is estimated using the present discounted value of the expected cash flows and market interest rate.

C. The Company categorizes financial and non-financial instruments measured at fair value on the basis of the nature, characteristics, risks, and fair value level of the assets and liabilities.

(a) The related information on assets and liabilities categorized by their nature is as follows:

December 31, 2020	Level 1	Level 2	Level 3	Total
Assets				
Recurring fair value measurements				
Financial assets at fair value through profit or loss				
Derivatives	$ -	$ 967,325	$ -	$ 967,325

(b) The methods and assumptions of fair value measurement are as follows:

i. The Company adopts market quoted prices as their fair values (i.e., Level 1), which are listed below by the characteristics of the instruments:

	Listed stocks	Open-end fund
Market quoted price	Closing price	Net asset value

ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques method can be obtained by reference to the current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including fair value calculated by applying model using market information available at the parent company only balance sheet date.

iii. When assessing non-standard and low-complexity financial instruments, for example, cross currency swap contracts and wealth management products, the Company adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.

iv. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present discounted value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate. Put option is evaluated by Black-Scholes option pricing model.

v. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Company's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, such as model risk or liquidity risk, etc. In accordance with the Company's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably present the fair value of financial and non-financial instruments at the parent company only balance sheet. The pricing information and inputs used during valuation are carefully assessed and adjusted based on current market conditions

vi. The Company takes into account credit risk valuation adjustment to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Company's credit quality.

D. For the years ended December 31, 2020 and 2019, there was no transfer between Level 1 and Level 2.

E. The following chart is the movement of Level 3 in 2020 and 2019:

	2020	2019
	Equity instruments	Equity instruments
January 1	$ 137,061	$ 153,227
Gains and losses recognized in other comprehensive income	63,754	(16,116)
December 31	$ 200,815	$ 137,061

F. Investment segment is in charge of valuation procedures for fair value measurements being categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming that the resource of information is independent, reliable and in line with other resources and representative of the exercisable price, frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model, and making any other necessary adjustments to the fair value.

In addition, investment segment sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments to ensure compliance with the related requirements in IFRS.

G. The following is the quantitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value as at December 31, 2019	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument:					
Venture capital shares Private equity fund investment	$ 200,603	Net asset value	lack of marketability discount	10.00%	As the discount for lack of marketability, discount for minority interest, or expected equity value volatility goes higher, the fair value goes lower.
			minority discount of interests	15.00%	
	$ 212	Market comparable companies	lack of marketability discount	25.00%	The higher the net value multiple, the higher the fair value; the higher the discount for lack of marketability, the lower the fair value
			Net value multiple	1.43	

	Fair value as at December 31, 2019	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument:					
Venture capital shares Private equity fund investment	$ 137,061	Net asset value	lack of marketability discount	5.00%~10.00% (7.73%)	As the discount for lack of marketability, discount for minority interest, or expected equity value volatility goes higher, the fair value goes lower.
			minority discount of interests	15.00%	

H. The Company has carefully assessed the valuation models and inputs used to measure fair value. However, use of different valuation models or inputs may result in different measurement. The following is the effect on profit or loss or other comprehensive income from financial assets and liabilities categorized within Level 3 if the inputs used in the valuation models have changed:

			December 31, 2019			
			Recognized in profit or loss		Recognized in other comprehensive income

Financial Assets						
Equity instruments	Control premium or marketability discount	±1%	$ -	$ -	$ 2,678	($ 2,678)

			December 31, 2019			
			Recognized in profit or loss		Recognized in other comprehensive income

Note 1: Code of general ledger account is "investments accounted for under equity method".

Note 2: Code of general ledger account is "financial assets at fair value through Other Comprehensive Income". The disposal gain or loss would be reclassified from "Other Comprehensive Income" to "Retained Earnings".

Note 3: Code of general ledger account is "financial assets at amortized cost". The disposal gain and loss is from interest income.

Note 4: Code of general ledger account is "financial assets at fair value through profit or loss". Due to adoption of IFRS, it would be valued at fair value rather than recognised disposal gain or loss.

Note 5: The total amount of the Group's acquisition or sale of the same security is reaching NT$300 million or more.

Note 6: Fill in the columns the counterparty and relationship if securities are accounted for under the equity method; otherwise leaves the columns blank.

Note 7: The counterparty is a subsidiary of the Company.

Hon Hai Precision Industry Co., Ltd. and Subsidiaries

Purchases or sales of goods from or to related parties reaching NT$100 million or 20% of paid-in capital or more

Note 1: The information of transactions between the Company and the consolidated subsidiaries should be noted in “Number” column.

(1) Number 0 represents the Company.

(2) The consolidated subsidiaries are numbered in order from number 1.

Note 2: The transaction relationships with the counterparties are as follows:

(1) The Company to the consolidated subsidiary.

(2) The consolidated subsidiary to the Company.

(3) The consolidated subsidiary to another consolidated subsidiary.

Note 3: The prices and terms to related parties were not significantly different from transactions with third parties, except for particular transactions with no similar transactions to compare with. For these transactions, the prices and terms were determined in accordance with mutual agreements.

Note 4: In calculating the ratio, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenues for income statement accounts.

Note 5: For balance sheet accounts, transactions exceeding 1% of the consolidated total assets should be disclosed; for income statement accounts, transactions exceeding 1% of the consolidated total revenue should be disclosed. All the transactions had been eliminated when preparing consolidated financial statements.

Note 6: Part of above transactions with related parties were based on the financial statements of the company for the same period which were not audited by independent accountants.

Variance Analysis:

1. Cash flow ratio: Due to the impact of the pandemic, the increase in shipments at the end of the year led to an increase in the balance of accounts payable to suppliers, resulting in net cash inflows from operations, so the cash flow ratio was relatively high. As a result, the cash flow adequacy ratio continues to increase.
2. Cash reinvestment ratio: mainly due to significant increase of the closing balance of accounts payable last year compared with the previous year, resulting in net cash inflow from operating activities, while the closing balance of inventory in this period was slightly higher than the year prior, resulting in net cash outflow from operating activities. The net cash flow from operating activities in this period was significantly higher than that of last year, hence a relatively high reinvestment ratio.

(2) Cash Flow Forecast for the Coming Year

Unit: NT$000

Cash beginning balance (1)	Cash flow from operating activities (2)	Cash flow in/(out) (3)	Cash ending balance/(shortage) (1)+(2)-(3)	Plan for cash ending balance shortage

F.Risk Assessment

(1) Effect of Changes in Interest Rate, Foreign Exchange and Inflation on Corporate Finance, and our Countermeasures.

(a) Interest Rates

Interest Rate Changes 2020

USD: Due to the outbreak of the COVID-19 pandemic in 2020, the United States initiated an loose monetary and fiscal policy. The Fed cut interest rates by 1.5% in March 2020, the base interest rate fell from 1.5% to 0%, and launched an unlimited QE in March. Moreover, Trump's nearly USD$2.8 trillion bailout plan has markedly lowered the yield on the 10-year US Treasury bond. In August 2020, as the U.S. pandemic abated, the yield of Treasury bonds began to gradually rise. Later, as the U.S. election was settled, Trump passed the USD$892 billion bailout proposal in December 2020. With effective vaccines, and Biden's expected USD$1.9 trillion stimulus plan, the market's expectations for economic recovery and inflation have risen, and the yield on the 10-year US Treasury bond rose to 0.9348% at the end of the year.

JPY: To continue to boost the Japanese economy and correct long-term deflation, the Bank of Japan has maintained a portion of the excess reserve deposit interest rate at -0.1% (negative interest rate) unchanged since January 29, 2016; and the yield rate of 10-year government bonds is controlled within the controlled curve framework of 0%±0.2%. After the pandemic, the monetary policy has not been significantly adjusted. The yield rate of Japanese 10-year government bonds rebounded from the low of -0.192% in March to -0.021%.

NTD: In 2020, the Central Bank of Taiwan cut interest rates by 0.25% in March, and the re-discount rate fell from 1.375% to 1.125%. Affected by the COVID-19 pandemic, major central banks around the world initiated a fiscal and monetary easing policy. Yield rates of 10-year government bonds fell from early-2020 highs of 1.2322% to around 0.0901%, the lowest point during the year. As the global pandemic situation improved, the economy gradually recovered. Since October, interest rates have rebounded and rose to about 0.6% at the end of the year.

RMB: China experienced the outbreak of the COVID-19 pandemic the earliest. In the first quarter of 2020, the People's Bank of China lowered the deposit reserve ratio from 13% to 12.5%, the 1-year MLF interest rate was reduced from 3.25% to 2.95%, and the 1-year LPR

interest rate was reduced from 4.15% to 3.85%. The 10-year government bond yield had dropped to around 2.5%, and with the improving pandemic situation around April 2020, China's situation has improved significantly and gradually eased restrictions, posting an outstanding economic. The monetary policy is gradually returning to neutral, and the 10-year government bond has rounded, and rates rose gradually reaching 3.150% at the end of the year.

Effect of the Company's Finances

Debt: A. The aforementioned currencies' short-term interest rates have fallen overall, and is beneficial for short-term loans with floating interest rates.

B. Previous fixed-interest financings for ordinary corporate loans are not affected by interest rate fluctuations.

Asset: Interest rate decreases are not beneficial for income from the Company's short-term funds.

Net Result: Under proper control, the "Net Interest Income" from the last two years are as follows: +NT$ 9.219 billion for 2019 and +NT$ 7.617 billion for 2020.

Countermeasures

2021 is the year of economic adjustment and recovery after pandemics effects, central banks of major countries continue to loosen fiscal policies to stimulate economy and react to the pandemic. The interest rates of the USD, NTD and JPY have bottomed out. Therefore, the Company will arrange various suitable financing tools as soon as possible to raise medium to long term funds with low interest rates in USD, NTD, or JPY to utilize the benefits of low-interest financing.

(b) Foreign Exchange:

Foreign Exchange Changes 2020

USD-JPY: Due to the panic caused by the pandemic, the international US dollar strengthened, and the USD/JPY rose to 111.71. Later, under the backdrop of the weak US dollar of the US dual easing policy, the USD/JPY experienced a continuous fall, reaching 103.25 at the end of the year.

USD- NTD: With the effects of the pandemic, sentiments for global risk aversion has risen, with USD/NTD reaching a high in March 2020 of 30.463. In March, the world's major central banks led by the Federal Reserve opened monetary floodgates, while Taiwan's central bank was relatively restrained and benefited from long-distance business opportunities. Taiwan's electronics industry performed well, and major institutions raised their economic growth forecasts for Taiwan. Funds poured into Taiwan. USD/ND fell all the way from March to a low of 28.094 at the end of the year.

USD-CNY: Due to the panic caused by the pandemic, the USD/CNY once rose to 7.1778. Later, as the Chinese pandemic gained a level of control, the economy continued to recover, and the currency gradually returned to neutral. Externally, the US dual easing policy led to a weak US dollar overall. From the end-May, USD/CNY started a downward spiral and reached 6.5272 at the end of the year.

Effect of the Company's Finances

1. Attributed Profit/Loss:

(A) Pursuant to "IFRS 9 (Financial Instruments)", profit and loss attributed to interest rates' fluctuations should be categorized into the two following categories:

a. Profit and Loss attributed to Exchange:

Foreign Exchange related assets or debt (such as operational accounts receivable, accounts payable, financial activities related to demand [time] deposits, short [long] term loans) and the discrepancy caused by exchange are attributed to this category.

b. Financial Assets (Liabilities) Profit and Loss Valuation:

Foreign exchange related assets or liabilities generated from risk avoidance mechanisms (such as Long-term foreign exchange trading), and the profit and loss generated at fair value are listed in this category.

(B) In order to review the Profit and Loss generated from exchange-related fluctuations, the two factors listed above should be consolidated to provide a fuller picture.

2. Profit/Loss status:

(Note: +Profit, -Loss)

Unit: NT$100Million

Item / Type	2019			2020		
	Profit/Loss attributed to Exchange	Financial Asset (Liability) Profit/Loss Valuation	Total	Profit/Loss attributed to Exchange	Financial Asset (Liability) Profit/Loss Valuation	Total
Consolidated Statement	-45.09	+109.96	+64.87	-16.72	+137.28	+120.56

3. Profit/Loss Description:

The Company has always maintained a conservative approach to risk avoidance, and stringent internal monitoring of trends and changes in foreign exchange and external financial markets. Therefore, the Company can execute risk aversion strategies accordingly, and generate profits attributed to exchange.

Countermeasures

1. Fundamental Strategy:

To cater for the complicated external factors at play, the Company attempts to offset liabilities with assets, and reduce the exposure exchange-related fluctuations.

2. Risk Avoidance:

The underlying principle is to square-off the aforementioned net positions.

(c) Inflation

Developments in Inflation

In 109, Taiwan's inflation was generally moderate. Affected by the pandemic, crude oil prices fell sharply. During the pandemic period, foreign tourists were prohibited from entering, and domestic demand was weak. The annual average CPI (YOY%) was -0.24%.

Effect of the Company's Finances

A. Fundamentally, the Company is an electronics foundry, and products have a tendency to depreciate over long periods of time. However, with a unified corporate strategy, the Company has reduced costs in various processes to offset the effects of inflation.

Countermeasures

A. The Company will continue to its commitment to various cost-reducing initiatives as a policy, and will be more risk-averse to inflation and deflation related factors.

B. After a period of decline, commodity prices are in a period of decline. The current commodity prices are relatively low, and the Company will keep a close eye on key commodities and adjust procurement strategies accordingly.

(2) Policies, Main Causes of Profit/Loss and Action Plans with Respect to High-risk, High-leveraged Investment, Lending or Endorsement Guarantee, and Derivatives Transactions

(a) High-risk, High-leveraged Investments

None

(b) Procedures for Lending Funds to Others and Countermeasures

(1) Policy:

Regarding related procedures mentioned in the Company's consolidated financial reports, please refer to the related companies' "Operational Procedures for Lending Funds to Others".

(2) Main Reasons:

The Company's lending to legal entities listed in the consolidated financial report have short-term financing needs.

(3) Countermeasures:

Depending on the nature of the loan and target's procedures, the Company will undertake necessary countermeasures.

(c) Procedures for Endorsement & Guarantees and Future Countermeasures

(1) Policy:

Regarding related procedures mentioned in the Company's consolidated financial reports, please refer to the related companies' "Procedures for Endorsement & Guarantees".

(2) Main Reasons:

The Company's endorsement and guarantees to legal entities listed in the consolidated financial report are parent/subsidiary companies, and endorsements and guarantees are mainly financing related.

(3) Countermeasures:

Implement countermeasure according to the endorsement and guarantee process.

(d) Derivatives Transactions

(1) Policy:

A. The Company and the legal entities listed in the consolidated financial report that partake in derivatives transactions will all be in accordance with FSC's "Regulations Governing the Acquisition and Disposal of Assets by Public Companies" and TWSE's "Taiwan Stock Exchange Corporation Directions for Auditing Internal Control Systems of Listed Companies".

B. As a risk avoidance principle, positions of the Company's asset or liabilities that are in actual possession or expected to be in possession will be closed. This offsets market price fluctuations as risks and risk-avoidance transactions will counteract each other, achieving stable operations.

(2) Causes for Profit/Loss

A. Externally:

Political game theory, black swan theory, and the state of the economy has placed various governments in different predicaments. Different countries have undertaken either tightening or relaxing monetary policies, creating a turbulent and unpredictable foreign exchange market.

B. Internally:

As a principle, derivatives trading will aim to "close the underlying net positions of related hedges", therefore when the net position incurs a loss, the derivative transaction will be counter to and gain valuation from the asset (or liability).

(3) Countermeasures:

A. Stance:

1. Derivative products are a financial tool and should be judge on how the tool is utilized, to achieve what ends, and the mentality in making such decisions.

2. The Company is committed to internal controls regarding financial derivative transactions, and has implemented various principals to reduce to the risks to a minimum.

3. Domestically, IFRS has implemented strict accounting regulations and guidelines regarding financial derivatives trading. The Company's procedures are in compliance and even more rigorous than related regulations.

B. Policy:

1. With the recent events, the impacts to the financial markets have been exacerbated. The financial market has been speculative and opportunistic, viciously fueling the outcome of these events. Various price fluctuations are neither based on fundamentals or logic, Additionally, with the hype driven by various financial institutions and media, the risk in the market has risen greatly.

2. Under these conditions, the financial derivatives and its leverage will be used more conservatively and stringently by the Company. Strategically, the Company will not be following the herd or be intimidated by external factors, and actions shall be judge on its "risk avoidance" merits.

(3) Future Research and Development Projects and Corresponding Budget

The Company focuses on leading the mass production of high-tech technology products, and its method is to effectively gather outstanding R&D talents, and invest the best R&D technologies and processes related to the Company's core competencies. With an estimated NT$90 Billion R&D expenses in 2020.

Shenzhen Jingji Precision Machinery Trade Co., Ltd	Domestic Trade, import and export of goods and technology; Mechanical Equipment and components, Molds Processing components, Metal Processing components, Automation Robots and components, LED lighting equipment, metal materials, plastic materials, chemical chemical materials, Sales of Packaging Materials ;Computer Software's technology development and Sales; Mechanical Equipment leasing, door-to-door maintenance; Agent declaration, agent inspection; Graphic Design; Computer Design; Art Design, Packaging Design; Web Design; engaged in advertising business; exhibition planning; manufacturing industrial technology Development; Operation e-commerce; Domestic Freight Forwarding, international freight forwarding agency; corporate marketing planning, conference planning, Corporate Information Consulting, education and training information consulting. Automation Equipment, Industrial Robots, automation component technology Development, Production and Sales; non-financial Institutional payment service business; electronic certification services.
Shenzhen Hongyu Network Co., Ltd.	Computer equipment, Internet Network Equipment, information transmission equipment, Computer Software, computer information system, Integrated Circuit Design, technology development, system integration, Sales, technical services; scientific and technological information consulting, Business Management Consulting (not including restricted projects); third-party platform-reliant computer equipment, Internet Network Equipment, information transmission equipment, Computer Software, information system, Integrated Circuit, Communication Power Supplies Sales, talent intermediary services, and labor dispatch services.
Shenzhen Hongzhi yun chuang Technology Co., Ltd	Intelligent equipment software products, New Electronic Components, industrial process automatic control systems and devices, computer software and hardware, Internet-of-Things electronic software and hardware research and development, wholesale, Technology Consulting, technical services, Import / Export and Related Supporting Businesses; Transfer self-developed technological achievements; and engage in after-sales service of the above-mentioned products.
System Integration Electronics (HangZhou) Co., Ltd	Development: New Electronic Components, Broadband access network communication system equipment, High-End Routers, High-end Switches, Servers and the above products and Parts; provide after-sales service; wholesale, Import / Export Business of the above products.
Innovative & Intelligent Factory Accelerator (Shenzhen) Co., Ltd	Technology business incubation services; Investment services; Investment services for other venture capital companies and other institutions or individuals; Venture investment consulting services; Provide entrepreneurial management services for startups; Participate in the establishment of venture capital enterprises and venture capital management consulting institutions; Conference services; Scientific research information consulting, industrialization supporting services; Business Management Consulting; economic information consulting; market research; property leasing. Property Management.
FORTUNE PRECISION OPTICS CO., LTD.	Management Consulting Services. Computers and Computing Peripheral Equipments Manufacturing. Wholesale of Computing and Business Machinery Equipment. Retail sale of Computing and Business Machinery Equipment. Photographic and Optical Equipment Manufacturing, Die Manufacturing. Wholesale of Precision Instruments. Retail Sale of Precision Instruments. Product Designing. International Trade.
Foxconn (KunShan) Computer Connector Co., Ltd.	Development and production for computers and computer peripheral equipment; Servers, Mobile Phones and network communications equipment; Audio-visual, film and television equipment, etc., as well as new electronic components of automobile electrical systems, optoelectronic devices, etc. New Electronic Components, Game Consoles supporting connectors ((Excluding the whole machine), instrument connectors and other New Instrument Components, fine stamping dies, precision cavity molds, Molds standard parts; cables and cable components; plastic pellets and their regeneration treatment; solar photovoltaic cell components; the following products are limited Branch Development: power adapters, communication transformers, static converters, storage batteries (batteries), testing equipment and the above-mentioned products and Parts and related software development, engaged in metal and plastic products, Packaging Materials, electronic and electrical components , Detection of environmentally hazardous substances, calibration and maintenance of measuring instruments, plastic dyeing and color matching, quenching and tempering, modification, Processing, providing relevant technology, management consulting; Sales of own Products.

Company Name	Business Scope
Foxconn (NanJing) Software Co., Ltd.	Computer Software product Development, Production and Sales; Digital Products development, development and Sales; planning software system and product development, research and development and overall integration planning supporting hardware Sales; computer software technology research, system introduction Consultancy Services, software foundry (On behalf of Processing), Software Testing; Computer and Communication Equipment leasing; Computer system integration, network information consulting management and digital content Design; Office equipment maintenance. We are engaged in commercial wholesale and Import / Export of similar products and computer consumable materials of our company. Business.
Foxconn Shenyang Precision industry Co., Ltd.	Development and after-sales service of LCD Monitors and related parts, automobile electronic parts, LED lights; lease of self-owned property rights workshops.
Foxconn Industrial Internet Co., Ltd.	Design, R&D, manufacturing and sales of various electronic equipment products, relying on the industrial Internet to provide intelligent manufacturing and technology service solutions for renowned global customers.
Foxconn Electrical Industry Development (Kunshan) Co.,Ltd.	Development and Production of computers and computer peripheral equipment, Servers, Mobile Phones and network communications equipment, audio-visual, film and television equipment, etc., as well as connectors, cable assemblies, optoelectronic devices, etc. of automobiles electrical systems. New Electronic Components, New Instrument Components, Precision Molds and its aforementioned products and Parts, Sales of Self-produced Products.
Foxconn Precision Components (ShenZhen) Co., Ltd.	Development and Production of electronic calculator and Parts interface equipment and connectors, New Electronic Components and power electronic components, New Instrument Components and materials, Precision Molds and accessories, New Displays, electronic Game Consoles, Micro-Computer and related components. Product 100% Export. Additionally: Development and Production of DVD read-only CD-ROM drive, CD burner CD-ROM drive and related components; CD read-only CD-ROM drive, CD-recorder CD-ROM drive and related components; DVD PLAYERS, portable DVD PLAYERS finished product and related components. Provide self-produced Product after-sales service. Own property leasing.
Foxconn Precision Electronics (TaiYuan) Co., Ltd.	Development and Production of New Electronic Components, Mobile Communication Systems and Digital Clustering System Equipment and its components, Electronic Products Testing Equipment, Digital Cameras and key components, Third Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones, core network equipment and networks Testing equipment and Molds related to the above-mentioned products. Provide relevant Technology Consulting and after-sales service, and sells the company's own products to engage in the import and export business of the above-mentioned related products; Business; various Mobile Phones maintenance business; LED display development, installation, maintenance business; Mobile Phones motherboard maintenance business.
Foxconn Precision Electronics (YanTai) Co., Ltd.	Development and Production of New Electronic Components, Mobile Communication Systems, base stations, Switching Equipment and Digital Clustering System Equipment and their parts and components, Electronic Products Testing Equipment, Digital Cameras and key components and Molds related to the above products, assembling LCD TVs and Digital TV Sets, provide related Technology Consulting and after-sales service, and sells the company's own products to engage in the import and export business of the above-mentioned related products; provide contract energy management services, engage in the wholesale of New Environmentally Friendly Energy-Saving Lamps Business; Electric and Non-electric Bicycles development, Design, Development, Processing, Sales.
Fuyou Wande Trading Limited Company	Food Operations (Sales ofPre-Packaged Food); import and export of goods; Class II Medical Equipment Development; Food Development; Food Operation; Beverage Development; Vending Machine Sales; technical services, technology development, Technology Consulting, technical exchanges, Technology Transfer, Technology Promotion; Advertising Design, agency; Advertising Production; advertising publishing (non-radio, television, newspaper publishing unit); Electronic Products Sales; Single-purpose commercial prepaid card agent Sales; Home Appliances Sales; Gas, liquid separation and purification equipment Sales; Second-Class Medical Equipment Sales; Mechanical Equipment Sales; Mechanical Equipment R&D; Labor Protection Products Development; Labor Protection Products Sales; Medical Staff Protective Products Retail; Medical Staff Protective Products Wholesale; Daily Masks (non-medical) Development; Daily Masks (non-medical), Second-hand Sales; Development (Class I Medical Instruments) of protective equipment for medical personnel; Manufacturing of special equipment for commerce, catering, and services; Sales of special equipment for commerce, catering and services.

Company Name	Business Scope
FOCAL TECH CO., LTD.	Wired Communication Equipment and Apparatus Manufacturing,Wireless Communication Equipment and Apparatus Manufacturing, Computers and Computing Peripheral Equipments Manufacturing. Wholesale of Computing and Business Machinery Equipment. Wholesale of Telecom Instruments. Wholesale of Computer Software. Retail sale of Computing and Business Machinery Equipment. Retail Sale of Telecom Instruments. International Trade, Management Consulting Services.. Software Design Services. Product Design. Telecom Radio Frequency Equipments and Materials Import, Retail Sale of Computer Software. .
FuHong Precision Components (ShenZhen) Co., Ltd.	Development and Production of various plugs and sockets, plastics, Molds and their parts and components, telecommunications connectors, computer network connectors, Instruments equipment, automatic manufacturing equipment for computer parts; 70% of the products are exported. Addiotionally: Development and Production of other New Electronic Components and electricity Electronic components, optoelectronic devices; 70% of the increased sales of products are exported. Development and Production of computer Mainframe components, computer heat sinks, Data Communication Multimedia Systems equipment. 70% of products are exported. Engaged in goods, Import / Export of Goods and Technology.
Fu Jia Zhichuang(Shenzhen) Technology Co.,Ltd.	Security Products and Parts, Servers, Memory, Network Switches, Routers, Video Equipment, Data Terminal Equipment, Modem, Wireless Terminal Equipment, Wired Terminal Equipment, Communication Network Equipment, Micro-Computer, Security Products and Parts, Data Lines, Electronic Products and Parts, calculator interface equipment, Speakers and Parts R&D, Sales; Industrial Internet software and hardware development, Design; Technology Consulting, Technology Transfer, technical services of database and computer network; Computer Software development; engaged in advertising business; Business Management Consulting; Memory, Network Switches, Routers, Video Equipment, Data Terminal Equipment, Modem, Wireless Terminal Equipment, Wired Terminal Equipment, Communication Network Equipment, Computer Software Technology Development, Technology Consulting, Technology Transfer, technical services; Operation e-commerce; Domestic Trade; Corporate Information Consulting; Electronic Products and Parts leasing; Import and Export Operations.Internet information services business.
Fu MinG Tuo property management (ShenZhen) Ltd.	Property Management; Self-owned House Leasing
XIX INC.	Electric Appliance and Audiovisual Electric Products Manufacturing, Lighting Equipment Manufacturing, Wired Communication Equipment and Apparatus Manufacturing, Wireless Communication Equipment and Apparatus Manufacturing, Computers and Computing Peripheral Equipments Manufacturing. Data Storage Media Manufacturing and Duplicating, Toys Manufacturing, Furniture and Installation and manufacturing industry, Electric Appliance Installation, Automation control equipment engineering, Computing Equipments Installation Construction., Computing Equipments Installation Construction., Kitchenware, Sanitary Equipment Installation Engineering Industry, Daily Necessities Wholesale Industry, Construction Materials Wholesale Industry, Wholesale of Household Appliance., Wholesale of Computing and Business Machinery Equipment., Wholesale of Computer Software., Retail Sale of Household Appliance. ,Retail sale of Computing and Business Machinery Equipment. ,Retail Sale of Computer Software. , Retail Business Without Shop-front, International Trade, Investment, Product Design. Landscape and Interior Design, Other Designs, Software Publication. Wholesale of Telecom Instruments. Retail sale of Telecom Instruments, Telecom Radio Frequency Equipments and Materials Import.
Fujintong Financial Information Service(Shanghai) Co., Ltd	Financial information services, business consulting, investment consulting, Computer System Integration, engaged in technology development, transfer, consulting, services in the field of network technology, Computers, Software and Supporting Equipment, Environmental Protection Equipment, Electronic Equipment, electronic equipment, electronic components, Mechanical Equipment, Communication Equipment, Sales of Mechanical Molds, Engaged in Import / Export of Goods and Technology.

Company Name	Business Scope
FuJin Precision Industrial (ShenZhen) Co., Ltd.	Development and Production of New Electronic Components, Precision Molds,Instruments, computer shells and various Mainframes and their stamping Hardwareplastic products; Micro-Computers, Multi-function Micro-Computers, Portable Computers, Notebook Computers, Multimedia Computers and Servers,Data Communication Multimedia Systems equipment, New Displays, New technology equipment supporting the communication network, Data and Language Translators, Routers, Communication and Network Related Cards, computer high-performance boards; and Parts, Mobile Phones and Parts of the above products. Engaged in computer-aided design, auxiliary manufacturing, auxiliary testing and other Application system, information communication network system and other application system technology development, Technology Consulting, After-sales Technical Services of own products.
Fu Jin Ji Network Science-Technology (Henan) Co., Ltd.	Computer network technology research and development, technical services, Technology Consulting; engaged in Import / Exports of Goods and Technology; Mechanical Equipment, Mechanical Equipment components, MoldsProcessing components, Metal Processing components, Automation Robots and components, LED lighting equipment, metal materials, Plastic materials, Chemical Products, Packaging Materials' Sales; Computer Software's technical development and Sales; Mechanical Equipment Leasing;, maintenance and technical services.
FU JIN JI NETWORK TECHNOLOGY CO., LTD.	Data Storage Medium Manufacturing and Duplicating, machinery installation, furniture, bedding, kitchen appliances, furnishings wholesale industry, Hardware wholesale industry, Wholesale of Molds, ceramic glassware wholesale industry, paint, coatings wholesale industry, dyes, pigments wholesale industry, industry Additives wholesale industry, plastic film, bag wholesale industry, chemical raw material wholesale industry, other chemical products wholesale industry, cosmetics wholesale industry, construction materials wholesale industry, Wholesale of Machinery, Wholesale of Household Appliance. Wholesale of Precision Instruments. Wholesale of Computing and Business Machinery Equipment. Wholesale of Weights and Measures,Wholesale of Telecom Instruments.,Pollution Control Equipment, Wholesale, Battery Distributor, Other Machinery and Appliances, Wholesale, Wholesale of automobiles, motorcycles, Wholesale, Wholesale of Motor Vehicle Parts and Supplies. Bicycles and parts wholesale industry, tire wholesale industry, ship and its parts wholesale industry, aeronautical and parts wholesale industry, rail vehicles and their parts wholesale industry, other transportation vehicles and their parts wholesale industry, Jewelry and precious metal wholesale industry, photographic equipment wholesale industry, fire safety equipment wholesale industry, Wholesale of Computer Software., Wholesale of Electronic Materials, recycled materials wholesale industry, other wholesale industries, furniture, bedding, kitchen appliances, furnishings retail, hardware retail, daily necessities retail, plastic film, bag retail, construction materials retail, petroleum products retail ,Retail Sale of Household Appliance. Retail sale of Computing and Business Machinery Equipment. Retail Sale of Precision Instruments. Retail Sale of Telecom Instruments. Machinery and appliances retail,battery retail, Other Machinery and appliances retail, automobiles retail, Motorcycle Retail, Automobile, Motorcycle Parts and Equipment Retail, Bicycles and Parts Retail, Tire Retail, Jewelry and Precious Metal Retail, Retail Sale of Computer Software. Retail Sale of Electronic Materials. ,Retail sale of Others, Retail Business Without Shop. International Trade, Software Design Services., Data Processing Services., Digital Information Supply Services., Leaflet Distribution, Product Designing. Other Automobiles Service Industry, Electric Appliance and Audiovisual Electric Products Repair Shops, Other Repair Industry, Exhibition Servi ces.,Rental and Leasing Business.
Fuyu Energy Technology (Kunshan) Co., Ltd.	Engaged in the research and development of solar frame, photovoltaic bracket, ground pile and its parts, metal fasteners, automobile parts, commercial wholesale and Import / Export Business. Solar Photovoltaic Power Generation related project investment and construction and power operation Sales (installed capacity 4MW) , Contract energy management, Energy-Saving Products and system integration, Sales of Self-produced Products; Solar photovoltaic system integration and construction installation, Photovoltaic Power Generation Technical Consulting Services.
Fuyu (Funing) Energy Technology Co., Ltd.	Research and Development, Processing, assembly of Solar Cells, Photovoltaic application products and related components.
Fuyu properties (Shanghai) Co., Ltd	On the 2/1 mound plot of 293 Neighborhood, Huacao Town, Minhang District, engaged in: Real Estate Development, Sales, Self-owned House Leasing,Property Management and related services.

Data Storage Media Manufacturing and Duplicating,Wholesale of Computer Software.,Retail Sale of Computer Software. ,Retail sale of Others,Retail Business Without Shop. ,Other Consultancy, International Trade,Intellectual Property. ,Investment Consultancy,Management Consulting Services. ,Other Consultancy. ,Software Design Services. ,Data Processing Services. ,Digital Information Supply Services. ,the third party payment,General Advertising Services. , Leaflet Distribution, network certification service industry, Market research and survey industry,Other Industry and Commerce Services Not Elsewhere Classified. .
FuZhun Precision Tooling (HuaiAn) Co., Ltd.	R&D and Processing precision die, precision cavity mold, Molds standard parts; Electronic-specific Equipment, tester, Tooling; computer plastic shell components, computer metal shell components and other New Electronic Components and their accessories and related software development, Sales of Self-produced Products.
FUZHUN PRECISION TOOLING (JIASHAN) CO.,LTD	Electronic components and electromechanical component equipment manufacturing; metal tool manufacturing; industrial automatic control system device manufacturing; CNC machine tool manufacturing; electronic measuring instrument manufacturing; Industrial Robots manufacturing; Special task Robots manufacturing; Service consumer Robots manufacturing; Intelligent Robots research and development; Intelligent control System integration; industrial control system and system manufacturing; computer software, hardware and peripheral equipment manufacturing; audio equipment manufacturing; Home Appliances manufacturing; environmental protection equipment manufacturing; plastic products manufacturing; metal material manufacturing; non-ferrous metals alloy manufacturing; Molds manufacturing ; Non-ferrous metals calendering Processing; mechanical parts, parts processing; artificial intelligence general application system; special equipment repair; general equipment repair; Electronic Equipment repair; automated overhead three-dimensional storage equipment, digital audio (video) encoding and decoding equipment manufacturing. Class II Medical Equipment Development; Class III Medical Equipment Development; import and export of goods.
FuJin Precision Industrial (JinCheng) Co., Ltd.	Development, Design, Development and Sales of Precision Molds for electronic components, precision components for automated machinery, metal Molds, and other industrial precision molds; Development, Production and SalesSemiconductors special materials for components, New Electronic Components, Electronic-specific Equipment, standardization and refinement of ceramic raw materials and precision plastic products, provide after-sales service; Digital Cameras and key parts development.
FuTaiJing Precision Electronics (BeiJing) Co., Ltd	Development of LCD TVs, New Electronic Components, mobile communication systems, base stations, Switching Equipment, Digital Clustering System Equipment and its components, Electronic Products Testing Equipment, Digital Cameras and key parts, Molds of the above products; Development of Medical Equipment (Class III): non-invasive blood glucose meters; LCD TVs, New Electronic Components, mobile communication systems, base stations, Switching Equipment, Digital Clustering System Equipment and its components, Electronic Products Testing Equipment, Digital Cameras and key parts, the research and development of Molds for the above products; Entrusted Development (Level I) unmanned Flying aircraft and accessories, household electronic appliances, Environmental Protection Equipment and accessories, Smart Wearable Devices and other electronic equipment, office electronic appliances, Computers, Communication Equipment, Electronic Products, Mobile Phones, Home Appliances, radio and television receiving equipment and equipment, automobiles Parts and accessories, Robots, Mechanical Equipment; Sales of Self-produced Products; provide technical services, Technology Consulting, technical training for the above products; LCD TVs, electronic equipment and their raw materials, wholesale, Commission Agent and Import /Export of parts Business. (Development Medical Equipment III category: non-invasive blood glucose meters and projects subject to approval according to law, after approval by relevant departments, carry out Operation activities in accordance with the approved content.)
Futaijing Precision Electronics Yantai Co., Ltd.	R&D and Processing of New Electronic Components, Mobile Communication Systems (including Mobile Phones), Digital Clustering System Equipment and its components, Electronic Products Testing Equipment, Digital Camera Modules and key components, Electronic Products components, Sales of Self-produced Products And provide self-developed Technology Consulting, technical services; electronic equipment and its raw materials, wholesale of parts and components and its Import/Export.

Company Name	Business Scope
FuTaiKang Electronics Development (YanTai) Ltd.	Research and development of large and medium-sized electronic Computers, portable electronic Computers, Industrial Computers, New Electronic Components, Electronic-specific Equipment, New Instrument Components, fine blanking dies, Molds standard parts and parts of the above products; research, development and SalesHigh-End Routers, Network Switches, large-capacity optical (magnetic) disk drives and their components, Digital Cameras and key components, Integrated Circuit, System Integrated Circuit, operating system, software system, Servers, Game Consoles, Mobile Phones and other product appearance Design and mechanical parts Structure Design, automobiles, motorcycles Molds, fixture Design; information technology consulting and services; import and export of goods and technology, agent Import/Export; transfer of own research and development results.
FuTaiKang Precision Components (ShenZhen) Co., Ltd	Development and Production of various New Electronic Components and Tooling, various printed Circuit Boards, power plugs, sockets and computer peripherals. 70% of the products are exported. Increase: Development and Production of electronic Game Consoles, digital audio, video systems and their accessories (Excluding TV Sets) , and Nationally Regulated Products), Micro-Computers, computer Mainframe and related stamping hardware, plastic parts and components. 100% of digital audio, video systems and their parts and accessories are sold abroad; 70% of other products are sold abroad. Add: Development and Production of Data Communication Multimedia Systems equipment, new technology equipment supporting the communication network and Mobile Phones and Parts. Increased sales of 5% of products for export. Increased: Development and Production of data and voice switches, Routers and related accessories, engaged in information and communication system network technology development, Technology Consulting, provided Self-produced product After-sales Technical Services; 70% for export.
Futaijie Technology Development (Shenzhen) Co., Ltd.	Research and development of Mobile Phones and Parts, Gaming Consoles and Parts, Electronic Products and Parts; electronic components, computer hardware and software and Parts, Electronic Products and Parts, Mechanical Equipment and Parts, gaming equipment, Chemical Products (excluding hazardous chemicals) Research and development, wholesale, Technology Consulting, Import / Export and Related Supporting Businesses (not involving state-owned trade management products, products that involve quotas, authorization management and other special regulations, apply in accordance with relevant national regulations), transfer self-developed technological achievements And after-sales service of the above products; import and export of goods and technology (excluding distribution, state-owned exclusive control products); corporate management information consultation; self-owned property lease (only the company's legal real estate certificate can be used for Operation); to undertake services Outsourcing methods are engaged in system application management and maintenance, information technology support management, financial settlement, data processing outsourcing services; non-ferrous metals (Solder Paste, tin bars, tin ingots and other tin materials, copper rods, copper strips, phosphor copper balls , Copper foil, copper alloy and other copper materials) Sales; disposable ordinary medical masks, N95 masks, wholesale, Import / Export and Related Supporting Businesses (not involving state-owned trade management commodities, involving quotas, licenses, and forehead thermometers) For products managed by management and other special regulations, apply according to relevant national regulations); the research and development of the overall solution of the smart factory system design; the development of intelligent development lines, the research and development of smart manufacturing equipment, Design; energy and energy-saving technical services, development and Production of Mobile Phones and Parts, Gaming Consoles and Parts, Electronic Products and Parts; electronic components and parts, computer software and hardware and Parts, Electronic Products and Parts, Mechani Repair business of cal Equipment and Parts.

Company Name	Business Scope
FuTaiHua Industrial (ShenZhen) Limited	Design, Development and Production of Game Consoles and Parts, Pneumatic Control Components, Mobile Power, Mobile Phones, Mobile Communication Systems and Parts, Computer Motherboards and Peripherals, Hardwareplastic products, Precision Molds, Micro-Computers, Portable Computers , Notebook Computers, Data Communication Multimedia Systems, New Displays, Digital Audio and Video Systems. Engaged in non-quota authorization management, Export of Purchases Non-Franchised Products, Packaging Business. Development Operation, large and medium-sized electronic computers, LCD screens and Parts; environmental protection (Sewage treatment) facility operation; Development and Production of mobile communications equipment (including wearable) (Longhua branch only), auto parts (Longhua branch only), Sales point information management system (POS machine) (Longhua branch only) , Smart pen (Longhua branch only); wholesale.DevelopmentProcessing wireless communication tester for abrasive materials, Toys.Digital Products, Electronic Products, computer software and hardware and its auxiliary equipment, Home Appliances, after-sales consultation and on-site installation and maintenance ; Engaged in the research and development of similar products and computer software and hardware of the above products, intelligent equipment, intelligent Electronic Products, First-Class Medical Equipment, smart home equipment software and hardware, sanitary ware, Furniture, wholesale, Technology Consulting, technical services, Import / Export and Related Supporting Businesses (not involving state-owned trade management commodities, commodities involved in quotas, authorization management and other special regulations, apply in accordance with relevant national regulations); transfer self-developed technological achievements. Nursing services for senior citizens, nursing consultation (not involving nationally restricted or prohibited items such as elderly care institutions, medical care, accommodation, catering services, etc.). Catering management; catering services.
FuTaiHua Precision Electronics (ChengDu) Co., Ltd.	Wearable smart devices, projection equipment and and Parts Manufacturing, R&D, Sales and technical services; engaged in Sheet Metal Products Molds, non-Sheet Metal Products Molds, folder Fixtures, inspection and calibration of Fixtures and Parts and Design and manufacturing; engaged in information communication network systems and others Technical development and consulting of application systems; Packaging Business; Warehousing and Storage services; engaged in cutting, bending, welding and processing of various steel plates and aluminum (profile) materials; engaged in the development, development, maintenance and after-sales of Automation Equipment and Components Services; Electronic Products, Digital Products, computer software and hardware and its auxiliary equipment, wholesale and retail of Home Appliances; technical services and after-sales consulting, installation and maintenance services; wholesale, Import/Export and related supporting services for similar products of the above products; Provide after-sales service of self-produced products and Componentstechnical services;Mechanical Equipment Leasing;;Design,Production,agency, Advertising;Photography and video services;corporate marketing planning;Decorative engineering Design and construction;Organize and plan cultural and artistic exchange activities;Graphic Design and Production ;Business Management Consulting; Educational Consulting; Human Resources Intermediary Services; Quality Inspection Technical Services; Development and Sales of Type II Medical Equipment; Development and Sales of Daily Masks (Non-medical); Processing, Manufacturing, Wholesale and Retail of Plastic Products; Recycling and utilization of renewable resources.
FuTaiHua Precision Electronics (ZhengZhou) Co., Ltd.	Production and Operation of Third-Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones, base stations, core network equipment and network detection equipment and their components, new electronic components and their accessories; digital audio, video codec equipment and parts ;Research And Development Of Metal, Non-Metallic Materials and Products, heat treatment and surface treatment process research and development, product mold design and manufacturing; development, preparation and application of consumables for processing. Engaged in Engaged in bonded warehousing logistics, maintenance inspection and After-sales service business; house leasing.

Company Name	Business Scope
Futaihua Precision Electronic (Jiyuan) Co., Ltd.	Production and Operation of Third-Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones,base stations,core network equipment and network detection equipment and their components,New Electronic Components,digital audio and video decoding equipment and their Components are engaged in the research ;Automation Equipment detection and research and development, precision motion control, mechanism simulation, opto-electromechanical control system, artificial intelligence application integration technology research, realize intelligent manufacturing SCADA/BCS, M2M, intelligent decision control, machine learning diagnosis and prediction, green energy-saving management The introduction, optimization, and promotion of core application systems; the development and introduction of key modules/equipment such as precision and flexible assembly and inspection of small components, automatic detection of product appearance/size/structural defects; mobile communication system Mobile Phones research and development and related software and hardware research and development, testing, System integration, application services and related technical services; engaged in the Design and manufacturing of Metal / Non-Metal Products Mold; and the maintenance and Warehousing and Storage services of the above products.
FuNeng New Energy Technology (Nanyang) Co., Ltd.	Provide technical diagnosis of energy consumption and design of energy-saving projects, technical energy-saving transformation of lighting system, professional services of operation and maintenance management; New Energy technology service field and planning and technical services of energy-saving and intelligent products, and energy-saving project transformation projects.
FLNET CO., LTD.	Computing Equipments Installation Construction.,Computing Equipments Installation Construction, Wholesale of Computing and Business Machinery Equipment, Wholesale of Telecom Instruments, Wholesale of Computer Software, Wholesale of Electronic Materials,Retail sale of Computing and Business Machinery Equipment, Retail Sale of Telecom Instruments, Retail Sale of Computer Software, Retail Sale of Electronic Materials, Retail sale of Others, Retail Business Without Shop,Other Consultancy, International Trade, Restrained Telecom Radio Frequency Equipments and Materials Import,Telecommunications Number Agencies, Other Industry and Commerce Services Not Elsewhere Classified, Warehousing and Storage,Cargoes Packaging,Wholesale of Stationery Articles, Musical Instruments and Educational Entertainment Articles, Retail sale of Stationery Articles, Musical Instruments and Educational Entertainment Articles, Other machinery and appliances wholesale, retail, Retail Sale of Household Appliance, Wholesale of Motor Vehicle Parts and Supplies, Automobile, motorcycle parts and equipment retail industry, Battery Distributor,battery retail,General Advertising Services, Leaflet Distribution,Arts and Literature Service.,Agency Services,Rental and Leasing Business. ,Software Design Services. ,Data Processing Services. , network certification service industry.
FuDing Precision Components (ShenZhen) Co., Ltd.	Development and Production of various plugs and sockets, Plastic Products, Molds and their parts and components, telecommunications connectors, instrumentation equipment, New Electronic Components; 70% of the products are exported. R&D, DevelopmentOperationMobile Phones and Parts, all kinds of power distribution switches, Bluetooth speakers, wireless Audio and video sharing device, carton, foam, non-standard Automation Equipment, automatic optical inspection equipment, Automation Equipment; wholesale, Import/Export, Technology Consulting, technical services and related supporting services for the above products and Components, accessories and similar products; transfer Self-developed technical achievements; door-to-door installation and maintenance service and after-sales service of the above products.
FIH (TIANJIN) PRECISION INDUSTRY CO., LTD.	Development, Processing, Sales and Maintenance Third Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones, New Electronic Components, Mobile Communication Systems, base stations, Switching Equipment and Digital Clustering System Equipment and their parts, Electronic Products Testing Equipment, Digital Cameras and key parts and Molds related to the above products, and provide related Technology Consulting and after-sales service; Self-owned Factory Lease.
FIH (NANJING) COMMUNICATION CO.,LTD.	3G and Subsequent Generations of Mobile Communication Systems and Mobile Phones development and manufacturing, Computers, Mobile Phones related software and hardware development and testing, system integration, application services and related technical services; 2G/3G Mobile Phones, smart Mobile Phones, Network Cards, tablets Computer and other communication products, Import/Export, wholesale, Commissioning Agents and related supporting services of communication modules and software.

Company Name	Business Scope
Fih (Nanjing) Intelligent Technology Co., Ltd.	4G and subsequent Mobile Communication Systems terminal product development and manufacturing; Computers, Mobile Phones related software Hardware Development testing, system integration, application services and related technical services; Smart Mobile Phones, Internet-of-Things terminals, smart hardware, tablet computers, etc. Communication system products, communication modules and software, Import/Export, wholesale, Commissioning Agents and related supporting services of electronic components.
FIH CO., LTD.	Management Consulting Services, Wholesale of Telecom Instruments, Retail Sale of Telecom Instruments, Wholesale of Electronic Materials, Retail Sale of Electronic Materials, Product Designing, Software Design Services, Restrained Telecom Radio Frequency Equipments and Materials Import.
Fuzhikang Precision Components (BeiJing) Co., Ltd.	New Instrument Components, Precision Molds, Computers, mobile communication systems and related accessories; research and development of New Instrument Components, Precision Molds, Computers, mobile communication systems and related accessories; Sales of Self-produced Products and similar products in wholesale, retail, Commissioning Agents business; import and export of goods, agent Import/Export, Import / Export of Goods and Technology. Development of air Purification Equipment, medical laboratory and medical disinfection equipment and appliances.
Fuzhikang Precision Electronics (LangFang) Co., Ltd.	Development, Processing of New Electronic Components; Mobile Communication Systems, Mobile Phones, base stations, Switching Equipment and Digital Clustering System Equipment and their parts; Portability Micro-Computers, Lightweight Flat Panel Monitors and their parts; Electronic Products Testing Equipment; Digital Cameras and their key parts, multimedia Electronic Products, electronic equipment and their parts manufacturing; Automation Equipment, Electronic-specific Equipment manufacturing and equipment maintenance; Precision instruments, Robots equipment and machinery Processing and Parts manufacturing; Automobiles parts and accessories manufacturing; and Molds, Fixtures, inspection tools related to the above products, and provide related testing services and self-developed technical services, Technology Consulting, technical training and after-sales service; Sales of the company's own products; similar products and own product Cutting Tools, wholesale, Import/Export, Commissioning Agents business of consumables.
Mobile Drive Technology Co., Ltd.	Wired Communication Equipment and Apparatus Manufacturing,Wireless Communication Equipment and Apparatus Manufacturing,Electronic Parts and Components Manufacturing,Computers and Computing Peripheral Equipments Manufacturing.,Photographic and Optical Equipment Manufacturing,Electric Appliance Installation,Computing Equipments Installation Construction.,telecommunications engineering industry, ,Wholesale of Household Appliance. ,Wholesale of Computing and Business Machinery Equipment.,Wholesale of Telecom Instruments. ,Wholesale of Computer Software.,Wholesale of Electronic Materials,Retail Sale of Household Appliance. ,Retail sale of Computing and Business Machinery Equipment. ,Retail Sale of Telecom Instruments. ,Retail Sale of Computer Software. ,Retail Sale of Electronic Materials. , International Trade,Restrained Telecom Radio Frequency Equipments and Materials Import,Intellectual Property. ,Software Design Services. ,Data Processing Services. ,Digital Information Supply Services. ,General Advertising Services. .
Foxconn Intelligent Manufacturing (Fujian) Digital Technology Co., Ltd.	Information science and system scientific research services; electronics, communication and automatic control technology research services; Internet-of-Thingstechnical services; business management consulting service; cloud platform services; artificial intelligence industry application systems; information technology consulting services; network and information security software Development; software operation and maintenance services; intelligent management system development and application; intelligent logistics system services; Application software development; Engineering Project Management services; Computers, Software and Supporting Equipment wholesale; other communications equipment wholesale; other Mechanical Equipment and Electronic Products wholesale; network and information Security hardware Sales; product sales agency; other trade brokers and agency services; Medical Equipment Sales.
Fuxiang Private equity investment fund joint venture	Equity investment, industrial investment, investment consulting, investment management, Business Management Consulting, Corporate Information Consulting.

Company Name	Business Scope
FuXiang Precision Industrial (KunShan) Co., Ltd.	R&D, Processing New Electronic Components (new electromechanical components); New Instrument Components, Precision Molds, Tooling; portable computers and components; Electronic-specific Equipment, Testing Equipment, CNC machine tools with more than three-axis linkage, digital control system and servo clothing , Digital TV Sets, new flat-panel Monitors, digital sound reproduction equipment, digital audio, video codec equipment, touch systems, smart home equipment, medical equipment and equipment, video recording and playback equipment, communication system equipment, smart consumer equipment and its and Development of Parts and related software; PC+ABS, halogen-free flame-retardant PC+ABS, PC+ABS+glass fiber, ABS+PMMA, ABS+PET and other plastic alloys; reuse of waste plastics; Sales of Self-produced Products.
FuHuaJie Industrial (ShenZhen) Limited	DevelopmentOperationMultimedia Phones, Packaging Business, portable Micro-Computers, new flat monitors, computer-assisted Design, auxiliary testing, printers, Mobile Phones, Digital Audio and Video Systems, printer ink cartridges, digital cameras and Components, Game Consoles. Similar products and Wholesale, Import / Export and Related Supporting Businesses of optoelectronic products, solid-state lighting sources (LED and similar products), lamps and accessories.
FU HUAKE PRECISION INDUSTRY (SHENZHEN) CO. LTD.	Electronic information technology, network and communication technology software product development Design; graphic image recognition and processing system development; software product development; wireless local area network (including support for WAPI), wide area Network Equipment development; mobile communication system Mobile Phones, base stations, Development of core network equipment and network testing equipment.
FuhuaKe Precision Industry (GuiZhou) Co., Ltd.	Development and Production Consumer Electronic Products motherboards, Power Boards, Photovoltaic Panels, Drive Boards, Light Strips and related Parts; Consumer Electronic Products and Spare Parts, Sales of surface adhesive technology equipment; Inspection, maintenance and sales of self-produced products After-service. Engaged in Sales, Import / Export and Related Supporting Businesses.equipment leasing services of the above products and Parts, general goods.
FUGUIKANG PRECISION ELECTRONS (GUIZHOU) CO., LTD.	R&D, Development and Sales, medium and large TVs, medium and large computers, Portable Computers, Desktop Computers, Multimedia Data Processors, Mobile Communication Systems and Equipment, New Electronic Components, Electronic Whiteboards, Video Wall, New Energy, Energy-Saving Products, LED LAMPS, Solar Lighting System, Smart Light Pole, Smart Internet-enabled Multimedia Machines, New Generation Game Consoles, Digital Electronic Products, Smart Monitoring Devices, Servers, Automatic Optical Switching Network Equipment, high-speed Storage Systems and intelligent storage devices, network signals The analyzer and the peripheral products of the above products and related and Parts, software and hardware application systems integration, and after-sales Repair Services research and development, manufacturing, testing, installation, maintenance LED DISPLAY PRODUCTS, Transformations for Lighting Systems, urban lighting intelligent control system contracts Energy management EMC. Import/Export, wholesale and related supporting businesses of non-self-produced products. Environmental protection facility operation, Environmental Technology Services, commission to provide labor services (excluding queuing services, agency services, foreign labor service cooperation).
FuYang Soleros Technology(NANAYNG) CO., LTD	Photovoltaic Power Generation; investment, procurement, sales, and management of New Energy projects such as Photovoltaic Power Generation, system integration, and related supporting facilities, equipment; and related technology development and application, consulting services; investment management and investment consulting.

Company Name	Business Scope
Fu Ji Yun(Shenzhen) Technology Co.,Ltd.	Industrial Automation Engineering Technology R&D Design; Security Products and Parts, Servers, Memory, Network Switches, Routers, Video Equipment, Data Terminal Equipment, Modem, Wireless Terminal Equipment, Wired Terminal Equipment, Communication Network Equipment, Micro-Computer, Security Products and Parts, Data Lines, Electronic Products and Parts, calculator interface equipment, Speakers and Parts R&D, Sales; Industrial Internet software and hardware development, Design; Database and computer network Technology Consulting, Technology Transfer, technical services; Computer Software Development; engaged in advertising business; Business Management Consulting; Memory, Network Switches, Routers, Video Equipment, Data Terminal Equipment, Modem, Wireless Terminal Equipment, Wired Terminal Equipment, Communication Network Equipment, Computer Software Technology Development, Technology Consulting, Technology Transfer, technical services; Operation e-commerce; Domestic Trade; Corporate Information Consulting; Mechanical Equipment and components, Molds Processing components, metal Processing components, automation Robots and components, LED lighting equipment, metal materials, plastic materials, Sales of Packaging Materials; Mechanical Equipment leasing, exhibition and display planning; manufacturing industry technology development and consulting; corporate marketing planning; education and training; information consulting; Electronic Products and Parts leasing; Import and Export Operations. Construction engineering, computer equipment, communication lines, monitoring equipment and related Product leasing, on-site installation, on-site maintenance, network wiring engineering, communication engineering, monitoring engineering Des Ign and construction. Automation Equipment, Industrial Robots, automation component technology Development, Production and Sales; electronic certification services; Internet information services business.
FUMENG ELECTRONICAL TECHNOLOGY (HEZE) CO., LTD	R&D, Development, Processing are used for electronic connectors, cable components, New Electronic Components, New Instrument Components for computers and computer peripheral equipment, Servers, network communications equipment, audio-visual, film and television equipment, and automobiles electrical systems; the above products and Parts and related Software development; Sales of Self-produced Products.
Fu Sheng Optoelectronics Technology(Kunshan) Co., Ltd	Development and manufacturing of optoelectronics technology, Technology Transfer, Technology Consulting, technical services, optical communication modules, high-speed connectors and cables; development and testing of New Energyautomobiles charging systems, Sales of Self-produced Products; Optoelectronics Sales of the product.
FuDing Electronic Technology (JiaShan) Co., Ltd.	Electronic components and electromechanical component equipment manufacturing; CNC machine tool manufacturing; electronic measuring instrument manufacturing; Industrial Robots manufacturing; Special operation Robots manufacturing; Service consumer Robots manufacturing; Intelligent Robots research and development; Computer software and hardware and peripheral equipment manufacturing; Industrial control computers and System manufacturing; audio equipment manufacturing; Molds manufacturing; mechanical parts and parts Processing; artificial intelligence general application systems; daily masks (non-medical) Development; labor protection products Development; sewage treatment and recycling; intelligent Robots manufacturing; Manufacturing of intelligent storage equipment; manufacturing of digital audio and video encoding and decoding equipment (except for the projects that must be approved according to the law, the operation activities shall be carried out independently with the business license in accordance with the law). Licensed items: Class II Medical Equipment Development; Type III Medical Equipment Development; Medical Mask Development.
FuDing Precision Industrial (ZhengZhou) Co., Ltd.	Development and Production of New Electronic Components, electronic special materials, Electronic-specific Equipment, Testing Equipment, Tooling, portable Micro-Computers, High-End Routers, high-end Servers, Computer Digital Signal Processing Systems and Boards, Solar Cells, third generation and Subsequent communication systems Mobile Phones, Digital Audio and Video Decoding Devices, digital sound reproduction equipment, automobile electronic devices and parts of the above-mentioned products; Design and manufacturing of metals and non-Sheet Metal Products Molds; Development of high-tech non-ferrous metals materials; Scrap Plastic digestion and reuse; Sales of Self-produced Products; Development and DevelopmentOperationAutomation Equipment, related and Parts, and equipment maintenance and after-sales service.

Company Name	Business Scope
Rich Dreams Network Technology (Hangzhou) Limited	Sevices:computer software and hardware technology development, technical services, Technology Consulting, Technology Transfer, entrusted to engage in product inspection, testing, and proofing services (for qualifications involving qualification certificate Operation); Sales (including online Sales): computer software and hardware, photographic equipment, electronic components, hardware and electrical equipment, Sales of office supplies, Ceramics, Handicrafts, Mobile Phones and Accessories, auto parts, Electronic Products (except special control), Toys (except analog Toys); trust enterprise asset management; import and export of goods and technology.

Research and Development, Production and Sales of LCD TVs, Digital TVs, LCD Modules, Electronic Whiteboards, Precision Optical Lenses, Optical Components, Glass Components, Lens Components, Camera Modules, Smart Monitoring Devices, Large Computers, Portable Computer, Desktop Computer, Multimedia Data Processors, Mobile Communication System and Equipment, New Electronic Components, Video Wall, New Energy, Energy- Saving Products, LED Lamps, Solar Lighting Systems, Smart Lighting Poles, Smart-Multimedia Network Machines, New Game Console , Electronic DigitalProducts and Supporting Products of the Abovementioned Products and Related Parts, Software and Hardware Application Systems Integration, After-sales Maintenance Services. Research and Development, Manufacturing, Testing, Installation, Maintenance of LED Display Products. Energy-Saving Renovation of Lighting Systems, Urban Lighting Smart-Control Systems, Contract Energy Management EMC. Wholesale, Import / Export of Related Product Categoriesof the above Products and Related Supporting Operations.
FOXNUM TECHNOLOGY CO., LTD.	Research, Design, Development, Manufacturing and Sale of: 1.Servo Drive Systems (Including permanent magnet synchronous servo, high-speed spindle motor, permanent magnet servo drive, induction servo drive) 2.digital control system (Includes Controller,Injection Molding Machine Controller) 3.Injection Molding Machines (Including all-electric, composite, light guide plate high-speed injection machine)4.Smart Home Appliances. Business items and codes to which the above products belong: Machinery and Equipment Manufacturing ,Electric Appliance and Audiovisual Electric Products Manufacturing ,Computers and Computing Peripheral Equipments Manufacturing.,Ship and Parts Manufacturing,Automobiles and Parts Manufacturing,Motor Vehicles and Parts Manufacturing, Bicycles and Parts Manufacturing,Product Designing. , International Trade.
Zhengzhou Yongyang Testing Services Co., Ltd	Inspection and Inspection Technical Services and Related Technical Consulting Services; Research and Development of Inspection and Testing Equipment,Technologies and Methods; Sales and Maintenance of Testing Equipments;Electronic ProductsTesting and sales of protective films and adhesives; sales and maintenance of testing and analysis equipment and instrument accessories; sales and maintenance of Digital Electronic Products.
ZhengZhou Justa Logistics Co., Ltd	Freight Station Operations (Warehousing Services, Freight Forwarding, Freight Agency); Self-Inspection; Domestic Trade; Import / Export of Goods andTechnology; Trade Consulting Services; Maintenance and Testing of Electronic Products and Components.
Zhengzhou Jusda Industrial Park Development Co., Ltd.	Warehousing Facilities and Related Supporting Facilities, Construction, Operation and Management of Industrial Facilities, Related Consulting Services;;Supply chain management;Warehousing Services;international freight forwarding agency;Freight;Customs Declaration and Inspection Agency; Import / Exports of Goods and Technology;Electronic Online Sales Of Products, Food, Etc;Technical Research and Development, Design and Consultation of Logistics Information Consulting and Logistics Software; Wholesale, Import / Export of Medical Equipment and Devices, Cosmetics and Prepackaged Foods.
Zhengzhou Zhunxuntong technology Co., Ltd.	Computer Software and Hardware Technology Development, Technical Consulting, Technology Transfer, Technical Services; Information Technology Research And Development; Information Consulting, Business Management Consulting (Except Stocks, Securities, Futures, Finance), Logistics InformationConsulting and Related Consulting Services; Customs Declaration, Online Trade, Supply Chain Management and Related Supporting Services; E-Commerce, International and Domestic Trade and Related Services; Customs Solutions; International and Domestic Freight Forwarding and Logistics Related Services.
Zhengzhou Airport Economic comprehensive Experimen	Handling Various Micro-Loans; Handling Consulting Services for the Development, Management, and Finance of Small-to-Medium-Sized Enterprises; andother Businesses approved by the relevant Provincial Authorities.
Zhengzhou Fuyu Occupation training school	Processing Center Operators, Painters, Electronic Equipment Assembly Workers, User Communication Terminal Maintenance Personnel, E-CommercePersonnel.
Zhengzhou Fuyusheng Energy Technology Co., Ltd.	Solar Photovoltaic System Integration Technology Development and Application; Solar Photovoltaic Grid Power Generation and Sales.
Zhengzhou Fuyucheng Agricultural Biotechnology Co., Ltd.	Development and Application Advanced Technologies , or Cultivation Of Vegetables, Fruits and Flowers (Including Soil-less Cultivation); Development, Promotion and Consultation of Agricultural Technology; Wholesale and Retail of Prepackaged Food.

Company Name	Business Scope
Zhengzhou Fulian Intelligent Workshop Co., Ltd.	Application software development; Internet information services; industrial Internet data services, artificial intelligence technology, information technology, intelligent factories, visual inspection, intelligent optoelectronics and voice recognition system technology, data control systems, servo systems and intelligent software and hardware, energy environmental safety Fmcs, employee service platform love pocket (personnel administration, shopping), management service software and hardware (LED, automatic storage) research and development, design, sales and after-sales service.
Zhengzhou WanmaYun Elec. Technology Co., Ltd.	Technical Research and Technical Services for Electronic Products, technical development, Technology Transfer, Technology Consulting; Mobile Phonesand mobile communications equipment technology development, Sales and Development (branch operation); filming and camera services; Electronic Products, Own Car Rentals; Exhibition services; Office equipment salessSale and leasing; Electronic Productsafter-sales service; Room booking services, accounting services; Design,Production,agency, Advertising,Graphic Design; Education consultation (Excluding classes and training); Wholesale and Retail: Mechanical Equipment,electronic components,hardware and electrical equipment,Electronic Products,Digital Products,Stationery, camera equipment, Computer Hardware and Software and Supporting Equipment,Cosmetics and Hygiene Products,sporting goods, textiles, clothing,Leather Products, Daily Goods,Furniture,Jewelry, contraceptive equipment (excluding contraceptive pills), vegetables and fruits, Home Appliances,Arts And Crafts, Primary edible agricultural products, Watches Glasses, Toys, Electric vehicles, Bicycles and related accessories, automobiles and motorcycles Accessories, Instruments, Ceramics, rubber and plastic products, Floral, decorative materials, communications equipment;Pre-Packaged Food (Including refrigerated and frozen Food), Health Food, Milk Formula; Publishing; Business Management Consulting;Food Delivery;Cultural and arts events planning; Corporate Information Consulting(Excluding Finance, Securities and Futures);Ticketing Agency and Travel Information Consultation;Import / Export Businesses of Goods And Technology.
Zhengzhou Yu teng Precision Technology Co., Ltd.	Technical Research and Development, Design, Processing, Production and Sales of Metal Parts and Glass Products; Mechanical Equipment Leasing, House Leasing; Import / Export of Goods and Technology.
Zhengzhou HongRen Cutting Tool Ltd.	Diamond Tool Production and Sales; Diamond Tool Inspection and Maintenance Services; Cutting Tool Design, Production, Sales, Testing, Maintenance and After-sales Service; metal surface processing technical services; Import / Export of Goods and Technology.
Kaopu Information Technology (Beijing) Co., Ltd.	Technology development, technology transfer, technology promotion, technology consultation, technical service; warehousing services (excluding hazardouschemicals); commission to provide labor services (excluding queuing services, escort services, foreign labor service cooperation); machinery equipment leasing; domestic road freight forwarders; sales of mechanical equipment, electrical equipment, electronic components, hardware, chemical products (excluding hazardous chemicals and class 1 chemicals), tires, lubricants; organization of cultural and art exchange activities (excluding performances, chess and cards) Room); conference services; contractor exhibition display; corporate image planning; stage art modeling planning; corporate management consulting; corporate marketing planning; business information consulting; computer graphic design, production; design, production advertising; general freight, special cargo transportation (container).
Kaopu Information Technology (Shenzhen) Co., Ltd.	Information technology development, technology transfer, technology promotion, technical consulting, technical services; mechanical equipment leasing (excluding financial leasing); international and domestic freight forwarding; mechanical equipment, electrical equipment, electronic components, hardware, chemical products, tires, lubrication. Sales of oil; undertaking approved cultural and art exchange activities; conference planning; exhibition display planning; corporate image planning; performance stage modelling and planning; corporate management consulting; corporate marketing planning; business information consulting; computer graphic design and production; warehousing services (excluding hazardous chemicals); labor dispatch; general freight;special cargo transportation (containers).
XINGFOX ENERGY TECHNOLOGY CO., LTD.	Batteries Manufacturing. Research, Design, Development, and Manufacturing of the below Products: Pouch Cell Large Format Lithium Battery

Company Name	Business Scope
Jin Ji Full Precision Machinery (HengYang) Co., Ltd	Development, Production and Operation of Precision Molds, Metal / Non-Metal Mold Components, Machine Components, Electronic Products and Parts; Automation Equipment and Key Components, Hardware Products, Sheet Metal Products, Injection Molding, Plastic Products Development, Design, Production, Sales; Heat Treatment Processing; Metal Material Shear Processing, Sales and Provision of related Technology and Material Supply Services; Testing Equipment Calibration, Repair, Maintenance, Testing, Sales; Development, Design, Manufacture of Electric / Non-Electric Bicycles, Travel Tools, Assembly, Processing, Operation, and Sales of Products in similar categories of the Abovementioned Products; Sales of Lithium Batteries.
Hengyang Fuxiangyun Culture Co., Ltd.	Production, Distribution and Agency for Advertisements; Sales of Lamps, Lighting, Electronic Products and Parts; Technical Development, Technical Consultation and Sales Of Computer Software; Graphic Design; Import / Export of Various Products And Technologies.
Hengyang Yuzhan Precision Technology Co.,Ltd	Precision Molds, Metal / Non-Metal Mold Components, Machine Components, Electronic Products and Parts development, Design, Development, Sales and maintenance; Automation Equipment and related Key Components, Hardware Products, Sheet Metal Products, Injection Molding Plastic Products Development, Design, Development, Sales; Heat Treatment; Third Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones, base stations, core network equipment and network testing equipment and Components, New Electronic Components, digital audio and video decoding equipment and their Components are engaged in the research; export of goods and technology; R&D of smart home products and Parts, smart wearable products and Parts, wholesale, Development; Plastic Hardware Products, portable automatic data processing equipment, portable electronic browsers, Remote Control, Speakers and the above Development of peripheral supporting equipment and parts of the product; development of smart speakers, smart helmets, smart Robots, and parts of the above products; development of Home Appliances, smart car Electronic Products, car networking terminal equipment and parts of the above products , Development, Warehousing Services; Multifunctional Industrial Robots, Peripheral Automation Fixtures, Technical Development of Mechanical Processing and Parts, Development, Wholesale; Mobile Phones and Parts, Mobile Development and Sales of communication system and Parts; Development and Sales of disposable general medical masks, N95 masks; Output of mask equipment and related technical services.
HENGYANG HENGZHIFU FINANCE AND ACCOUNTING SERVICES CO.,LTD	Accounting Agency, Financial consulting, Accounting Services.
HengYang FuTaiHong Precision Industry Co., Ltd.	Computer, Digital Audio-Visual Decoding Equipment, Color TV, Set-Top Boxes, Speakers, Microphones, Remote Controls, Hardware and Electric Materials, Plastic Products, Precision Mold, Mobile Phone, New Environmental Protection and Energy-saving Lamps, Portable E-Books,Portable Automatic Data Processing Equipment, Various Types of Speakers,,Display Screen Materials,Air Fresheners,Scanners, surveillance equipment, lighting, Home Appliances,wearable smart devices, smart consumer devices, Engaged in the Production, Sales, Import / Export of the Abovementioned Products and Parts and Related Supporting Operations.
XilinGol League Beiguobatuo Supply Chain Management Co., Ltd.	Supply chain management services; networking and computer technology development, technology transfer, technology promotion, technical consulting, technical services; warehousing services; mechanical equipment rental; mechanical equipment, electrical equipment, electronic components, hardware, chemical products (excluding hazardous chemicals and class A precursor chemicals), tires, lubricant sales; organization of cultural and art exchange activities; conference services; exhibition display services; corporate image planning; stage art modeling planning; business management consulting (excluding investment and investment consulting); enterprises Marketing planning; computer graphic design and production; advertising design and production; general cargo road transportation; container transportation; logistics services.
Ur Industry Materials (LangFang) Co., Ltd.	Surface Treatment of Industrial Materials (Except Spraying) and Testing; Development, Production and Sales of Industrial Materials; Import / Export of Goods and Technology.

Company Name	Business Scope
Ur Materials Industry (ShenZhen)Co., Ltd.	Production and Operation of Optoelectronic Products and Parts, Optical Products and Parts, Organic Polymer Materials, Optical Plates, Environmentally Friendly Optical Films, Optical Glass Cover, Optical Plastic Cover, Optical Mold Components, Optical Lenses, Carbon Fiber Composite Materials, Glass Fiber Composite Materials, Modified Plastic Particles, Environmentally Friendly Plastic Granules, New Plastic Materials, Research and Development of the Abovementioned Products and Packaging Materials, Chemical Products (Excluding Hazardous Chemicals), Optical Coatings, Optical New Materials, New Environmentally Friendly Composite Materials, Wholesale, Technical Consulting, Technical Services, Import / Export and Related supporting Operations, Technical Transfer of Proprietary Achievements, and After-sales Service of the Aforementioned Products and related equipment technical support, development, sales. Chemical products.
Ur New Materials Technology (Wuhan) Co., Ltd	R&D, processing, manufacturing, wholesale and retail of plastic raw materials and plastic products; plastic material technology development, technical consultation, technology promotion, technology transfer; import and export of goods, technology import and export (excluding goods or technologies prohibited or restricted by the state); wholesale and retail of chemical products (excluding hazardous chemicals); recycling and utilization of renewable resources (excluding productive scrap metal recycling).
Ur Hongxin Testing Technology (Dongguan) Co., Ltd.	Testing technology research and development and technical services; product quality identification (excluding import and export commodities); product quality inspection and testing services; electronic certification services; laboratory design services; import or export of goods or technologies.
Ur Hongxin Detection Technology (Shenzhen) Co., Ltd	Laboratory Testing, Calibration, Inspection, Product Certification, Management System Certification, Inspection and Testing Technology and Consulting Services, Import / Export of Goods and Technology.
Jinan Development Property Development Co., Ltd.	Property Management,house leasing and related consultation services.
CandleDino Network security technology (Shenzhen) Co., Ltd.	Network Security Technology Development, Technical Consulting; Computer System Integration; Advertising Operations; Communications Equipment, Electronic Products, Computers, Software and Supporting Equipment Sales. Internet Information Service.
Scienbizip Consulting (SZ) Ltd.	Enterprise Management Consulting, Economic Information Consulting, Scientific and Technological Information Consulting, Intellectual Property Rights Information Consulting (Excluding Patent Agents).
Scienbizip Consulting (Far East) Co., Ltd.	Management Consulting Services. .
QUKUAILIAN INFORMATION TECHNOLOGY (SHENZHEN) CO., LTD.	Software Development; Sales of own computer and Internet-related products; own computer and Internet Technology Transfers and related consulting services; corporate marketing planning;Corporate Information Consulting.
HonYuan International Investments Co., Ltd.	Investment.
Hongzhaoda Integrated Innovative Service(Kunshan) Co.,Ltd	Packaging, Assembly, Repair, Inspection and After-sales Services for Computers, Servers, Flat-Panel TVs and Monitors, Mobile Phones and Handheld Devices, Network Equipment, Photography and Video Camera Electronics and Components, Research And Development of the Technology regarding theAbovementioned Products, Wholesale, Import / Export and Commission Agents (Excluding Auctions), Warehousing Logistics and Related Technical Consultation of Similar Goods and Parts; Call Center Services in the form of Service Outsourcing.
INGRASYS TECHNOLOGY INC.	Data Storage Media Manufacturing and Duplicating,Wired Communication Equipment and Apparatus Manufacturing,Electronic Parts and Components Manufacturing,Computing Equipments Installation Construction.,Wholesale of Computing and Business Machinery Equipment.,Retail sale of Computing and Business Machinery Equipment. ,Wholesale of Computer Software.,Retail Sale of Computer Software. , International Trade, Automobiles and Parts Manufacturing, Wholesale of Motor Vehicle Parts and Supplies., Wholesale of Electronic Materials , Retail Sale of Electronic Materials. ,Restrained Telecom Radio Frequency Equipments and Materials Manufacturing. ,Restrained Telecom Radio Frequency Equipments and Materials Import.

Company Name	Business Scope
HongZhun Precision Tooling (KunShan) Co., Ltd.	Develop and Produce New Electronic Components, Precision Stamping Dies (precision higher than 0.02mm), Precision Cavity Molds (precision higher than 0.05mm), Mold Standard Parts, Electronic Special Equipment, Test Instruments, Tooling, Smart Cups and Accessories of the Abovementioned Products, Smart home equipment, smart consumer equipment, automobile parts and accessories, medical instruments and equipment and their accessories,Air Purifier and Accessories, Environmental Protection Equipment, High-Grade CNC Machine Tools, Automated and Elevated Warehouse Facilities, Automatic Testing Equipment, Vertical Multi-Joint Industrial Robots, Industrial Control Computers; Full computer manufacturing, computer parts and components manufacturing, other computer manufacturing; Sales of Self-produced Products.Sheet Metal Products Pressing and Processing.
HongZhun Precision Tooling (ShenZhen) Co., Ltd.	Production and Operation of Electronic Addon Programs,Components related to Integrated Circuits,various types of Precision Electronic Components and Precision Molds..
Foxway Precision Industrial (HangZhou) Co., Ltd.	New Electronic Components, Broadband Access Network Communication System Equipment, High-end Routers, Precision Die, Portable Microcomputers, Portable micro-computers,Digital Cameras, Digital Camcorders, Development and Production of the Abovementioned Products,Own products Sales and After-sales Services; Wholesale, Import / Export of the Abovementioned Products.
Hongfu (Shenzhen) Equity Investment Fund Management Co., Ltd.	Trusted asset management and investment management; equity investment and trust management equity investment funds.
HONG FU CHENG Technology (Tianjin) Co., Ltd	Development and Design, Sales, Maintenance and Installation of Electronic Products and Accessories, Computer Hardware / Software and Accessories,Home Appliances and Accessories, Communication Equipment and Accessories; Development, Design and Sales of Molds, Hardware, Plastic Products,Metal Materials, Building Materials; Warehousing Services Agency; Property Management; Import / Export of Goods and Technology.
HON FU CHENG PRECISION ELECTRONICS (CHENGDU) CO., LTD.	Development, Design, Production, Sales, Maintenance and Installation of Electronic Products, Portable Microcomputers, New Flat Panel Displays, Medium-to-Large-Sized Electronic Computers, Data Communication Multimedia Systems, Digital Audio-Visual Video Systems, Third- Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones, Servers (Excluding Basic Telecommunication Services, Value-added Telecommunication Services), Base Station Equipment (Excluding Satellite Ground Receiving Equipment and Items Regulated Nationally), Core Network Equipment and Network Testing Equipment and Components, Precision Molds , Metal and Plastic Die-cut Parts, Interface Materials, Aluminum Profiles for Electronics and Industrial use, Aluminum Materials for Architectural Decoration, Aluminum Alloy Doors and Windows, related Parts and Accessories of the Abovementioned Products; Warehousing (Excluding Hazardous Chemicals, Finished Oil Products and Other Items under Special National Provisions), Maintenance, Testing of Electronic Products, Computer and Supporting Equipment Business; Import / Export of Goods and Technology; Property Management (with relevant Qualifications for Operation); Human resources intermediary services.
Hongfuzhun Precision Shenzhen Co., Ltd.	Development and Production of Automation Equipment and related Key Components, Automation Peripherals, Automation Fixtures, Precision Spindles, Servo Drive Systems, digital control system, Injection Molding Machines, Import/Export. Provision of Equipment Transformation, Relocation, Repair and Maintenance Services.
HongFuTai Precision Electronics (YanTai) Co., Ltd.	Research and Development, Testing, Maintenance, Production of Medium-to-Large-Sized Electronic Computers, Portable Computers, New Electronic Components, New Instrument Components, Electronic Special Equipment, Precision Die, Standardized Mold Parts, Data Communication Multimedia System, Game Consoles, Large-Capacity (Magnetic) Disk Memory, Optical Disk Drive, Digital Video Recorder, DVD Player, Portable DVD Player, DigitalCamera, Photocopying Machine, Wireless Mobile Communication System, Home Appliances, Wearable Display Devices, Electronic Dictionary and Parts; Import, Export, Wholesale and related Supporting Business of The Abovementioned Non-Company-Produced Products; Spare Parts for Smart Robots, Air Purifiers, Displays, Remote Controls and Parts of the Abovementioned, Assembling Projectors, LCD TVs and Digital TV Sets, Processing Steel, Aluminum and Copper Materials, Sale of the Company's own Products; Production and Processing of Vehicle-related Products, Driving Recorders, Face Recognition Modules; Warehousing, Freight Forwarding;Customs Declaration Agency Services, Inspection Agency Services, Vehicle Rental.

Company Name	Business Scope
Hongfu Inno (Hangzhou) Co., Ltd.	Wholesale: Class I, Class II Medical Devices, Tablets, Mobile Phones, Portable Electronic Devices, Automotive Electronic Device Materials, Computer Hardware / Software and Supporting Equipment, Cameras, Photographic Equipment, Digital Printing Equipment, Home Entertainment Electronic Devices,Office Automation Supplies, Digital Home Products, Home Appliances, Communication Products, Network Products, Toy Products (Except Analog Toys), Electronic Products (Except Electronic Publications), Electronic Components and Electronic Accessories;Services: Medical Machinery and Medical Devices, Electronic Digital Software, Hardware / Software Development and Consulting Services, Transfer ofProduct Results, Computers and Tablets; Computer System Integration; Transfer of Proprietary Technical Achievements; Import / Export of Goods and Technologies; Electronic Information Technology Consulting and Technical Services; Investment Management; Information Consultation (Excluding Product Intermediary); Property Management.
HONGFUSHENG PRECISION ELECTRONICS (ZHENGZHOU) CO., Ltd.	Production and Operation of Third-Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones, Base Stations, Core Network Equipment and Network Detection Equipment and Components, New Electronic Components, Digital Audio-Visual Decoding Equipment and Components; Metal / Non-Metal Products Molds Design and Manufacturing; Development, Design, Manufacturing and Maintenance of LED Display Panels, Mobile Phone Accessories, Electronic Products;Renovation, Relocation, Repair and Maintenance Services of the Abovementioned Equipment; Research and Development of Mobile Communication Systems, Research and Development and Testing of Computer and Mobile Phone related Software / Hardware, System Integration, Application Services and Related Technical Services; Electronic Product Technology Development; Computer Network Engineering, Network Technology Development, Technology Transfer, Web Design; Technology Testing Services and Technical Consultation; Recycling, Repair, Sales and After-sales Service of Used Electronic Products and Communication Equipment; Sales of: Computer Hardware and Software and Accessories, Electronic Products, Home Appliances, Hardware and Electrical Supplies, Photography Equipment, Mechanical Equipment, Communication Equipment, LED Displays, Mobile Phone Accessories; Business Information Consultation (except Finance, Futures, Stocks, Securities); Import/ Export Business of Goods and Technology; Warehousing Services (Excluding flammable, combustible, and dangerous chemical products) Developmentand Sales of protection masks, protective gear and equipment, and labor protection products.
HONGFUJIN PRECISION INDUSTRY (WUHAN) CO., LTD	Development, Production and Operation of Precision Molds, Medium-to-Large-Sized Electronic Computers, Portable Microcomputers, New Flat Panel Displays, New Electronic Components, Computer Digital Signal Processing Systems and Board Manufacturing, Digital Cameras, Projectors, Engineering Plastics and related Products, Printing Machines, Printer Ink Cartridges, Multimedia Phones, Multi-Dimensional 3D Glasses, Camera, Digital TV, Third- Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones, Multimedia Recorder and Players, Digital Audio-Visual Systems, Metal and Plastic Processing Products, Game Consoles, Automation Equipment, Wiring and Mold Fixtures, Various Non-Standard Mechanical Equipment, Cash Registers, Vending Machines, Commercial Refrigeration and Heating Equipment and Motors, Computer Network Terminal Products (Including System Integration), Household and Commercial Water Machines, Electronic Labeling, High-tech Green Battery, Home Appliances and Related Components of the Abovementioned Products. Import And Export, Wholesale and Installation, Maintenance, Consulting, and After-Sales Related Services for Similar Products of the Aforementioned Products. Dissolution and Reuse of Waste Plastics; Technical Services and Consulting for Cloud Operations andCloud Computing; Development and Sales of Computer Software / Hardware, Commission Agents (Excluding Auctions). Electronic Products, Communication Products (Excluding Satellite TV Broadcasting and Ground Receiving Facilities), Digital Products, Computer Hardware / Software and Supporting Equipment, Network Equipment Sales; Mobile Phone Number and Mobile Fee Recharge Services.

Company Name	Business Scope
Hongfujin Precision Industry (Shenzhen) Co., Ltd.	Water heaters, optics, metering, testing instruments, intelligent Remote Control, electronic heating components, Power Distributors, Power Conversion Sockets, Hardware Plastic Products, Precision Molds, various types of computers Mainframe, Micro-Computers, Portable Computers, Notebook Computers, Multimedia Computers and Servers, Data Communication Multimedia Systems, New Displays, household electric heating appliances and devices, New Power Electronic Components, Wire and Cable Components, Power Supplies, Computer Motherboards, Optoelectronic Materials, Optoelectronic Devices, Active / Passive Components, Sensors, Mono-mode Fiber and New Technology Equipment Supporting Communication Networks, Related Cards for Communications and Networks, CD-ROM Drives, Optical Disc Drive, Video Signal Recording and Playback Equipment for Multimedia Computers, Digital Audio and Video Systems(Excluding TV Sets, and Nationally Regulated Products), Precision Ceramic Products, Optical Communication Ceramic Casings, Photoelectric Clip Tools, Optoelectronic Manufacturing Equipment, Plastics and related Products, Digital Cameras and key parts, Photocopiers,Wireless Phones,Electronic-specific Equipment(Including Mobile Phone Manufacturing Equipment,Semiconductor Manufacturing Equipment,LCD PANEL MANUFACTURING EQUIPMENT),Projectors,Solder Paste, LCD Digital TV,Equipment supporting Automation,Mobile Phones,Multimedia Phones,Satellite Navigation and Positioning Receiver Equipments,Smart Electronic Toys,automobiles,Home Appliances and Communications and other Electronic Products,Multidimensional Stereo Glasses,LCD Integrated Sales Terminals, Printer Ink Cartridge,New Environmentally Friendly Energy-Saving Lamps,Pocket- Sized Data Recording and Playback Machines,Security Control Products,Automatic Cash Dispensers,Micro Cash Sorting Machines,Solar Cells,Solar Battery Packs,Smart Wearable Products,Various Photographic Cameras and Accessories,Multimedia Recording Equipment and Accessories,Multimedia Players and Parts, Vending machines (including coin exchange machines), automatic teller machines, solar power generation devices, smart mobile service equipment, Class II Medical Equipment and similar products of the above products and their components and accessories (except game consoles, digital satellite TV receivers) R&D, Design, Sales, Import / Export and Related Supporting Businesses (excluding franchise, special control, monopoly products and restricted items); Non-quota Authorization Management, Export of Purchases Non-Franchised Products; Technology Consulting business; advertising business; Packaging Business; Warehousing and Storage; logistics business; solar photovoltaic grid-connected power generation and Sales, contract energy management business; transfer of self-developed technological achievements. Sales of oscillating atomizers. Water heaters, optics, measurement, testing instruments, intelligent Remote Control , Electronic heating components, Power Distributors, Power Conversion Sockets, Hardware Plastic Products, Precision Molds, Mainframe, Micro-Computers, Portable Computers, Notebook Computers, Multimedia Computers and Servers, Data Communication Multimedia Systems, New Displays, household electric heating appliances And device,New Power Electronic Components,Wire and Cable Components,Power Supplies,Computer Motherboards,Optoelectronic Materials,Optoelectronic Devices,Active / Passive Components,Sensors,Mono-mode Fiber and New Technology Equipment Supporting Communication Networks,Related Cards for Communications and Networks,CD-ROM Drives,Optical Disc Drive, Video Signal Recording and Playback Equipment for Multimedia Computers,Digital Audio and Video Systems(Excluding TV Sets, and Nationally Regulated Products),Precision Ceramic Products, Optical Communication Ceramic Casings, Photoelectric Clip Tools, Optoelectronic Manufacturing Equipment, Plastics and related Products, Digital Cameras and key parts, Photocopiers, Wireless Phones, Electronic-specific Equipment (Including Mobile Phone Manufacturing Equipment, Semiconductor Manufacturing Equipment, LCD PANEL MANUFACTURING EQUIPMENT), Projectors, Solder Paste, LCD Digital TV, Automation Peripherals, mobile phones, Multimedia Phones, Satellite Navigation and Positioning Receiver Equipments, Smart Electronic Toys, automobiles, household appliances and communications, etc. Electronic Products' zinc, aluminum alloy die-casting and its Processing and Parts,Multidimensional Stereo Glasses,LCD Integrated Sales Terminals, Printer Ink Cartridge,New Environmentally Friendly Energy-Saving Lamps,Pocket-Sized Data Recording and Playback Machines,Security Control Products,Automatic Cash Dispensers,Micro Cash Sorting Machines,Solar Cells,Solar Battery Packs, Smart Wearable Products, Various Photographic Cameras and Accessories, multimedia recording equipment, Multimedia Players and Parts, vending machines (including coin exchange machines), Automatic teller machines, solar power generation devices, game consoles, game console shells, virtual reality product shells, software products, Internet-of-Things electronic software and hardware, computer software and hardware, Computer System Integration, computer network technology, computer network Development of software, computer application software, smart mobile service equipment, Class II Medical Equipment and similar products of the above products and its components and accessories; precision instruments, equipment maintenance; steel plate stamping and cutting Processing. Processing of oscillating atomizers. The above Operation range does not include satellite TV broadcast ground receiving facilities and key components, and navigation electronic map compilation.
